The immensity of the corpus and diversity of genres of Classical New Persian in Judeo-Persian garb is remarkable, comprising a wide-ranging multitude of genres from translations of the Tanakh and rabbinic works to chronicles, lexicographies, religious poetry, translations of medieval Hebrew poems, and a large corpus of non-Jewish Classical Persian literature transcribed in Hebrew script. Yet, Judeo-Persian literary corpora remain incompletely catalogued as well as unsatisfactorily studied. While detailed studies of the genres of Judeo-Persian literature-in-transcription, as well as comparisons with literature in the common Perso-Arabic script, are still desiderata, this article aims to undertake a preliminary survey of the extant Judeo-Persian versions of the Divān of Šams od-Dīn Moḥammad Ḥāfeẓ of Shiraz (d. 792/1390) and address some contextual aspects of its popularity among Iranian Jewry.

Keywords: Judeo-Persian Literature; Ḥāfeẓ; Judeo-Persian Manuscripts; Iranian Jewry, Ṣufism

The immensity of the corpus and diversity of genres of Classical New Persian in Judeo-Persian garb is remarkable. Persian-speaking Jews have contributed extensively to Persianate

*This paper is dedicated to Professor François de Blois, whose sharp eye for detail and his vast knowledge of, contributions to, and interest in Classical Persian literature, and most specifically its non-mainstream genres, have been always a source of inspiration for me. I would also like to express my sincere thanks to my colleagues and friends Arash Zeini (Berlin), Adam Benkato (Berkeley), Necati Alkan (Freiburg), Burzine Waghmar (London), Stephan Popp (Vienna), Martin Joachim Kümmel (Tübingen), Thamar E. Gindin (Haifa), Julia Rubanovich (Jerusalem) as well as Vera B. Moreen for their kind help and comments.

literary production, both religious Jewish literatures, comprising a wide-ranging diversity of
genres from translations of the Tanakh and rabbinic works to chronicles, lexicographies, reli-
gious poetry including translations of medieval Hebrew poems, as well as the large corpus of
non-Jewish Classical Persian literature transcribed in Hebrew script. Jews started to write
New Persian from its early periods. In fact, the earliest attestations of Early Judeo-Persian
(8th to 12th century) are at the same time the oldest known literary monuments of New
Persian.2 The literary contribution of Persian-speaking Jews to Persian literature thus
began already with the advent of New Persian literature in general. Nevertheless, the
belles lettres genre of the non-Jewish Judeo-Persian Garšuni literary tradition is attested a
bit later, specifically from the period of Classical Judeo-Persian (14th to 17th centuries)
continuing up to the beginning of the period of Modern Judeo-Persian (19th to 21st cen-
turies). Classical Persian poetry was a particularly fascinating and intriguing genre for
Jewish audiences, which is evident in the extant Judeo-Persian manuscripts. Neither
the special contents of these literary corpora are satisfactory exploited, nor are the collec-
tions entirely catalogued.3 Detailed studies of this literature-in-transcription, as well as a
comparison with literature in the common Perso-Arabic script are still a desideratum.4
This article aims to undertake a preliminary survey of the extant Judeo-Persian versions
of the Divān (‘Collected Poems’) of the celebrated Persian lyric poet Šams od-Dīn Moḩammad Hāfez of Shiraz (ca. 715/1315–792/1390) and address some contextual
aspects of its popularity among Iranian Jewry.

The Judeo-Persian Garšuni Literary Tradition

Jewish communities all over the world used to write a variety of languages other than Clas-
sical Hebrew in Hebrew script. This allographic tradition, which by no means is restricted to
the Jewish communities, is known as ‘Garšuniography’, denoting the writing of one lan-
guage in the script of another.5 The diaspora Jewish communities of the ancient and pre-
Modern eras, more specifically the educated members thereof, were mostly bilingual and
broadly well-appointed to manage the multilingual and multicultural contexts in which
the communities lived. These languages are conventionally named by means of the prefix
‘Judeo-’, for example the well-known Judeo-German (i.e. Yiddish) or Judeo-Spanish

