Mohali Campus-II

Abstract- Guru Ram Rai Durbar is one of the oldest built structures of Dehradun and a significant example of architectural amalgamation. The juxtaposition of architectural components of the various buildings present in Durbar precinct reveals a range of different architectural styles and impressions of art traditions prevailing at that time. The study helps in rediscovering the ‘Guru Ram Rai Durbar’, heritage lore of the city and identifies it as a Living Cultural Heritage site to be conserved for future. A comprehensive understanding of the Durbar through research and documentation leads to a sensitive conservation approach for Durbar.

Keywords- Living Cultural Heritage, Architectural amalgamation, arabesque, frescos, Garhwal School of Paintings, Documentation

I. INTRODUCTION

Dehradun, itself is comprised of two words-Dehra and Dun. Dehra is derived from ‘Dera, which means a staying place meant for a temporary phase and Doon means a ‘valley’ (the lower plains in the foothills of Himalayan mountain range). It was once a dense forest with dangerous wild life, in the period of Aurangzeb. Guru Ram Rai (the eldest son of 7th Sikh guru Guru Har Rai ji), the Udaseen Guru was welcomed by emperor of Garhwal, Fateh Shah on orders of Aurangzeb and was allowed to come here to retire in the wilderness of the valley. The place where he pitched his Dera is now in the Khurbura locality of the town. He established Guru Ram Rai Durbar near Dhamawalan in Samvat 1733(1676 A.D.) and was completed by his fourth wife (Mata Punjab Kaur, in Samvat 1756(1699 A.D.). The Durbar Sahib is situated like a fort between walls and minarets. It is a unique example of Mughal-Sikh-Pahari Architectural-Cultural-Heritage.

Important Dates Associated with the Evolution of Guru Ram Rai Durbar
- Guru Ram Rai came to Doon-1675 A.D.
- Durbar construction started under Aurangzeb in 1676 A.D.
- Guru Ram Rai died- 1687 A.D.
- Durbar was completed by Mata Punjab Kaur-1699 A.D.
- Mata Maluki Samadhi- 1724 A.D.
- Mata Lal Kaur Samadhi-1780 A.D.
- Mata Punjab Kaur Samadhi-1811 A.D.
- Mata Raj Kaur Samadhi-1815 A.D.
- First Mahant on throne-1687 A.D.
- Embedding of marble initiated by Mahant Laxman Dass in -1896-2000
- Construction of new building completed in- 2011
- Repair, restoration, beautification by present Mahant Devendra Dass –Presently work in progress.
Terms-

1. **Arabesque**
   A decorative form of Islamic Art, found on the ceiling of vestibules which echoes the forms of plants, flowers, geometric shapes and animals especially birds.

![Sketch 1 Arabesque](image)

2. **Fresco**
   It is a technique of mural painting executed on freshly laid plaster. Word Fresco is derived from Italian adjective means fresh.

![Sketch 2 Frescos](image)

3. **Islamic Script** –
   It is an art form, based on Arabic script.

![Sketch 3 Islamic Script](image)

A. **Durbar and its Importance**

Gurudwara Ram Rai Durbar was established by Shri Guru Ram Rai. But Gurudwara converted to Shrine of Guru and his four wives, when English came to reign by defeating Nepal in 1816. His followers have been known as Udasis or Ram Raiyyas, started their own traditions, separate from Sikhism and they follow the Sanatani way of life, worshipping the ‘Mahants’ who successively established Ram Rai’s Gaddi after his death.

B. **Layout of Durbar**

Very similar to other mausoleums built by Mughals is the general layout of Guru Ram Rai mausoleum and the adjoining garden. The design of Guru’s Samadhi appears to have been inspired by Jahangir’s Tomb at Shahdara Bagh, Lahore. Both the gardens, the one surrounding the monument and one adjoining, are strikingly Mughal in their Layout, representing the Charbagh or Four Gardens’ concept (Been There Doon That.(2019)). Whole complex is divided into three wings – Main Complex, Main Durbar wing and Mata’s wing. Complex wing is entered by Elephant gate and consists of Museum, Office Building and Lungar Durbar Sahib. Main Durbar Wing has two entries—one from Complex wing through Darshini Dwar and second from Paltan Bazaar through Baluni Gate. Main Shrine of Guru and his four wives are well located in the whole complex. Mata’s wing is a separate wing entered through Bhai Bheelon Gate where Mata Punjab Kaur’s symbol of swing, Guru’s cremation and Bathing area along with a step well are located.

C. **Jhanda Mela**

One of the famous fairs in North India, is the ‘Jhanda Ka Mela’ in Dehradun, an annual honored religious fair celebrated in February / March in the memory of Guru Ram Rai on his Birthday. Besides being the birthday of Guru Maharaj (Guru Ram Rai), it is also considered as the day of his arrival in Dehradun. In samvat 1733, on that day, the great occasion was celebrated in his honor and since then, the Jhanda is hoisted on every year to commemorate his sacred memory. Pilgrimages from Punjab, Haryana, Delhi, Uttar Pradesh and even from abroad arrive here few days prior to Jhanda hoisting. These crowds consist of men, women and children of all age groups and are called ‘Sangat’ (devotees, followers, admirers and saints).

