Supplementary Table S1: Table showing the general characteristics of our population. From right to left, the columns show the number of patients, the number of female and male and the mean age in year. The upper row represents the whole population included in our study where the followings rows represent the various groups of age in which the patients were pooled.

| Population characteristic | N   | Female /Male | Mean age (years) |
|---------------------------|-----|--------------|------------------|
| Total population          | 54  | 22/32        | 83               |
| 55-64 y/o                 | 4   | 3/1          | 59               |
| 65-74 y/o                 | 3   | 0/3          | 71               |
| 75-84 y/o                 | 21  | 12/9         | 81               |
| 85-94 y/o                 | 20  | 12/8         | 88               |
| 95-105 y/o                | 6   | 5/1          | 97               |