2Cf. fn. 17.
3There are about 1162 catalogued Judeo-Persian manuscripts in international libraries and collections. There
exists no information regarding private collections worldwide, especially those in Iran, the US, and Israel. Two
comprehensive catalogues of the two main collections of the Judeo-Persian manuscripts are so far available; cf.
Amnon Netzer, [Manuscripts of the Jews of Persia in the Ben-Zvi Institute] (Jeru-
salem, 1985); Vera B. Moreen, (ed.), Catalogue of Judeo-Persian manuscripts in the Library of the Jewish Theological Sem-
inary of America (Leiden, 2015), especially pp. 5–6.
4There have been a few ‘experimental’ though largely ignored approaches to such comparison, cf. Jes Peter
Asmussen, ‘Classical New Persian Literature In Jewish-Persian Versions’, Studies in Bibliography and Booklore 8 (1968),
pp. 44–53.
5On gāršuūn, a term primarily applied to the practice of using Syriac script for other languages, prominently for
Arabic texts, it usages, scopes and terminology cf. George Kiraz, ‘Garšunography: Terminology and Some Formal
Properties of Writing One Language in the Script of Another’, in Scripts Beyond Borders: A Survey of Allographic Tra-
ditions in the Euro-Mediterranean World, (ed.) Johannes den Heijer, Andrea B. Schmidt, and Tamara Pataridze (Lou-
vain, 2014), pp. 65–73.
(i.e. Ladino), Judeo–Arabic, Judeo–Hindi/Urdu, Judeo–Georgian, Judeo–Persian, and so forth. These ‘Jewish varieties of languages’ profuse with *aramaisms* and *hebraisms*, namely a syncretism of Judeo–Aramaic and Hebrew with the languages of the local non-Jewish population. The shared common feature of writing a local language in Hebrew script was definitely a favoured and widespread way of both internal communication and manuscript production. The prominent role of the Hebrew Bible and the rest of the sacred tradition transmitted in Hebrew script, not only for Jewish worship but furthermore as a religious identification marker, bestowed a special place to the utilization of the Hebrew script beyond religious contexts. Hebrew was maintained almost exclusively for liturgical purposes while the active usage of a natural spoken Hebrew gradually faded among most diaspora Jewish communities around the world, including Iranian Jewish communities, until its revivalisation as everyday language in the late 19th and early 20th centuries. Like other diaspora communities, Iranian Jews continued to learn and study biblical and Mishnaic Hebrew for religious purposes, but wrote numerous variations of Persian and other local languages and dialects in Hebrew script. It was only beginning in the early 20th century, when Iranian

Ludwig Paul (Wiesbaden, 2003), pp. 243–274.
Jews were becoming fully integrated into an Iranian middle class, that the use of Judeo-Persian has been gradually marginalized, above all under the homogenising pressure of modern school programmes using only the conventional Perso-Arabic script.  

A typological survey of Judeo-Persian Garšūnography: Hebrew as the Target Script

As Jewish presence in Iranian lands dates back to the eighth century BCE, evidence of language contact between Iranian Jews and the members of other diaspora communities is not surprising. The Hebrew scroll of Esther, as well as other Aramaic fragments found in Qumran (e.g. 4Q Tales of the Persian Court, the so-called proto–Esther), indicate that a considerable amount of Persian already existed in the language of Iranian Jews as early as the Achaemenid period (549–330 BCE).  

Utilization of Aramaic scripts for Iranian languages is attested from the 5th century BCE, when Imperial Aramaic gained the status of chancery language of the Achaemenid Empire. As a result, the Aramaic alphabet was adopted in many regions for writing local languages. Material evidence however is only attested from the Parthian period (ca. 210 BCE – 224 CE) onwards. The allographic usage of Hebrew script for Persian, and to be more accurate for Judeo-Persian, is attested in the early periods of emergence of Early New Persian in the early Islamic periods. It is a remarkable coin-script for Persian, and to be more accurate for Judeo-Persian, is attested in the early periods of emergence of Early New Persian in the early Islamic periods. It is a remarkable coincidence that the oldest written evidence of New Persian language is at the same time the earliest evidence of Judeo-Persian, in manuscripts and inscriptions containing texts of different genres, as well as memorial and tomb inscriptions, legal documents, biblical translations and commentaries, private and commercial letters, commercial notes, poetry, and historiographies from the eighth century onwards. These texts originate from numerous Jewish centres in the Persianate world, from present day Iran and Afghanistan, to Central Asia and the Caucasus, and beyond up to Egypt, India, and China.  

The major bodies of Judeo-Persian corpora from the medieval up to the pre-modern periods can chronologically divided into three phases. The first period is between 11th and 15th centuries. For an overview of the genres and major works cf. Netzer, op. cit.  

