## Supplementary Table S2 Treatment details in this study

| Treatment number | Treatment details* |
|------------------|--------------------|
| T0               | Addition of 15 mL sterilized water (control) |
| T1               | Addition of 15 mL conidial suspension of a selected endophytic fungus and 10 mL conidial suspension of *F. equiseti* |
| T2               | Addition of 15 mL conidial suspension of a selected endophytic fungus and 10 mL conidial suspension of *S. cucurbitacearum* |
| T3               | Addition of 15 mL conidial suspension of a selected endophytic fungus |
| T4               | Addition of 10 mL conidial suspension of *F. equiseti* |
| T5               | Addition of 10 mL conidial suspension of *S. cucurbitacearum* |

*The conidial concentration of each fungus was $1 \times 10^6$ conidia/mL.
