

Five aims to get bp to net zero

Progress summary

We launched our five aims in February 2020. Given their maturity compared with the other sustainability aims that we launched in 2021, we have made progress against the majority of our targets.

More \$ for new energies

2021 performance low carbon investments.

2020 performance \$750 million

Net zero operations

2021 performance

cumulative reduction in emissions against the 2019 baseline (absolute basis).

2020 performance

Net zero production

2021 performance

cumulative reduction in emissions against the 2019 baseline (absolute basis).

2020 performance 9%

Get bp to net zero

Net zero sales

2021 performance

cumulative reduction in average emissions intensity of marketed energy products against the 2019 baseline.

2020 performance

Reducing methane

2021 performance

intensity of our operations.

0.07%

2020 performance