For an overview of the archaic and major works see S. Farridnejad, ‘Judeo-Iranian Languages’, p. 240.  
Cf. Shaul Shaked, ‘Qumran: Some Iranian Connections’, in Solving Riddles and Untying Knots: Biblical, Epigraphic, and Semitic Studies in Honour of Jonas C. Greenfield, (ed.) Ziony Zevit, Seymour Gitt, and Michael Sokoloff (Winona Lake, 1995), pp. 277–281.  
All Iranian languages are written in various scripts directly or indirectly derived from Aramaic script, the only exceptions being Old Persian written in the Old Persian cuneiform script; for a good overview cf. Prods O. Skjærvø, ‘Aramaic Scripts for Iranian Languages’, in The World’s Writing Systems, (ed.) Peter T. Daniels and William Bright (New York, 1996), pp. 515–535.  
The Early Judeo-Persian texts are from three general categories: inscriptions, legal documents and letters as well as ta’amim and halakhahs. Among the earliest attestations are the three short rock inscriptions of Tang-e Aza (TA/ Tα), of today Afghanistan, dated 1064 BCE / 752–53 CE), the two so-called Dandān Ulliq letters (DU 1–2) of Khotan, dated to 8th and 9th centuries, and the Ahwaz Law Report (L14/Lz) of Khuzestān dated 1526/21 CE as well as the two ta’amim to Ezekiel (T6/ Ez 2 and T7/Ez 1), dated ca. 11th century. For an overview and a complete list of published Early Judeo-Persian texts cf. Habib Borjian, ‘Judeo-Iranian Languages’, in Handbook of Jewish Languages, (ed.) Lily Kahn and Aaron D. Rubin, Brill’s Handbooks in Linguistics 2 (Leiden, 2015), 239–242; Thamar E. Gindin, ‘Judeo-Persian Literature. 1. Early Period’, in Encyclopedia of Jews in the Islamic World, (ed.) Norman A. Stillman and Phillip Isaac Ackerman-Lieberman, vol. 3, 5 vols (Leiden, 2010).  
For an overview of the genres and major works see Dalia Yasharpour, The Haggadah of the Kaifeng Jews of China (Leiden, 2011).
centuries, during which Khuzestān, Fārs, and specifically Bukhara flourished as centres of Jewish theological studies, especially of the Tanakh. The end of this period coincided with the blossoming of Judeo-Persian poetry in Shiraz and central Iran, which lasted from the 14th to the 18th century. Subsequently Bukhara again became the flourishing core of Judeo-Persian literature around the 17th century, following the migration of many Jews from the borderlines the Ṣafavīds and Ḡāzān Khān borders, until the 19th century.20

The Turco-Mongol invasion of Iran and the domination of Ilkhanīd Mongols over the Middle East during the 13th and 14th centuries ce, dramatically changed the situation of many Iranian religious minorities.21 For example, the invasions meant an end for the existence of many Zoroastrian communities, especially in North and North-Western Iran.22 Despite the early religious tolerance and the alleviation of sanctions towards the Iranian Nestorian Christians, already all voices and traces of Iranian Christians terminate soon after the conversion of the seventh Ilkhanīd, Ġāzān Khān (1271–1304 ce) to Islam in 1295, and the majority of the dioceses in Iran vanished after the 14th century. The Mongol Ilkhanīs re-introduced a heavy head tax for the Jews, Christians and Zoroastrians after their accession to power, which economically destroyed the surviving minority communities,23 besides inducing the destruction of Jewish, Christian, Buddhist and Zoroastrian temples throughout the empire.24 Jews and Christians continued to be treated dīmūns “protected people”. But in contrast to Zoroastrians, who followed a policy of self-isolation and marginalisation to remain as inauspicious as possible, Iranian Jews did not disappear from the administration of the Mongol state and continued to be present at the Ilkhāns’ courts and regularly took part in the intellectual, cultural, social, and political life of the Muslim majority.25

The difficult financial and social conditions in the 13th century did not prevent the Jews from maintaining literary production. The corpus of Judeo-Persian literature from the period after the Mongol conquest of Iran is impressive, though barely studied. This is the time that

Anne Sofie Roald and Anh Nga Longva, (Leiden, 2012), pp. 175–177. The participation of a good number of prominent Jews and Christians in leading and powerful positions within the Mongol’s administration is known, among others Raṣīl al-Dīn Fazullāh Hamedānī (1247–1318), the prominent official and historian, who was a converted Jew and vizier to Māhmūd Ġāzān and his successor Ōljeitū. 
Classical Persian Poetry occupies an important place within Judeo-Persian literary production. The epic-style poetry especially flourished among the Jews and a number of famous Judeo-Persian poets, such as Šāhīn (14th century), 'Imrānī (1454–after 1536), Bībāī b. Lutf, Bābāī b. Farhād, and Bīnyāmīn ben Miṣʿel (Aminā) translated and versified largely Hebrew Tanakh and Midrāṣim, as well as numerous philosophical and theological treatises and books. Just to mention one, the famous Pentateuch versification of Maulānā Šāhīn-e Šīrāzī, known as tafsīr-e šāhīn 'al ha-tūnā is one of the earliest masterpieces of this genre.

