Supplementary Material

Changing Cognitive Risk Factors for Sexual Aggression: Risky Sexual Scripts, Low Sexual-Self-Esteem, Perception of Pornography, and Acceptance of Sexual Coercion

Table S1

Timeline of the Study and Number of Participants

|                          | T1 Baseline | T1 Module | (+ 1 week) Module | (+ 1 week) Module | T2 (±1 week) Post-intervention | T3 (+ 4 weeks) Follow-up |
|--------------------------|-------------|-----------|-------------------|-------------------|-------------------------------|-------------------------|
| **Experimental Group 1** | ✓ n = 103   | Scripts: Alcohol use Scripts: Ambiguous communication n = 102 | Scripts: Casual sex n = 93 | ✓ n = 93 | ✓ n = 92 |
| **Experimental Group 2** | ✓ n = 88    | Sexual self-esteem Realism of pornography n = 89 | Acceptance of sexual coercion n = 75 | ✓ n = 74 | ✓ n = 74 |
| **Control Group (CG)**  | ✓ n = 97    | ✓ n = 90  | ✓ n = 92          |                   |                               |
| **Number of missing cases** | n = 36     | n = 25    | n = 48            | n = 67            | n = 66 |
| **Total N for analysis** | N = 324     | N = 324   | N = 324           |                   |                               |

*Note. ✓ Assessment of outcome variables.*
Table S2

*Correlation Coefficients between the T1 Variables for the Total Sample*

|                         | 1   | 2     | 3     | 4     | 5   | 6     | 7   |
|-------------------------|-----|-------|-------|-------|-----|-------|-----|
| 1. Risky sexual scripts: total | -   | .55***| .87***| .26***| .07 | .15* | .01 |
| 2. Risky sexual scripts: alcohol | -   |       | .21***| .10   | .00 | .02   | .05 |
| 3. Risky sexual scripts: casual sex | -   |       |       | -.11  | .13*| .12*  | -.06|
| 4. Risky sexual scripts: ambiguous comm. | -   |       |       |       | -.11| .12*  | .14*|
| 5. Sex. self-esteem       | -   |       |       |       |     | .04   | .12 |
| 6. Pornography: perceived realism | -   |       |       |       |     |       | .14*|
| 7. Acceptance of sex. coercion |     |       |       |       |     |       |    |

*p < .05, ***p < .001.
Figure 1. Treatment effects on sexual self-esteem (standardized coefficients). Endogenous variables controlled for gender and sexual orientation.*$p < .05$, ***$p < .001$. 
Figure 2. Treatment effects on acceptance of sexual coercion (standardized coefficients).

Endogenous variables controlled for gender and sexual orientation. *p < .05, ***p < .001.
