### Supplementary Table 2. Frequencies and percentages of all reported comorbidities

| Comorbidities                                      | n   | %    |
|----------------------------------------------------|-----|------|
| AKI, obesity                                       | 1   | 0.28 |
| aplastic anemia                                    | 1   | 0.28 |
| asthma                                             | 1   | 0.28 |
| breast cancer                                      | 2   | 0.55 |
| Crohn’s disease, obesity                          | 1   | 0.28 |
| DM                                                 | 21  | 5.79 |
| DM, asthma                                         | 1   | 0.28 |
| DM, hyperlipidemia                                 | 4   | 1.10 |
| DM, hyperthyroidism                                | 1   | 0.28 |
| DM, obesity                                        | 1   | 0.28 |
| DM, CAD                                            | 1   | 0.28 |
| dyslipidemia                                       | 2   | 0.55 |
| dyslipidemia, atrial fibrillation                   | 1   | 0.28 |
| HTN                                                | 55  | 15.15|
| HTN, asthma                                        | 3   | 0.83 |
| HTN, atrial fibrillation, smoker                   | 1   | 0.28 |
| HTN, CKD, smoker                                   | 1   | 0.28 |
| HTN, dyslipidemia                                  | 4   | 1.10 |
| HTN, dyslipidemia, CKD                             | 1   | 0.28 |
| HTN, dyslipidemia, atrial fibrillation              | 1   | 0.28 |
| HTN, heart failure                                 | 1   | 0.28 |
| HTN, hypercholesterolemia                          | 4   | 1.10 |
| HTN, hyperlipidemia                                | 8   | 2.20 |
| HTN, hyperlipidemia, asthma                        | 1   | 0.28 |
| HTN, hyperlipidemia, CAD                           | 1   | 0.28 |
| HTN, hyperlipidemia, CHF                           | 1   | 0.28 |
| HTN, kidney failure                                | 1   | 0.28 |
| HTN, KTR, past smoker                              | 1   | 0.28 |
| HTN, migraine                                      | 2   | 0.55 |
| HTN, obesity                                       | 5   | 1.38 |
| HTN, obesity, CKD                                  | 1   | 0.28 |
| HTN, obesity, dyslipidemia, sleep apnea, ESRD      | 1   | 0.28 |
| HTN, obesity, hyperlipidemia                       | 1   | 0.28 |
| HTN, smoking                                       | 5   | 1.38 |
| HTN, CAD                                           | 3   | 0.83 |
| HTN, CKD                                           | 4   | 1.10 |
| HTN, DM                                            | 29  | 7.99 |
| HTN, DM, CAD                                       | 1   | 0.28 |
| HTN, DM, cholithiasia                              | 1   | 0.28 |
| HTN, DM, CKD                                       | 4   | 1.10 |
| HTN, DM, dyslipidemia                              | 3   | 0.83 |
| HTN, DM, dyslipidemia, ESRD, smoker, sleep apnea   | 1   | 0.28 |
| Condition                                      | Count | Probability |
|-----------------------------------------------|-------|-------------|
| HTN, DM, ESRD                                 | 1     | 0.28        |
| HTN, DM, hyperlipidemia                       | 6     | 1.65        |
| HTN, DM, hyperlipidemia, CAD                  | 2     | 0.55        |
| HTN, DM, hyperlipidemia, CAD, CHF             | 1     | 0.28        |
| HTN, DM, ischemic heart disease               | 1     | 0.28        |
| HTN, DM, obesity                              | 5     | 1.38        |
| HTN, DM, obesity, AKI                         | 1     | 0.28        |
| HTN, DM, obesity, CHD                         | 1     | 0.28        |
| HTN, DM, obesity, hyperlipidemia, CKD         | 1     | 0.28        |
| HTN, DM, obesity, smoker                      | 1     | 0.28        |
| hyperlipidemia                                | 3     | 0.83        |
| hyperthyroidism                               | 1     | 0.28        |
| ischemic heart disease                        | 1     | 0.28        |
| left eye strabismus                           | 1     | 0.28        |
| migraine                                      | 2     | 0.55        |
| none                                          | 131   | 36.09       |
| obesity                                       | 10    | 2.75        |
| obesity, asthma                               | 3     | 0.83        |
| obesity, smoking                              | 1     | 0.28        |
| psoriatic arthritis                           | 1     | 0.28        |
| RA, allergic alveolitis, monoclonal IgG kappa gammopathy | 1 | 0.28 |
| sickle cell disease                           | 1     | 0.28        |
| sinusitis                                     | 1     | 0.28        |
| sleep apnea                                   | 1     | 0.28        |
| smoking                                       | 1     | 0.28        |
| ulcer                                         | 1     | 0.28        |

*Note.* Due to rounding errors, percentages may not equal 100%.

**Abbreviations:** Acute kidney injury (AKI); Diabetes mellitus (DM); Coronary artery disease (CAD); Chronic kidney disease (CKD); Coronary heart failure (CHF); Kidney transplant recipient (KTR); End-stage renal disease (ESRD); Rheumatoid arthritis (RA)