Classical New Persian Literature in Jewish-Persian Versions

The corpus of Judeo-Persian literature composed in the aftermath of the Mongol invasions of Iran in the 13th century is conventionally called ‘Classical Judeo-Persian’, which is in line with mainstream Classical Persian Literature, albeit in Hebrew script. Similar to the leading role of Classical Persian poetry in the medieval and pre-Modern Iranian literary tradition, the stature and significance of poietical genres, both epic and lyric is omnipresent within Classical Judeo-Persian literature. This is evident not only in the versified translations of the Tanakh, Midrāṣim, and other religious works, but also in poetic historical narratives and most notably in the Judeo-Persian rendering of non-Jewish classical Persian masterpieces. There are a considerable number of Judeo-Persian manuscripts, mostly neither studied nor edited, which comprise collections of Persian poetry that is not specifically ‘Jewish’. A quick overview on these collections shows a wide variety of original compositions by Iranian Jews as well as partial and complete Hebrew-script transcriptions of major works of Classical Persian poetry. These corpora of individual classical Persian poems transposed by ‘transcriptions’ into Judeo-Persian have almost never been studied. Vera B. Moreen has recently introduced a Judeo-Persian manuscript of Ġalāl ad-Dīn Rūmī’s Magnātī-ye maʿnātī, which remains a unicum pending the systematic cataloguing of the large collection of Judeo-Persian manuscripts at the National Library of Israel, Jerusalem. The corpora of Judeo-Persian transcriptions of mainstream Classical Persian poetry comprise a wide range of literary canonical works, mostly dated from the 16th century onwards. Beside genuine Judeo-Persian mystical compositions, there are a moderately large number of transcriptions of popular Persian mystical epic romances. Among others, popular works are the narrative epic romance of Ḥosro-āv Šīrīn by Neẓāmī Ganğāvī (1141–1209) and Yūsuf-o Zoleyhā of the Šūfī poet Ġāmī (1414–1492). Very popular were also the Dīvān of Ḥāfīz, Saʿdī’s Golestan “Rose Garden”, the Dīvān of Saʿeb of Tabriz (ca. 1592–1676), the Dīvān of Šāh Neʿmatollāh Valī (d. 1431), founder of the Neʿmat-ollāhī Šūfī order), and poems ascribed to ‘Aṭṭār. Moreover, the Judeo-Persian collections contain a good number of poems composed by unknown or less celebrated poets of Jewish or non-Jewish origin. There are also a number of poems ascribed to Ḥāfīz, ‘Aṭṭār, and other celebrated poets which do not appear in the standard editions of their collected works.

26 Vera B. Moreen, ‘Reflections on a Judaco-Persian Manuscript of Rūmī’s Mathnawī’, in Ino-Judaica VII: Studies Relating to Jewish Contacts with Persian Culture throughout the Ages, (ed.) Julia Rubanovich and Geoffrey Herman, vol. 7 (Jerusalem, 2019), pp. 579–595.
27 Jes Peter Asmussen, Studies in Judeo-Persian Literature (Leiden, 1973), pp. 67–109.
28 Asmussen, ‘Classical New Persian Literature In Jewish-Persian Versions’; Moreen, ‘Reflections on a Judaco-Persian Manuscript of Rūmī’s Mathnawī’, pp. 580–581.
This list reveals, besides the works which were of interest to the Jewish community as well as those which seem to be missing, that for the mainly urban Jewish community, access to certain major literary works of the non-Jewish Classical Persian poetry was part of their intellectual participations to the daily Iranian Muslim life. This is also certified by various historical accounts about the community. Jewish poets such as Șāhīn, Ḥimrānī, Bābāi ben Luṭf, and Bābāi ben Farhād, but also many others, were clearly literary agents of the Classical Persian poetical tradition and successfully tried their talent as Persian poets. So, it is actually not surprising that not only for them, but also for a good number of the Iranian Jewry who were familiar with the classical literature and poetry, the classical Persian poems were an important part of their intellectual affairs.

