Rumen-protected conjugated linoleic acid supplementation to dairy cows in late pregnancy and early lactation: effects on milk composition, milk yield, blood metabolites and gene expression in liver

Tanja Sigl*,1, Gregor Schlamberger1, Hermine Kienberger2, Steffi Wiedemann1, Heinrich HD Meyer1 and Martin Kaske3

Correction
After publication of this work [1] we realised that some of the values were incorrect in Table 2 Additional file 1. We have corrected these in the updated table.

Additional material

Additional file 1 Corrected table 2.
