Supplemental Table 3. Change from baseline visual acuity in patients receiving RRD repair separated by age group.

| Age group (years) | n  | Mean (logMAR) | SD (logMAR) | Lines of improvement |
|-------------------|----|---------------|-------------|----------------------|
| 18-29*            | 23 | -0.15         | 0.54        | 1.5                  |
| 30-39             | 25 | -0.36         | 0.85        | 3.6                  |
| 40-50*            | 38 | -0.67         | 0.75        | 6.7                  |