**Jewish Şūfis and the Mystic Classical Persian Poetry**

Şūfism exerted a significant influence on Islamicate societies and most specifically from the 9th century onwards centres of Islamic mysticism (jānqāh) gained currency all over the Iranian world. Variations of mystical views of the universe, life and truth became predominant and influenced Iranian philosophies and worldviews, which resulted a sort of preponderance of Şūf expressions and terminology within Classical Persian literature. Already in the 13th century, the famous philosopher and mystic Abraham (Abū ʾl-Munā ʿIbrahīm) ben Moses ben Maymon (1186–1237), son of the great Jewish legal authority and philosopher Moses Maimonides (1137–1204), tried, albeit unsuccessfully, to establish his own Jewish Şūf ṭarīqa. Works of other Spanish Jewish philosophers and mystics, such as the Bahya (Abū ʾIṣḥāq) ibn Paquīda’s (1050–1165) Judeo-Arabic Kitāb al-Hīdāya ilā Faʿāʾīḍ al-Qulāb “Guide to the Duties of the Heart” (usually dated 1081) played a direct role in the construction of Iranian Jewish mystical philosophy (see below).29 He was a great admirer of Islamic Şūfism and introduced a series of innovations inspired by the Muslim tradition.30 As already mentioned, at least one copy of the Judeo-Persian ḫūn of Ṣāḥ Neʾmatollāh Vaʿāi survives, which suggests a remarkable grade of fascination for the Neʾmat-ollāḥi order. The Neʾmat-ollāḥi Şūf order (founded towards the end of the 14th century) enjoyed great popularity among other Iranian Şūf orders and beyond. There is not much evidence to link Iranian Jewish Şūfis directly with the Neʾmat-ollāḥi order, beside this manuscript. However, there is another hint which might support such connections even if indirectly, which I will discuss below with manuscript HEB. 28°5088. Both the Neʾmat-ollāḥi as well as Sohnavaṛīya (founded by ʿ Seyh ʾṢahāboddīn Soharvardī, d.1234) Şūf orders were widespread in India as well and show interesting connections to Iranian Jewish Şūfism. Nevertheless, even if the Iranian Jewry never fully implemented Iranian Muslim Şūfism, however, certain aspects of Islamic mysticism which were in accordance with Jewish mysticism, and particularly Islamic mystic terminology, were quickly adopted in both intellectual and literary levels. Not to forget is that the sporadic participation of Iranian Jews in Şūfism was also part of the cultural complex of the acculturation of Iranian Jewry in the medieval and premodern periods.

29On Ibn Paquīda life and works cf. Joaquín Lomba, ‘Ibn Paquīda, Bahya (Abū ʾIṣḥāq) Ben Joseph’, in Encyclopedia of Jews in the Islamic World, (ed.) Norman A. Stillman and Phillip I. Ackerman-Lieberman, vol. 3, 5 vols (Leiden, 2010).
30Shlomo Dov Goitein, ‘Abraham Maimonides and his Pietist Circle’, in Jewish Medieval and Renaissance Studies, (ed.) Alexander Altmann (Cambridge, 1967), pp. 145–167.
Among others, a learned merchant Jew from Mashhad, Mollā Yeheţqel (Hizqil/Ezekiel, also known as Nāmārī), who was also a teacher of Torah and Talmud, is known to have had a Judeo-Persian copy of ʿAlāʾ al-Dīn Rūmī’s Maṣnaʿār, from which he taught his favoured students, alongside the regular Jewish religious literature.31 The account goes back to the period eight years prior to the violent revolt and forced conversions of Mashhadī Jews in 1839, known as allāhādād.32 This stands to reason that the popular attractiveness of the Maṣnaʿār based on its numerous of Şūfī stories made it as a useful didactic reading. The popularity of Şūfī poetry, literature, and concepts can be more elaborated when we trace Şūfī-Jewish relations back. Şūfī motifs as a literary topos is closely connected to the Classical Persian literature. Şūfī terminology and concepts have affected the literary language insofar that a separation between ‘genuine’ Şūfī and non-Şūfī thoughts seems to be almost impossible. These can be easily traced in the vocabulary of the almost all known Judeo-Persian poets. But the attraction of Şūfism within the Iranian Jewish elite learned community, goes beyond simple literary topos. The interaction between intellectual Iranian Jewry and Şūfism has a deeper intellectual background.33 Specially the Mashhad was already turned to a centre of attraction of Şūfī between

32The incident of March 27, 1839 (22 Nisan 5599/11 Muharram 1255) is described by Joseph Wolff in his travelogue in the year 1843–1845; cf. Joseph Wolff, Narrative of a Mission to Bokhara, in the Years 1843–1845, to Ascertain the Fate of Colonel Stoddart and Captain Conolly (London, 1845), II, p. 172. On allāhādād and the converted Jews of Mashhad cf. Raphael Patai, Jahān Al-Islām: The Jewish ‘New Muslims’ of Meshed (Detroit, 1997), pp. 51–64.

33Vera B. Moreen, ‘Mysticism/Sufism (Iran)’, in Encyclopedia of Jews in the Islamic World, vol. 3.

