Editorial

Sino-Austrian High-Tech Acupuncture Network: Annual Report 2017

Gerhard Litscher

Head of the Research Unit for Complementary and Integrative Laser Medicine, of the Research Unit of Biomedical Engineering in Anesthesia and Intensive Care Medicine, and of the TCM Research Center Graz, Medical University of Graz, Auenbruggerplatz 29, 8036 Graz, Austria; gerhard.litscher@medunigraz.at; Tel.: +43-316-385-13907

Received: 10 January 2018; Accepted: 10 January 2018; Published: 12 January 2018

Abstract: The Sino-Austrian High-Tech Acupuncture Research Network was founded in 2005 and has been growing ever since. The network comprises many partners from China and is highly involved in research and education activities. This report introduces the network’s activities in the year 2017.

Keywords: high-tech acupuncture; network; annual report; China; Austria

The High-Tech Acupuncture Network was founded in 2005 by Professor DDr. Gerhard Litscher from the Medical University of Graz (Traditional Chinese Medicine (TCM) Research Center Graz) and comprises many partners from China (see Figure 1).

Figure 1. Cont.
In 2017, the Sino-Austrian High-Tech Acupuncture Network has grown very fast. In the following, milestones from the year 2017 are listed chronologically and at the end of the report recent literature from the network is cited [1–15] (see also Figures 2–30 and 32–34):

**8 January 2017:** World Health Organization (WHO): Professor Gerhard Litscher has been invited by the WHO (Traditional and Complementary Medicine) in Geneva to be an official participant in the following two working groups:

- WHO Benchmark for Practice in Acupuncture
- WHO Benchmark for Practice in Tuina

**16 February 2017:** Acupuncture Student Lecture, Professor Liang Fengxia, Graz, Austria.

Professor Liang Fengxia, Associate Dean, Acupuncture and Moxibustion Orthopaedic College and Deputy Director, Acupuncture and Moxibustion Institute at the Hubei University of Chinese
Medicine, performed a 3-hour student lecture at the Medical University of Graz (Special TCM Module (lecture, G. Litscher), coordinator Dr. Andrea Pribyl).

![Figure 3](image1.png)

**Figure 3.** Professor Liang Fengxia (a) in Graz, Austria, 16 February 2017. Student lecture from Professor Liang at the Medical University of Graz. Coordinator: Dr. Andrea Pribyl (2nd on the right side) (b).

**12 March 2017:** Eurasia Pacific Uninet (EPU). Joint project with the Hubei University of Chinese Medicine, Wuhan, China and the Medical University of Graz, Graz, Austria.

![Figure 4](image2.png)

**Figure 4.** Professor Liang Fengxia and Professor Gerhard Litscher (a) From left to right: PD Dr. Lu Wang, Professor Liang Fengxia, Professor Gerhard Litscher, and Dr. Daniela Litscher (b) Graz, Austria, 2017.

Established in 1958, the Hubei University of Chinese Medicine has three secondary schools, four affiliated hospitals, four State-Level (highest level) Medical Research Centers, and 10 Research Institutions. The university occupies 0.65 km² with a total construction of about 470,000 m². The university has 15 departments, 17 specialties for the bachelor’s degree and 9 specialties for professional training, 19 specialties for the master’s degree and 12 specialties for the doctor degree, and more than 60 bases for clinical practice, including 6 affiliated hospitals, and 21 State-Level, Province-Level, or College-Level laboratories for teaching. At present, the university has about 15,000 students.

Acupuncture is one of the key disciplines of research of this renowned university. The Medical University of Graz (Professor Gerhard Litscher) works in close cooperation with the Hubei University of Chinese Medicine (with Professor Wang Hua and Professor Liang Fengxia) on the topic of high-tech acupuncture research. Within the few last years, several joint SCI/PubMed-listed publications have been published. Professor Litscher from the Medical University of Graz is Visiting Professor at the Hubei University of Chinese Medicine (with Professor Wang Hua and Professor Liang Fengxia) on the topic of high-tech acupuncture research. Within the few last years, several joint SCI/PubMed-listed publications have been published. Professor Litscher from the Medical University of Graz is Visiting Professor at the Hubei University of Chinese Medicine and at the Hubei Provincial Collaborative Innovation Center of Preventive Treatment by Acupuncture and Moxibustion (Director: Professor Wang Hua). The cooperation is also supported by the Austrian Ministry of Science, Research, and Economy and by Eurasia Pacific Uninet.

**21 May 2017:** Editor’s Meet in Beijing: Medicines, Beijing, China (G. Litscher: Editor-in-chief of Medicines).
21 May 2017: World Federation of Chinese Medicine Societies, Beijing, China. Professor G. Litscher: Executive Council Member (December 2016–December 2020). Topic: Heart Rate Variability.

