Supplementary Table 1. Correlation among T cell responses to BKV-specific antigens and peak level of BKV viral loads (n = 40)

| Spearman’s correlation | T cell response measured using ELISPOT |
|------------------------|----------------------------------------|
|                        | Large T | Small t | VP1 | VP2 | VP3 |
| Peak plasma BKV-DNA PCR (log) |          |          |     |     |     |
| Rho                    | −0.228  | −0.070  | −0.180| −0.168| 0.003 |
| p value                | 0.156   | 0.672   | 0.308 | 0.308 | 0.985 |

BKV, BK virus; ELISPOT, enzyme-linked immunospot; PCR, polymerase chain reaction.
