Keywords: driven diffusive systems (theory), stochastic particle dynamics (theory), large deviations in non-equilibrium systems

Page 8 subsection 3.3—Time reversal

• In the fourth and fifth line below the subsection title and in equation (16) replace $P_{\mu \nu}^{N}$ with $P$.

Page 18 subsection 5.5—Universality in current fluctuations and other results

• A scale factor connecting the $Q(t)$ of reference [2] with our time averaged current $J(x)$, equation (53), and a space integration have been omitted. More precisely in the third line below the subsection title

• $Q(t) = \int_{0}^{t} j(t') \, dt'$ should be replaced by $Q(t) = t \int_{0}^{1} J(x) \, dx$ with $t = \epsilon^{-2} T$.

• In equation (61) replace $L$ with $\epsilon^{-1}$ to be consistent with our notation.
