Supplementary Figure 1 -- Study selection flowchart.

In total, 3,708 trials were identified through query on ClinicalTrials.gov

- 19 non-interventional trials were excluded
- 67 trials were excluded because of disease type studied
- 727 trials were excluded for multiple disease type enrollment (incl. non-heme)
- 286 duplicate trials were excluded

2,609 trials remained across multiple hematologic malignancies

- 1,859 trials were excluded because no enrollment of multiple myeloma patients
- 152 trials were excluded because of multiple hematologic malignancies (incl. multiple myeloma)

598 trials remained that study multiple myeloma exclusively and are included for analysis

See Wesson W et al. Eur J Cancer 2022: Characteristics of clinical trials for haematological malignancies from 2015 to 2020: A systematic review.
