

# Sustainability at bp

Our purpose is reimagining energy for people and our planet. Our sustainability frame underpins our strategy to become an integrated energy company and translates our purpose into action. It sets out aims in the areas where we believe we can make the biggest difference for bp, our stakeholders and society.

## Our aims and objectives

Sustainability at bp is about creating value by connecting the business opportunities of the energy transition with our aims and objectives for people, our planet and getting to net zero.

The aims are targeted but interconnected, so delivering one aim can help us deliver others.

## Our foundations

Sustainability is not new to bp. Over many decades we have built strong foundations to help us do the right thing on safety, greenhouse gas emissions, human rights, biodiversity, and other social and environmental factors. Delivering our aims requires us to build on and strengthen these foundations.

## Engaging stakeholders

We learn through ongoing engagement with our many different stakeholders and collaborate with them to deliver our aims.

## Embedding into our DNA

We are working to embed sustainability more deeply into our culture and mindset, decision making, systems and processes, and governance.
