### Data Sharing Statement

| Item | Question                                                                 | Authors’ Response (place “-” if not applicable) |
|------|---------------------------------------------------------------------------|-------------------------------------------------|
| 1    | Would you like to share data collected for your study to others?         | Yes                                             |
| 2    | If not, would you like to share the reason for your decision?            |                                                 |
| 3    | What data in particular will be shared?                                   | CEUS parameters data in particular will be shared, and we also found microvascular perfusion of the renal parenchyma in the diabetic nephropathy was slower than that in the control group, but clearance was faster. |
| 4    | Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code. | Statistical analysis plan, ethical review permissions, and study report will also be shared if requested. |
| 5    | When will data availability begin?                                        | From the publication date.                      |
| 6    | When will data availability end?                                          | Two years within the publication date, since the technique may be updated over time. |
| 7    | To whom will you share the data?                                         | Radiologists who are interested in studies of diabetic nephropathy. |
| 8    | For what type of analysis or purpose?                                     | For analysis to evaluate the efficacy of CEUS in diagnosis of diabetic nephropathy. |
| 9    | How or where can the data/documents be obtained?                         | Emails could be sent to the address below to obtain the shared data: wanghonggjm@163.com. |
| 10   | Any other restrictions?                                                   | We may balance the potential benefits and risks for each request and then provide the data that could be shared. |
