Correction: A Novel Form of Progressive Retinal Atrophy in Swedish Vallhund Dogs

The PLOS ONE Staff

There is an error in the pedigree squares for the affected dogs in Figure 5. Please view the correct Figure 5 here.
Figure 5. Large Swedish vallhund pedigree. This pedigree is composed of nearly 300 dogs, including 125 animals affected with the breed-specific retinopathy. Affected dogs listed in Tables 1 and 2 are highlighted in yellow and green, respectively. Squares, males; circles, females; white symbols, unaffected; black symbols, retinopathy affected.