34The account of the rise to power of Tāḥmaqeqī Khān (the future Nāder Shāh) is attested in the second verified Judeo-Persian chronicle Kitāb-i Sar-Gazāshī-i Kāshān dar bāb-i ‘Ibīt va Goyīmi-yī Shīr (The Book of Events in Kashmir Concerning the Jews: Their Second Conversion), written by Bābāʾī ben Farhād, the grandson of Bahāʾuʾī ben Loʾfī. For the text and translation cf. Vera B. Moreen, Iranian Jewry during the Afghan Invasion: The Kitāb-i Sar-Gazāshī-i Kāshān of Bahāʾuʾī ben Farhād (Stuttgart, 1990).

35For his life and works cf. Amnon Netzer, Montaḥal-e al-ʿārē fārī az az-dīr-e yuṭān-dīr-e Tāhā, gerd ʿudd-e tāḥmāq-e tāḥmāq-e tāḥmāq [An anthology of Persian poetry of the Jews of Iran] (Teheran, 1352), pp. 51–52, 365; David Yeroushalmy, ‘Melammed, Siman Tov’, in Encyclopedia of Jews in the Islamic World, vol. 3; Vera B. Moreen, (ed.), In Queen Esther’s Garden: An Anthology of Judeo-Persian Literature (New Haven, 2000), pp. 260–262.

36First published already one century later; cf. Simān-Tov Melammed, Ḥaṭṭāt al-nilh [The Life of the Soul] (Jerusalem, 1898). Some only sections have been translated, cf. Netzer, Montaḥal-e al-ʿārē fārī, p. 365–368; Moreen, In Queen Esther’s Garden, pp. 260–265. See also Amnon Netzer, ‘Mesh melammed, mas-i-jevīn posī zahāt-e real’ [The Iranian-Afghan Scholar Simon-Tov Melammed and His Book Ḥaṭṭāt al-nilh], Peʾamin 79 (1999), pp. 56–95.
Less than a century later, we encounter accounts of the secret Jewish Sūfis of Mashhad, mentioned firstly by Joseph Wolff (1795–1862), a Jewish Christian missionary, who arrived in Mashhad in first week of December 1831 on his way to Bukhara. He obtained an audience with Prince Ahmad ‘Alī Mirzā Rokn-ol-Molk (1804–1855), the governor of Khurasan in the early 19th century, immediately after his arrival in Mashhad. Prince Ahmad ‘Alī Mirzā was the third son of the ruling King Fath-ʿAlī Šāh Qajar (1771–1834) and Maryam Khānūn Banī Istā’īl (1770–1843), his thirty-ninth wife, who was of Jewish origin from Māzandarān and bore five other children. Wolff was introduced by Ahmad ‘Alī Mirzā to Molla Māsīh Ḥāfīz (perhaps a reduction of Masīh Ḥāfīz), the chief of the local Jewish community, who was known as Mollā Mahdī by the Muslims and with the title Nasi (אֱלֹהִים “prince, chief”) among the Jews. According to Wolff, the Jewish Sūfis had followed the Muslim Molla Mohammād ‘Alī Yshkapat/Ashkeputi (probably ‘Ešqābādī) as their moral “(spiritual) guide or teacher”. He gives some details regarding the manuscripts in the possession of the Mashhadī Jews, among others copies of the Persian translation of the Pentateuch (תנarth) and Psalms (שֵׁיֶרְנְחַלְיָם), a Judeo-Persian copy of the Yūṣuf Zolobhād by Mōlānā Shāhīn, a Judeo-Persian Dīvān of Ḥāfīz, a Hebrew translation of the Quran, as well as a copy of

