Other Papers

In addition to the papers appearing in these Proceedings, the following papers were delivered at the Ninth Annual General Meeting:

Invited Paper
The Anglo-Australian Telescope and its Scientific Objectives
E. J. Wampler

Contributions
Megalithic Stone Circles and Phases of the Moon
J. J. Monaghan

Remarks on representations of the Jovian Magnetic Field
D. B. Melrose

Dynamical Models of Globular Clusters
G. S. da Costa

Dynamic Instability of Isothermal Relativistic Star Clusters
K. G. Suffern

The Horizontal Branch Star 62° 5811
A. W. Rodgers

The Halo of the Giant Spiral Galaxy NGC 253
K. C. Freeman

The Jupiter Magnetic Field and the Dekametric Radio Emissions
G. R. A. Ellis

Systematic Patterns in the Radio Spectra of Pulsar Scintillations
J. G. Ales and J. A. Roberts

A Wide-Band Polarimeter with Colour Display for Solar Radio Astronomy
S. Suzuki and K. V. Sheridan

A Comparison of Synchrotron and Plasma Radiation Mechanisms as applied to Solar Metric Radio Bursts
R. D. Robinson

HI Absorption in the direction of Orion A and B
I. A. Lockhart and W. Miller Goss

Association between Solar X-ray Loops and Type III Bursts
R. T. Stewart and J. Vorpahl
