Supplemental Table 2: Granulocyte numbers as a function of infant birth weight and gestational age at birth.

| Total granulocyte counts x 10^3/μL (median, interquartile range) | Birth weight | Gestational age |  |
|---------------------------------------------------------------|--------------|-----------------|---|
| | **NBW (≥2500 g)** (n=205) | **LBW (≤2500 g)** (n=19) | **TB (≥37 weeks)** (n=205) | **PTB (<37 weeks)** (n=19) | **P** |
| **Peripheral** | 9.30, 7.15-12.4 | 9.90, 6.20-17.0 | 9.40, 7.10-12.8 | 9.20, 6.10-13.1 | 0.7894 |
| **Placental** | 7.80, 5.70-10.6 | 8.20, 5.40-13.9 | 7.80, 5.70-10.6 | 8.20, 5.40-11.7 | 0.5243 |

NBW = normal birth weight, LBW = low birth weight, TB = term birth, PTB = preterm birth
