

# SELFIE & VIDEO DATASET GUIDE

"Greetings!

*We are grateful for your interest and trust in TrainingData.pro, as you have downloaded our sample dataset.*

*I am Yura Mayer, the DataMarket project manager, and I would like to offer some insight into working with this folder and the data we provide to our customers.*

## File with the extension .csv

includes the following information for each media file:

- SetId: a unique identifier of a set of 8 media files,
- WorkerId: the identifier of the person who provided the media file,
- Country: the country of origin of the person,
- Age: the age of the person,
- Gender: the gender of the person,
- Type: the type of media file
- Link: the URL to access the media file

The file can be easily opened using a browser, Excel, or programming languages such as Python.

## Folder "samples" with media files

- containing all the photos and videos
- which correspond to the data in the .csv file

**How it works:** go to the first folder and you will make sure that it contains media files taken by a person whose parameters are specified in the first 8 lines of the .csv file.

**In order to get access to more than 28,000 media files from 3,530 people or to learn more about our data, please contact our sales team by submitting a request on our website or emailing us at [sales@trainingdata.pro](mailto:sales@trainingdata.pro)**

*Best regards,*
