Erratum to: Stop spoon dosing: milliliter instructions reduce inclination to spoon dosing

Koert van Ittersum1* and Brian Wansink2

Erratum to: BMC Res Notes (2016) 9:33
DOI 10.1186/s13104-015-1809-1
Unfortunately, the original version of this article [1] contained an error. The following sentence was incorrectly included in the Methods section, “All participants completed a consent form to participate in this research.”

The third paragraph in the Methods section should have read, “The last sentence of the consent form read “By answering the survey questions you have agreed to be a participant in this study.” To determine if teaspoon units in dose recommendations bias patient choice of measuring device for dispensing over-the-counter medicine, 194 university students (118 male; mean age, 20.6 years [SD, 1.5]) participated in a for-credit, between-subject design study.”