![Fig. 2. Jhanda Mela](image)
II. STUDY OF GURU RAM RAI DURBAR

MAIN COMPLEX

Guru Ram Rai Durbar is one of the primordial buildings of Dehradun making deep instinct in terms of its being, religion, socio culture and architecture. Historic trademark has different influences for architecture in terms of invention of new techniques, historical facts and thus evolution of new architectural culture. The Durbar Sahib is situated in about one hundred bighas of land and enclosed within high walls. Durbar has many buildings which are living sculptures/monuments as each and every measure and curve are handled with ingenuity. The huge sarovar in the front measuring 230x184 feet is as old as the Durbar. Lacs

of Sangat take the holy dip during Mela in the sarovar.

Sketch 4  Isometric view of Guru Ram Rai Darbar

Fig.3. Sarovar in the front of Jhanda Ji Source: Author
Entrance to the Durbar is through its Western Gate (Elephant Gate) which is a specimen of Mughal and Rajasthani Style of Architecture. In its centre there is a place for the flag mast.

Elephant gate is a splendid structure 6000 mm high and 3100 mm in width. Elephant gate were big enough for elephants to easily pass through.

Walls and ceilings are profusely decorated with various paintings in bright natural colors depicting diverse mythological and historic events preserves the impressions of earlier art traditions. There are portraits of Gods, Goddesses, saints, sages and religious fables on the walls. There are pictures of flowers and leaves, animals and birds, trees, similar looking faces with pointed noses and big eyes on the arches which symbolizes the color scheme of Garhwal School of Painting.

Garhwal School, is one of the lesser known schools of Pahari-Rapot style of painting (Fig. 7). It is a unique mix of Rajput-Pahari-Bashloi and Kangra schools. The distinctive features of the Garhwal School of Painting consist of extremely beautiful and near perfect women with high arched, thin and delicate looking eyebrows and a captivating nose with a defined nose bridge resting on a supple oval face. The build of the female would usually have a tiny waist emphasized by the greatly developed bosom.

Paintings are much more of an assemblage and depict Durbar as a true testimony in diversity. So are the colors and human forms. Diversity is mind boggling in such a way that you can see a lady in classical Mughal attire, wearing a large Garhwali nose ring and other ornaments. (Fig. 8). British ladies ready to
go for the horse races, rubbing shoulders with Naga Sadhus (Fig. 8 b.)

![Fig 8(a) Lady in classical Mughal attire, wearing a large Garhwal nose ring and other ornaments.](image1)

![Fig 8(b) British ladies ready to go for the horse races, rubbing shoulders with Naga Sadhus.](image2)

On entering the main gate there is a large courtyard and to the left is a three storied building, which is used for office purpose. There is an open verandah in the right side of the courtyard and attached to it is a big hall named Museum with Guru Gaddi in it.

**B. Museum**

The portraits of all the Mahants are displayed on its walls. Religious meetings, discourses, festivals and functions are held. Museum is a two storied structure used as a sitting area by Shri Guru Ram Rai.

![Sketch 6 First Floor Plan of Museum](image3)

Floor comprises of an arcade restraining nine multi-foil arches, influenced by Islamic Architecture.

![Fig.10. Museum with nine multifoil arches](image4)

Inside the museum, ground floor exhibits paintings of all ten Mahants. On the façade frescos from tales of Hindu mythology and Sikh Guru sakhis are painted.

![Fig.11.(a), Fig.11.(b)](image5)

![Fig.11.(c), Fig.11.(d)](image6)

Fig 11 (a),(b),(c),(d) Frescos from tales of Sikh Guru Sakhis and Hindu mythology
Towards the east, there is a long verandah with Puja Room, watchman’s room, where devotees wait for the blessings of present Mahant ji. In the middle of the verandah and office building, there is a way to the Langar Sahib (community kitchen).

C. Langar Durbar Sahib

Langar Durbar Sahib at the back courtyard dwells as a place for food serving. It was earlier used by Matas as a worship place.

Towards the east, there is a passage that leads to the main building (Shrine) of the Durbar Sahib through Darshini Dwar/Gate.

MAIN DURBAR WING

A. Darshini Dwar/Gate

The main entrance of the Main Durbar wing is through an arcade consisting of seven multi foil arches in front, a characteristic of Mughal Architecture. On entering the first vestibule, there is a doorway and an arched opening on both sides which is the main gate to Durbar called Darshini Gate.

Darshini Gate comprises of ten minarets, four at corners and others in between (Sketch 10). They are utterly painted with fresco art depicting Mughal, Rajasthani and Kangra Styles.
Further entering another vestibule, one enters to the main premises. On entering the main Durbar Sahib, (shrine), the beauty of the white marble fascinates the visitors.

