Forthcoming Articles

Circular RNAs in the brain: A possible role in memory?  
Esmi Zajaczkowski & Timothy Bredy

Complex inclusion bodies and defective proteome hubs in neurodegenerative disease: New clues, new challenges  
Amit Mishra, Arun Upadhyay, Naveen Sundaria, Rohan Dhiman, Vijay Prajapati, & Amit Prasad

Neuroscience—The new English major?  
Harald Sontheimer & Kristin Phillips

Non-motor symptoms of Parkinson’s disease: The neurobiology of early psychiatric and cognitive dysfunction  
George Huntley, Ayan Hussein, Christopher Guevara, Pamela Del Valle, Swati Gupta, & Deanna Benson

Unravelling pathophysiology of neurological and psychiatric complications of COVID-19 using brain organoids  
Jing-Han Ng, Alfred Sun, Shawn Je, & Eng King Tan

Alzheimer’s disease: Innovative therapeutic approaches based on peptides and nanoparticles  
Isabela Mota, Larissa de Lima, Bruna Santana, Giovanna Gobbo, João Victor Vicca, Juliana Azevedo, Leticia Veras, Rodrigo Taveira, Gabriela Pinheiro, & Márcia Mortari

The pioneer neuropharmacologist Alfred Fröhlich (1871–1953) and the origins of neuroendocrinology: A sesquicentennial remembrance  
Lazaros Triarhou

Alzheimer’s disease genetics: A dampened microglial response?  
Elizabeth Bradshaw & Zena Chatila

Pliny the elder: Lessons from the naturalist as an early neuroscientist  
Duong Chu, Mattia Rosso, & Jonathan Santoro

Topography of the anxious self (TAS)—Abnormal rest-task modulation in social anxiety disorder  
Lorenzo Lucherini Angeletti, Andrea Scalabrin, Valdo Ricca, & Georg Northoff

Cell type–specific nuclei markers: The need for human brain research to go nuclear  
Thomas In-Hyeup Park, James Wiseman, & Mike Dragnunow

Visual plasticity in adulthood: Perspectives from Hebbian and homeostatic plasticity  
Ji Won Bang, Giles, Fletcher-Hamilton, & Kevin Chan

Biobanking for neurodegenerative diseases: Challenge for translational research and data privacy  
Giulia Sancesario, Emilia Giannella, Valentino Notarangelo, & Caterina Motta

Microglial TREM2 at the intersection of brain aging and Alzheimer’s disease  
Ling Li & Wenhui Qu

Brain circuits underlying narcolepsy  
Sara Pintwala & John Peever

Insights into enhancer RNAs: Biogenesis and emerging role in brain diseases  
Linbo Gao, Yuxin Shen, Zhengyi Huang, Ruijing Yang, Yunlong Chen, & Qiang Wang

Brain mechanisms of conscious awareness: Detect, pulse, switch, and wave  
Hal Blumenfeld

Brain circuits underlying narcolepsy  
John Peever & Sara Pintwala

Bioelectromagnetism in human brain research: New applications, new questions  
Joachim Gross, Markus Junghoefer, & Carsten Wolters

Targeted optical neural stimulation: A new era for personalized medicine  
An Ping, Li Pan, Jianmin Zhang, Kedi Xu, Kenneth Schriver, Junming Zhu, & Anna Roe

Gaetano Perusini: The forgotten neuroscientist behind “Alzheimer’s” Disease  
Francesco Pellegrini, Matte Rosso, & Duong Chu

Influencing human behavior with non-invasive brain stimulation: Direct human brain manipulation revisited  
Shirley Fecteau

Prefrontal cortical control of anxiety: Recent advances  
Yousheng Shu, Nancy Mack, Suixin Deng, Shasha Yang, & Wen-Jun Gao

Glutaminolysis and the control of neural progenitors in neocortical development and evolution  
Takashi Namba & Vasiliki Gkini

Information exchange between cortical areas: The visual system as a model  
Hang Zeng, Siyi Chen, Gereon Fink, & Ralph Weidner

Recent insights on glutamatergic dysfunction in Alzheimer’s disease and therapeutic implications  
Priyanaka Pinky, Jeremiah Pfitzer, Jared Senfeld, Hao Hong, Subhrajit Bhattacharya, Vishnu Suppimaramian, Irfan Qureshi, & Miranda Reed

Do endocannabinoids cause the runner’s high? Evidence and open questions  
Johannes Fuss, Michael Siebers, & Sarah Biedermann
Neuronal circuits associated with fear memory: Potential therapeutic targets for post-traumatic stress disorder
Juan Zhao, Yan Yan, Aierken Aliikemu, Chunjian Want, Wei Jin, Zhenzhen Quan, Zhe Wang, Hong Qing, & Junjun Ni

The dual nature of microglia in Alzheimer’s disease: A microglia-neuron crosstalk perspective
Junjun Ni, Zhen Xie, Jie Meng, Zhou, Wu, Hiroshi Nakanishi, Yoshinori Hayashi, Wei Kong, Fei Lan, Narengaowa Fnu, Qinghu Yang, & Hong Qing

