*a* Police National Computer.
*b* Prison dataset.
*c* Probation dataset.
*d* Shared prison and probation dataset.
*e* Incentive and Earned Privilege level (status and privilege scheme within prisons).
*f* Assessment, Care in Custody and Teamwork (suicide and self-harm risk case management system).
## Supplementary Appendix 2: Summary of the data, processes, costs and timescales for linking with police data

| Dataset | PNC (Police National Computer) | Perito (Independent Office for Police Conduct Case Management System) |
|---------|--------------------------------|---------------------------------------------------------------|
| Extract from the Police National Database relating to convictions and cautions. | Data on individuals who died by suicide during or following police contact. |
| **Data** | Unique identifier: PNCID | Unique identifier: CTMSnum (Case Reference Number) |
| Range: 2000-present (only for individuals who have had a caution or conviction since 2000) | Range: 2004-present (retention period of six years unless statutory reasons for retention exist) |
| Completeness: Most non-demographic fields are mandatory. Specifics on completeness provided after data request. | Completeness: data should be close to 100% for independently investigated case. This will be lower for other cases but can be developed with manual follow up. |

| Process | 1. Email to datalinkingteam@justice.gov.uk with subject: Request to Data Access Group. |
|---------|--------------------------------------------------------------------------|
| 2. Detail request for data access including data items requested and approvals to share the individual level data for linkage. | 1. Informal ‘approval’ process; approach IOPC with data request (data items requested and date range). |
| 3. The data linking team will then send Data Sharing Agreement and Privacy Impact Agreement templates and work with us to populate these. | 2. Data Sharing Agreement will be drawn up which outlines provision and handling of information and signed by both parties. |
| 4. Both agreements are sent over to the Data Compliance Team to review. | 3. Report would be provided in excel spreadsheet via Egress Secure email system. |
| 5. Agreements are processed by the Legal Team before being sent back to the Data Compliance Team for sign-off. | 4. For some cases, there will be limited information where agreements are in place with friends or family of the deceased not to share information. In these cases, next steps depend on the type of investigation the case is subject to: |
| 6. Once agreed, two extracts can be shared: one with the main linkage and another from the ‘Spine’ with unique identifiers. | (a) Independent investigations; the Research Team at IOPC will link up with the lead investigator on the case to determine what can be shared and to review sharing of information if the investigation is still underway. |
| Extracts are shared as a CSV flat file (one entry per offence per disposal). Transfer must be to a .cjsm account through a password protected winzip file. | (b) All other types of investigation; enough information will be provided by the IOPC that the relevant police service can be contacted for case identification (for linkage) and additional information. |

| Timescale and cost | Timescale: Whole process likely to take around 6 months. Once agreements are in place, extract will be provided in 2-4 weeks. Cost: none directly incurred from the data team. |
|-------------------| Timescale: Likely to take no longer than 12 weeks. Cost: none directly incurred from the data team. |
## Supplementary Appendix 3: Summary of the data, processes, costs and timescales for linking with probation data

### Data Source

| nDelius (Probation Case Management System) | OASys (Offender Assessment System (Probation and Prison)) |
|-------------------------------------------|----------------------------------------------------------|
| Data on individuals who are or have been under probation supervision. Used by Community Rehabilitation Company (CRC) and HMPPS probation | Data on all individuals who have been under probation supervision (including Standalone Unpaid Work) or have been in prison (including unsentenced). |
| **Unique identifier:** Probation CRN (Case Reference Number) | **Unique identifier:** PNCID |
| **Range:** Since 2014 | **Range:** 2015 – present |
| **Completeness:** >80% for most requested fields, less accurate for some that require manual input (i.e. recalls) | **Completeness:** No record of completeness available. It is rare to have missing fields but possible that ‘don’t know’ may be used (i.e. where the assessment is completed in absence of the individual) |

### Process

1. Obtain NRC approval and authorisation to seek data from the Information Asset Owner (IAO).
2. Use IAO authorisation to approach the nDelius Reporting Team (nDeliusQueries@noms.gsi.gov.uk) to discuss the data required, how, where and when it can be delivered.
3. We would be provided with a document to complete in order to fully establish what extract is required, how it will be used etc.
4. We are then provided with an ISA for completion, stipulating how the data should be stored and deleted, for us to complete and return.
5. Formally request the data required in the form of a report from the nDelius team.

Report would be provided in an excel spreadsheet via secure email.

### Timescale and cost

| **nDelius (Probation Case Management System)** | **OASys (Offender Assessment System (Probation and Prison))** |
| Timescale: 2 – 3 weeks: see OASys section for breakdown. | Timescale: 2–3 weeks: extraction takes 1–2 weeks, including testing for data validity; then checked and approved by the OASys team and the statistics team which takes a further week. |
| Cost: none directly incurred from the data team | Cost: none directly incurred from the data team |
Supplementary Appendix 4: Summary of the data, processes, costs and timescales for linking with prison data

| Data Source | P-NOMIS (Prison National Offender Management Information System) |
|-------------|---------------------------------------------------------------|
|             | Data on all individuals who have been in prison; including those on remand, sentenced and non-criminal prisoners. |

| Data | Unique identifier: Prison Number |
|------|----------------------------------|
| Range: | Public Prisons since 2010  Private Prisons since 2012 |
| Completeness: | >97% (exception of visits which are inconsistently marked as completed across the estate)  Full list of data fields not shared |

| Process | 1. Obtain HMPPS NRC approval and authorisation to seek data from the IAO. |
|---------|--------------------------------------------------------------------|
|         | 2. Use IAO authorisation to obtain an appropriate ISA from the Information Assurance Team (informationassurance@noms.gsi.gov.uk). |
|         | 3. Contact the National Reporting Team (NOMSAplicationsReportingTeam@noms.gsi.gov.uk) who will work with us to define what data we want, how it can be delivered, to where and what timescales, once the information sharing agreement is in place. A brief version of step 3 may be needed before step 2 to inform the ISA. |
|         | 4. The ISA will inform an estimate of cost and timescales, based on priority and complexity of the request. |
|         | 5. Once negotiated, we can formally request the extraction of data through the National Reporting Team; assuming no external support is needed, extract may be provided with no cost attached. |
|         | 6. Report is provided on a password protected excel spreadsheet via secure email. |

| Timescale and cost | Timescale: 2 – 6 weeks once ISA in place |
|--------------------|----------------------------------------|
|                    | Cost: none directly incurred from the data team |
