### Supplemental Table I. Number of patients in each center

| Institution                                      | Total     |
|--------------------------------------------------|-----------|
| Ascension St. Vincent Heart Center               | 2/40 (5%) |
| Cleveland Clinic                                 | 2/40 (5%) |
| Medical University of South Carolina             | 2/40 (5%) |
| MedStar Washington Hospital Center               | 8/40 (20%)|
| Mount Sinai Hospital                             | 14/40 (35%)|
| Northwestern University                          | 2/40 (5%) |
| University of Michigan                           | 3/40 (8%) |
| University of Pennsylvania                       | 3/40 (8%) |
| University of Rochester                          | 4/40 (10%)|
**Supplemental Table II.** Comparison of demographics of COVID-19 cases vs. LVAD implants 1/1/2019 – 9/30/2020

|                  | LVAD Implants at Participating Sites 1/1/2019 – 9/30/2020 | COVID-19 Cases Through 9/30/2020 | P-value |
|------------------|-------------------------------------------------------------|-----------------------------------|---------|
| Race             |                                                             |                                   |         |
| Black            | 331 (35%)                                                   | 19 (48%)                          | 0.15    |
| White            | 548 (57%)                                                   | 21 (53%)                          |         |
| Asian            | 17 (2%)                                                     | 0 (0%)                            |         |
| Other/unknown    | 59 (6%)                                                     | 0 (0%)                            |         |
| Sex              |                                                             |                                   |         |
| Female           | 303 (32%)                                                   | 14 (65%)                          | 0.79    |
| Male             | 652 (68%)                                                   | 26 (35%)                          |         |

*Total number of implants in the first column represents the last 7 quarters of durable left ventricular assist device (LVAD) implantation at the participating sites so as to generate a representative comparison. Values shown are total N (%). COVID-19 = coronavirus disease 2019.*