The Shrine stands on the raised platform and there are flower beds and trees surrounding it below on the concept of Char Bagh. Durbar Sahib is symmetric in plan built by Aurangzeb in 1675. It rests on a square base raised on a high platform lead by seven steps. The seven steps leads to a square four minarets laid on Octagonal base with Onion shaped Domes. Smaller minarets emphasize the grandeur of Dome.
platform 700 mm high measuring 2800x2800mm. The platform comprises of a chatri at each corner for Mata’s and an articulate pathway 2500 mm wide inside which is another chamber where rest the relics of the Guru.

minarets are situated, one at each corner of first level and were used to light diyas in ancient times. (Source: Mahant ji) Minarets seem to arise from Ground level and are laid on octagonal base holding onion shaped domes influenced by Sikh Architecture. The minarets of first level are smaller to emphasize the grandeur of Central Dome and minarets. Durbar is a patent conflation of variegated architecture styles which includes Hindu Architecture (The ‘Finial’ at loftiest and ‘Inverted Lotus’) Islamic Architecture (‘Treefoil’ arches and jails), Sikh Architecture (‘Dome’) and Rajasthani Architecture (Railings). Very similar to The Moti Mosque, in the Red Fort at Shahjahanabad, Delhi built by emperor Aurangzeb (1658-1707) Fig19 which again is an amalgamation of Hindu, Islamic, Sikh architecture.

C. Mata Chambers/Tombs-
Samadhí’s of all four wives of Guru are co-ordially placed on the four corners. (See Sketch 13). Mata (mother) being the wife of the Guru is treated like a queen. Near the entrance gate, to the left stands the Samadhi (Tomb/ Mata chambers) of Mata Lal Kaur and to the right is the Samadhi of Mata Raj Kaur. On the front courtyard, the Mata Punjab Kaur Samadhi is on the right side and that of Mata Maluki is to the left. There is a pond in between.

Sketch 13 Plan of Main Shrine Source: Author

Fig.17. The Moti Mosque, in the Red Fort at Shahjahanabad, Delhi by the sixth Mughal emperor Aurangzeb (1658-1707).
All the four chambers are built on an octagonal platform aided by four steps.

![Sketch 15 Typical Plan of Mata Chamber](image)

Each façade of the chamber restrains identical arches that gather details both from Roman and Islamic origin. Seven out of eight faces have mughal jalis and one bears the entrance door that displays metal (cast iron) jali.

![Sketch 16 Mughal jalis 17 Entrance door with metal jali](image)

The door of every chamber faces the main chamber paying devotion to the stature. The dome is in resemblance to that of the main complex has a circular base and rests on an octagonal platform (side 2250mm). Eight minarets are site on the same octagonal platform at each of its corner. The ‘Finial’ reflects the Hindu Architecture, Dome of Mata’s Chambers are purely Islamic with circular base and rests on Octagonal Platform. Floral design at the base of the dome exhibits the Sikh Architecture feature. Eight Minarets look like stalk of flowers, with inlaid decorations and motifs of Hindu Architecture. Frescos are made integral part of the surface of wall, eves and minarets, which throws light on its embellishment.

![Fig.20 Dome at Samadhi](image)

Queen chambers are prominent for frescos depicting images of birds, plants and figurative images, which are inspired by Mughal Architecture. Combination of Trifoil and semi-elliptical arches are deployed on each of the eight faces which is again the amalgamation of Islamic and Hindu Architecture with peculiar Mughal jal. Pilasters at the end of the arches are influenced by Mughal Period of Shahjahan.

![Fig. 21 Arches and frescos at Samadhi Source: Author](image)

**MATA’S WING**

**A. Bhai Bheelon Gate**

Bhai Bheelon gate is at some distance. Bhai Bheelon used to run the langar and serve food to the hungry.

![Fig. 22. Bhai Bheelon Gate Source: Author](image)
B. Garden

Inside this gate, is a garden (Mata’s wing) with a separate boundary wall towards the North with the step well (now covered with grill) and in the thick of trees in the left stands a pillar which is a symbol of Mata Punjab Kaur’s swing.

Slightly ahead is the place where she took her last bath. Towards to the right is the place for Guru Maharaj’s final bath and little ahead is the place of his cremation.

III. CONCLUSION AND ACKNOWLEDGEMENT

Architecture is not a static phenomenon; it is constantly evolving combination of time and space. Since history Indian architecture has shown resilience to absorb and adopt circumstantial changes and have resolution that it feels integral to Jhanda Sahib. This gurdwara overall signifies the birth of uniting all religion with freedom to person of any religion to adopt it and visit the place. Durbar Sahib is one of the primordial buildings of Dehradun making deep instinct in terms of its being, religion, socio culture and architecture. The complex is a bizarre example of amalgamation of different types of Architecture blended into one. Historic trademark has different influences for architecture in terms of invention of new techniques, historical facts and thus evolution of new architectural culture. Hence, Guru Ram Rai Durbar, is an important component of the living Heritage of the city of Dehradun calls for conservation measures in a scientific and planned manner to ensure the continuity of its high historic and religious significance.