37Moreen, In Queen Esther’s Garden, p. 262.
38After Ms. Heb. 28º 5760, Fol. 82r, the transcription is mine.
39Wolff visited Mashhad twice, for the first time in 1831 and then after returning from Bukhara 1844. The details of his journeys to Mashhad are recounted in his two travelogues of 1835 and 1845; cf. Joseph Wolff, Researches and Missionary Labours among the Jews, Mohammedans, and Other Sects (Philadelphia, 1835); Wolff, Narrative of a Mission to Bukhara.
40Wolff, Researches and Missionary Labours among the Jews, p. 147.
41Maryam Khānūn previously been married to Āḥā Mohammad Khān Qajar (r. 1789–1797); cf. Solṭān Ahmad Mirzā ‘Azīd-ol-Dowleh, Tārīḵ-e ʿAzōdī, (ed.) ‘Abd-ol-Hoseyn Navaʾī (Tehran, 1355 [1997]), p. 33; Solṭān Ahmad Mirzā ‘Azīd-ol-Dowleh, Tārīḵ-e ‘Azōdī: Life at the Court of the Early Qajar Shāhs, (ed.) Manoutecher M Eskandari-Qajar (Washington, D.C., 2014), p. 16. For her other children cf. Dominic Parviz Brookshaw, ‘Maryam Khānūn’, in Encyclopedia Iranica, (ed.) Ehsan Yarshater (New York, 2005), https://iranicaonline.org/articles/maryam-khanom. Two other Jewish wives of Fath-ʿAlī Šāh Qajar were his 76th and 156th wives, both known as Khādijeh Khānūn Banī Isrāʿīl. The first one had two children, who did not survive infancy. The list of the spouses of Fath-ʿAlī Šāh Qajar can be found in Tārīḵ-e ʿAzōdī by Solṭān Ahmad Mirzā ‘Azīd-ol-Dowleh, compiled from Nāšīf-ol-Tawārīḵ by Sepehr.
42On Mollā Mahdī and his role as British agent during the first Afghan War cf. Myron M. Weinstein, ‘A Hebrew Qur’ān Manuscript, Studies in Hebrew and Booklow 10/1–2 (1971), p. 44, n. 10–11. Furthermore, the Persian name of the Hidden Twelfth Ĥādīdī Imam and promised redeemer “Mahdī” for “Messiah” (Wolff: ‘Meshiakh’), reveals the dominantly messianic expectations of the time among both Jews and Muslims. Not to forget is that Seyyed ʿAlī Muhammad Shirāzī Bābā (1819–1856) has revealed his religion in 1844 and Mirzā Husain-ʿAlī Nūrg Šāh Bāhāʾ Allīh (1817–1892) in 1863, both declared themselves as the promised redeemers. Many Jews converted to Bahāʾ and Bahāʾism between 1877 and 1880; cf. Mehrdad Amanat, Jewish Identities in Iran: Resistance and Conversion to Islam and the Bahāʾ Faith (London, 2011).
43Wolff, Researches and Missionary Labours among the Jews, p. 128.
44The Judeo-Persian translations were prepared under the supervision of the famous Isfahān Rabbi Bābāʾī ben Nūrʾel at the behest of Nāder Šāh (1736–1747) and later transcribed into the PERSO-ARABIC script; cf. Walter J. Fischel, ‘The Bible in Persian Translation’, Harvard Theological Review 45/1 (1952), pp. 3–45.
45For this specific Hebrew Quran cf. Weinstein, ‘A Hebrew Qur’ān Manuscript’. 
Ferdosi’s Šahnāme and a copy of Rūmī’s Mānavī. It not specifically mentioned whether the latter two are Judeo-Persian transcriptions of the Šahnāme and Mānavī, or manuscripts

46 Wolff, Researches and Missionary Labours among the Jews, p. 129; Wolff, Narrative of a Mission to Bokhara, pp. 8–9, 398.
in Perso-Arabic. Despite Wolff’s generally uncritical interest in manuscripts, I am inclined to suggest that again here Judeo-Persian manuscripts are meant. Wolff mentions the Jewish Şūfis of Mashhad and the importance of the poems of Ḥāfeẓ and Rūmī among them in his both travelogues. In the report of his visit to Mashhad in 1831 he mentions how the Mashhadī chief Rabbi Mollā Mahdī presented him with a mystical interpretation of Ḥāfeẓ’s poetry:

The wine, Mullah Meshiakh [i.e. Molla Mahdī] observed, of which Hafiz sang, is the mystical wine of truth. Mullah Pinehas, Mullah Eliahu, Mullah Nissin, Abraham Moshe, and Mashiakh Ajoon [i.e. the same above-mentioned Mollā Mahdī], belong to the Jewish Soofees.47

And again, in the account of his second visit to Mashhad in 1844 as follows:

On my second arrival I heard more fully the history of the massacre [i.e. allāḥdād] of the Jews. The Jews for centuries had settled there from the cities Casween, Rasht, and Yazd. They were distinguished advantageously by their cleanliness, industry, and taste for Persian poetry. Many of them had actually imbibed the system of the Persian Suffees. We heard them, instead of singing the Hymns of Zion, reciting in plaintive strains the poetry of Hafiz and Ferdousi, and the writings of Masnawee.48

Beside all these historical accounts, a quick look through the extant Judeo-Persian manuscripts clearly testifies the admiration of the Iranian Jews for Şūfī poetry. The affiliation of not only the Jewish Şūfis, but Iranian Jewry in general, with poems of Ḥāfeẓ is in this context unsurprising.

