Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

In our original author list and author contributions section, we inadvertently missed 7 members of the Mount Sinai COVID-19 BioBank team, who have tirelessly worked on collecting and processing thousands of samples, several of which we used in our study. These members (along with their contributions) are Charuta Agashe (organization and management of patient specimens and training of staff), Joanna Grabowska (organization and management of patient specimens), Kai Nie (whole blood processing of immunophenotyping), Neha Karekar (organization and management of patient specimens), Jessica Le Berichel (organization of the Mount Sinai COVID-19 research effort), Hui Xie (Mount Sinai immune core biobanking), and Noam Beckmann (Mount Sinai BioBank co-creator).

In this version of the article, we have added all their names and their specific contributions. We apologize for this omission.
