Editor-in-Chief
Prof. Jorge M. Seminario
Texas A&M University, USA

Editorial Board
Dr. Masoud Allahkarami
Oklahoma State University, USA

Dr. Mukannan Arivanandhan
Shizuoka University, Japan

Dr. Elias J. Fernandez
University of Tennessee, USA

Dr. Hédi Fitouri
University of Monastir, Tunisia

Dr. Jade Kenneth Forwood
Charles Sturt University, Australia

Dr. Rainer Ernst Glaser
University of Missouri-Columbia, USA

Prof. Ching-Hwa Ho
National Taiwan University of Science and Technology, Chinese Taipei

Dr. Michele Iafisco
Institute of Science and Technology for Ceramics, Italy

Dr. Srinivas Janaswamy
Purdue University, USA

Dr. Vimal S. Joshi
Gujarat University, India

Dr. Wen Lei
Australian National University, Australia

Dr. Teo Kie Leong
National University of Singapore, Singapore

Dr. J. M. Delgado López
CSIC-University of Granda, Spain

Prof. P. K. Mandal
University of North Bengal, India

Dr. Eric W. Reinhermer
California State University, USA

Prof. Bernard D. Santarsiero
University of Illinois at Chicago, USA

Dr. Aidong Shen
The City College of the City University of New York, USA

Dr. Dashuang Shi
George Washington University, USA

Dr. Hailong Zhou
University of California at Los Angeles, USA
TABLE OF CONTENTS

Volume 2 Number 3 September 2013

Ce-SAD Phasing of Glucose Isomerase and Thermolysin Using Cu Kα Radiation
S. Narayanan, D. Velmurugan.................................................................93

ZnO Heteroepitaxy on Sapphire Using a Novel Buffer Layer of Titanium Oxide: Optoelectronic Behavior
S. Yamauchi, Y. Imai.............................................................................100

Pseudosymmetric Features and Nonlinear Optical Properties of Potassium Titanyl Phosphate Crystals
A. P. Gazhulina, M. O. Marychev.........................................................106

Crystal Structure of 3-Amino-5,6-Dimethyl-2-Nitrobiphenyl-4-Carbonitrile
W. Q. Zhang...........................................................................................120

A Hirshfeld Surface Analysis and Crystal Structure of
2‘-[1-(2-Fluoro-Phenyl)-1H-tetrazol-5-yl]-4-Methoxy-Biphenyl-2-Carbaldehyde
S. Madan Kumar, B. C. Manjunath, G. S. Lingaraju, M. M. M. Abdoh, M. P. Sadashiva, N. K. Lokanath.................................124

Investigation of Some Structural and Mechanical Properties of Ba0.5Ca0.5−xSr0.5−xTiO3 Ceramics
L. M. Sharaf El-Deen, M. H. Badr, A.-M. H. Khafagy, D. U. Nassar.................................................................132

The figure on the front cover is from the article published in Crystal Structure Theory and Applications, 2013, Vol. 2, No. 3, pp. 100-105 by Satoshi Yamauchi, Yoh Imai.
Crystal Structure Theory and Applications (CSTA)

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: csta@scirp.org
Crystal Structure Theory and Applications (CSTA) is an open access journal published quarterly. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in all aspects of crystal structure theory and applications.

Subject Coverage

All manuscripts must be prepared in English, and are subject to a rigorous peer-review process. Accepted papers will immediately appear online followed by printed in hard copy. The areas covered by Crystal Structure Theory and Applications (CSTA) include but are not limited to the following fields:

- Application of Crystals
- Atomic Coordination
- Bravais Lattices
- Crystal Growth Techniques and Phenomena (including Bulk Growth, Thin Films)
- Crystal Structure Prediction
- Crystal Structures Cleavage
- Crystallographic Computing
- Defects and Impurities of Crystal Structures
- Determination of Crystal Structures
- Experimental Crystallography and Biocrystallography
- Grain Boundaries
- Industrial Crystallisation
- Lattice Systems
- New Crystal Structures (including Liquid Crystals, Nanocrystals, Quasicrystals)
- Nucleation Theory
- Optical Properties of Crystal Structures
- Physical Properties of Crystal Structures
- Point Groups
- Polymorphism
- Simulation and Model of Crystal Structures
- Space Groups

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.

Website and E-mail

**What is SCIRP?**
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

**What is Open Access?**
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
