### Work Experience

#### Verizon Telematics – Front End Developer

2021 - current

Alpharetta, GA

- Developed responsive web interfaces using Angular and Bootstrap, resulting in an 18% increase in mobile users
- Migrated web applications from WebLogic to Apache, **reducing server maintenance costs by 14%, amounting to an annual savings of \$6.8K**
- Used Git version control for source code management, resolving 98% of merge conflicts in a collaborative coding project
- Expedited front-end development process by 33% via implementing Webpack for JavaScript module bundling

#### Cox Communications – Web Developer

2018 - 2021

Sandy Springs, GA

- Automated project build processes with Apache Maven, decreasing downtime by 32% during system updates or additions
- Conducted comprehensive software testing using JUnit, which resulted in a 41% reduction in software bug issues post-release
- Merged development branches with Git, avoiding code conflicts and ensuring seamless code integration in 99% of cases
- **Improved the website load time by 26% by optimizing PostCSS utilities to minify and purge unused CSS**

#### Mailchimp – Junior Web Developer

2016 - 2018

Atlanta, GA

- Leveraged Eclipse IDE that reduced the bug correction time by 11%, saving about 21 hours per month and elevating the efficiency of development cycles
- Maintained end-to-end website functionality, leading to a rare downtime rate of 3.3%
- Optimized Git practices, **ensuring 98% resolution in merge conflicts, minimizing project delays** and saving a projected 12 hours per month