Hidden brain anatomy in Peter Paul Ruben’s copy of “The Battle of Anghiari” by Leonardo da Vinci
Grigol Keshelava

The enigma of working memory: Changing views
Douglas Fields

Influencers in the somatosensory system: Extrinsic control of sensory neuron phenotypes
Joriene de Nooij

Neurobehavioral and clinical comorbidities in epilepsy: The role of white matter network disruption
Alena Stasenko, Christine Lin, Leonardo Bonilha, Boris Bernhardt, & Carrie McDonald

Ongoing brain activity and its role in cognition—Dual vs. baseline models
Georg Northoff, Deniz Vatansever, Andrea Scalabrini, & Emmanuel Stamatakis

Sculpting astrocyte diversity through circuits and transcription
Bengamin Deneen, Yi-Ting Cheng, & Junsung Woo

Long non-coding RNAs in CNS myelination and disease
Richard Q. Lu, Jing Zhang, Menglong Guan, Xianyao Zhou, Kalen Berry, & Xuelian He

Memory: Synaptic or cellular, that is the question
Yuri Arshavsky

José Manuel Rodríguez Delgado, Walter Freeman, and psychosurgery: A study in contrasts
Joseph Fins & John Vernaglia

Targeted molecular strategies for genetic neurodevelopmental disorders: Emerging lessons from Dravet Syndrome
Ingo Borggrefe, Robert Lersch, Rawan Jannadi, Leonie Gross, Matias Wagner, Marius Schneider, Celina Stenbels von Stülpnagel, Florian Heinen, & Heidrun Potschka

Mechanosensitive ion channels, axon growth, and regeneration
Yuanquan Song, Leann Miles, Jackson Powell, & Casey Kozak

DNA damage and repair in migraine—Oxidative stress and beyond
Janusz Blasiak, Michal Fila, Aleksandra Jablkowska, & Elzbieta Pawlowska

The “Michelangelo Code”: The quest for universal truth
Luis Savastano, Robert Morreale, Philip Eliasoph, Teo Forcht-Dagi, & Daniel Nijensohn

How can digital mental health enhance psychiatry?
Emile Stern, Jean Arthur Micoulaud Franchi, Guillaume Dumas, Jeverson Moreira, Stephane Mouchabac, Julia Maruani, Pierre Philip, Michel Lejoyeux, & Pierre Alexis Geoffroy

Ferroptosis in neurological disease
Samuel David, Fari Ryan, Pria Jhelum, & Antje Kroner

The cerebral cortex and the songs of Homer: When neuroscience meets history and literature
Enrico Crivellato, Paola Saccheri, & Luciana Traven

Startle disease: New molecular insights into an old neurological disorder
Carmen Villmann, Natascha Schaefer, & Robert Harvey

Perineuronal nets: Subtle structures with large implications
Juan Nacher, Hector Carceller, Yaiza Gramuntell, & Patrycja Klimczak

Other-than-NLRP3 inflammasomes: Multiple roles in brain disease
Anna Chiariini, Ubaldio Armato, Li Gui, & Ilaria Dal Prà

Fear learning: An evolving picture for plasticity at synaptic afferents to the amygdala
Ralf Schneggenburger, Shriya Palchaudhuri, & Denys Osypenko

Stem cell therapy for repair of the injured brain: Five principles
Ruslan Rust & Christian Tackenberg

Diverging from the norm: Re-evaluating what miniature excitatory postsynaptic currents (mEPSCs) tell us about synaptic plasticity
Kathrin Engisch, Andrew Koesters, & Mark Rich

The associative thalamus: A switchboard for cortical operations and a promising target for schizophrenia
Michael Halassa & Arghya Mukherjee

Pain and reorganization after amputation: Is interoceptive prediction a key?
Thomas Weiss, Hanna Koehler, & Ilona Croy

Non-invasive brain stimulation: Multiple effects on cognition
Gesa Hartwigsen & Juha Silvanto
The cerebellum as an embodying machine
Laura Petrosini, Elenora Picerni, Andrea Termine, Carlo Fabrizio, Daniela Laricchiuta, & Debora Cutuli

Cyclin F, neurodegeneration, and the pathogenesis of ALS/FTD
Stephanie Rayner, Alison Hogan, Jennilee Davidson, Flora Cheng, Luan Luu, Marco Morsch, Ian Blair, Roger Chung, & Albert Lee

Intrinsic plasticity mechanisms of repetitive transcranial magnetic stimulation
Emily King & Alexander Tang

Gap junctions in the brain: Hardwired but functionally versatile
Rafael Gutierrez

VEGF and neuronal survival
Angel Pastor, Paula Calvo, Rosendo Hernández, & Rosa de la Cruz

Sensory loss and risk of dementia
Meher Lad, William Sedley, & Timothy Griffiths

Adenosine and astrocytes control critical periods of neural plasticity
Antonio Rodriguez Moreno & Irene Martínez-Gallego

The prediction of brain activity from connectivity: Advances and applications
Ido Tavor & Michal Bernstein-Eliav
