Erratum to miR-211-5p inhibits the proliferation, migration, invasion, and induces apoptosis of human hypertrophic scar fibroblasts by regulating TGFβR2 expression

Erratum to: Ann Transl Med 2021;9:864

This article (1) titled “miR-211-5p inhibits the proliferation, migration, invasion, and induces apoptosis of human hypertrophic scar fibroblasts by regulating TGFβR2 expression” (doi: 10.21037/atm-21-1806), unfortunately contains an error in Figure 2. The image of the NC group in Figure 2F was inadvertently misplaced. The image of Control and NC groups in Figure 2F are duplicated. The statistical histogram of Figure 2F does not need to be modified. The calculations were performed based on the correct image, but the image was mistakenly misplaced when added to the figure. The misinformation of the NC group image in Figure 2 did not have any impact on the experimental results. The corrected Figure 2 is presented below.
Corrected Figure 2:
The authors apologize for the oversight.