**Figure 5.** Medicines Editor’s Meeting in Beijing, China, 21 May 2017. Presentation of a report by the Managing Editor Mrs. Jewel Wu (a). From left to right: Mrs. Chao Xiao, Section Leader, Professor Gerhard Litscher, Editor-in-chief, and Mrs. Jewel Wu, Managing Editor (b).

22 May 2017: Sino-Austrian Project Meeting 2017. Sino-Austrian TCM Research on Lifestyle Related Diseases, Beijing, China.

Weber (ISLA President), Dr. Michael Weber, Professor Gerhard Litscher (ISLA President), Dr. Volkmar Kreisel (ISLA Vice-President), Dr. Michael Grandjean (ISLA Vice President). Presidents of ISLA (International Society for Medical Laser Applications) and of the Congress: Professor G. Litscher (left) and Dr. M. H. Weber (b). Laser stimulation equipment for the wrist (d) and the knee (e).

9 June 2017: Meeting with Representatives from WALT (World Association of Laser Therapy), Lauenförde, Germany.

Figure 14. President elect of WALT, Professor P.R. Arany, University at Buffalo, New York and President of ISLA (International Society of Medical Laser Applications), Professor Gerhard Litscher (right) (a,c). Representatives from WALT, Dr. Ann Liebert (Sydney, Australia; left), Professor Juanita J. Anders (Bethesda, Maryland, USA), Professor P.R. Arany, and Professor G. Litscher (c) in Lauenförde (b), Germany, 9 June 2017.

24–25 June 2017: Interdisciplinary Acupunctur Symposium V, Athens, Greece: Science focuses on Pain.

Figure 15. Cont.
What is especially worth mentioning is the achievement in artemisinin research, which has made tremendous contributions to human health. Thus, CACMS was awarded a Lasker Medical Research Award and in 2015 the Nobel Prize in Medicine.

Acupuncture is one of the key disciplines of research of this renowned university. The Medical University of Graz works in close cooperation with China Academy of Chinese Medical Sciences on the topic of high-tech acupuncture research. Within the last 12 years, more than 65 joint SCI/PubMed-listed publications have been published with CACMS together. Professor Litscher from the Medical University of Graz is Visiting Professor at the Institute of Acupuncture and Moxibustion at CACMS. This appointment was renewed last year during the last visit of CACMS to the Medical University of Graz with President Professor Zhang Boli.

26 June 2017: China Academy of Chinese Medical Sciences at the Medical University of Graz, Graz, Austria.
Figure 17. Cont.
Anesthesia and Intensive Care Medicine at the Medical University of Graz, has dedicated himself to the chairman of the TCM Research Center Graz. The chairmen of the center would like to use the opportunity to thank everyone for their generous support far; for example, the quantification of new acupuncture techniques, such as the painless laser needle acupuncture and electro acupuncture. Possible effects of acupuncture in combination with other methods are also subject to scientific research.

Lecture about High-Tech Acupuncture at Eu Yan Sang Intern. Ltd.—Singapore, 8 August 2017:

A scientific report summarizes some of the research activities within the last 10 years and the chairman of the center would like to use the opportunity to thank everyone for their generous support of the TCM Research Center Graz.

8 August 2017: Lecture about High-Tech Acupuncture at Eu Yan Sang Intern. Ltd.—Singapore, Republic of Singapore.

From acupuncture to the many hundreds of different medical herbs: Traditional Chinese Medicine (TCM) is booming. In addition, it is effective: TCM has been practised successfully for more than 4000 years, and the Western demand for something to complement classical Western medicine has been increasing for years. Graz is going to play a central role in TCM research: the “TCM Research Center Graz” was founded in early March 2007 by Karl-Franzens-University Graz and the Medical University Graz, and subsequently became a competence center that is unique worldwide.

Dealing with acupuncture and Chinese medical herbs has a long tradition in Graz: Professor Rudolf Bauer, Head of the Institute of Pharmaceutical Sciences at Karl-Franzens-University, has been researching the active pharmaceutical ingredients and quality of Chinese medicinal herbs now for 26 years. Professor Gerhard Litscher, Head of the Research Unit of Biomedical Engineering in Anesthesia and Intensive Care Medicine, Medical University Graz, has dedicated himself to the research of acupuncture using the latest high-tech methods for 20 years. For both, scientific work is the basis for the modernization of TCM: “TCM is a kind of medicine that can be evaluated scientifically”, says Rudolf Bauer, “it possesses comprehensible diagnostic methods and uses precise and controllable therapies”. So, all research work is done based on scientific methods. Gerhard Litscher: “We are interested in basic research and those aspects of TCM that have not been given much attention so far; for example, the quantification of new acupuncture techniques, such as the painless laser needle acupuncture and electro acupuncture. Possible effects of acupuncture in combination with other methods are also subject to scientific research”.

A scientific report summarizes some of the research activities within the last 10 years and the chairman of the center would like to use the opportunity to thank everyone for their generous support of the TCM Research Center Graz.