**Judeo-Persian Manuscripts of the Divān of Ḥāfeẓ**

There are a good number of Judeo-Persian transcriptions of Classical Persian poets, which do not appear in their common standard editions. Even if most of the extant manuscripts seem to be too young to be valuable for critical editions, the edition and analysis of these ‘ghosts’ together with the clearly ascribed poems have never been undertaken, it remains open if and how the variations rendered in the transcription, might help to supplement the current editions of classical Persian poetry. The understudied Judeo-Persian Ḥāfeẓ tradition does not make an exception. Jes Peter Asmussen (1928–2002), one of the most prolific scholars of Jewish Persian literature, devoted a brief chapter of six pages in his Studies in Judeo-Persian Literature (1973) to a short comparative analysis of four poems from the two Judeo-Persian manuscripts Or. 4745 (now at the British Library) and Add. 16 in Det kongelige Bibliotek, Copenhagen.49 In the following section, I trace the footsteps of Ḥāfeẓ poems within some Judeo-Persian collections. This overview is by no means an exhaustive list and is just a first step towards future studies.

There are many selections or single Judeo-Persian renderings of Ḥāfeẓ poems scattered throughout Judeo-Persian mixed collections and miscellanea. Vera B. Moreen records five manuscripts containing poems of Ḥāfeẓ out of 198 Judeo-Persian manuscripts of the Library

of the Jewish Theological Seminary of America, namely MS. 1365.8; MS. 1423.32; MS 1453.18; MS. 1478.2 and MS. 5551.1, dated variously from 16th to 19th centuries from Iran and Central Asia (Bukhara):\(^{50}\)

- MS. 5551 (ENA II 76),\(^{51}\) which is a Judeo-Persian rendition of ġazals, mostly by Ḥāfeẓ and Gāmī, dated to 16th or 17th century, Iran, 13 leaves. Paper (light beige); 14.5×9.7 cm.\(^{52}\)

- MS. 1365 (Acc 57458), a collection of various Hebrew and Judeo-Persian poems, dated 18th or 19th century (?). 240 leaves. Paper (mostly dark beige and some blue); very worn and stained at the deckle; 11.5×16.2 cm. In fol. 161r–161v, it contains a Judeo-Persian transcription of a poem by Ḥāfeẓ, entitled "[A selection of] Ḥāfeẓ Ḥāfeẓ" (fol. 161r) not found in standard editions, followed by a quatrains.\(^{53}\)

- MS. 1423 (ENA 185), another collective manuscript, dated 1891? [Iran], 103 leaves. Paper (light beige); heavily stained; 10.5×16.7 cm, which in fol. 97t–98r contains a vocalized Judeo-Persian transcription of a ġazal by Ḥāfeẓ, entitled "אלאי מבני העם." \(^{54}\)

- MS. 1453 (ENA 496), a Haggadah, containing Hebrew and Judeo-Persian texts, dated 19th century [Iran], 24 leaves. Paper (dark beige); water damage; ruled with ruling board; fol. 24 bound upside-down; 10.5×20.5 cm. Contains in fol. 24r a Judeo-Persian transcription of a ġazal by Ḥāfeẓ, entitled "חליל_turnim.\(^{55}\)

- MS. 1478 (ENA 673), a collection of rabbinic narratives and Jewish Iranian tales, dated 19th century [Iran], 65 leaves. Paper (beige and blue); extensive damage; different sizes; ca. 22×17 cm. In fol. 4r–45 and 8r/v contains three ġazals by Ḥāfeẓ, entitled "אני מבני העם at the front matter.\(^{56}\) MS. 1490 (ENA 1387 b 36), a mixed Judeo-Persian and Persian collection, dated 19th cent.? [Bukhara], 185 leaves. Paper (thick, beige); water damage; 17.2×10.4 cm. In fol. 139r–139v contains a Judeo-Persian imitation of a famous poem by Ḥāfeẓ. Furthermore it contains a Judeo-Persian rendering of a qaṣīda in form of bahra-tawāl by Zeynābī Samarqandī (fols. 140r–148r), as stated in the heading מורה תולדת מ יהודה זייגניא, imitating a famous poem by Ḥāfeẓ.\(^{57}\)

Beside the occasional selections or single Judeo-Persian rendering of Ḥāfeẓ poems within the miscellanea, there are also a remarkable number of survived copies of the whole Divān of Ḥāfeẓ. Moreen mentions four copies of Ḥāfeẓ’s Divān, kept at the Jewish National and University Library, Jerusalem.\(^{58}\) The enlisted manuscripts are MS. HEB. 38°5106, possibly from the 16th century, MS. HEB. 28°5088, dated to the 18th century and MS. Heb. 28°3418 as well as MS. HEB. 38°5645, both from the 18th–19th centuries.

Putting aside the main texts contained in the manuscripts for a moment, though they certainly deserve an independent investigation, I want to take a closer look at two manuscripts

of Ḥāfeẓ’s Divān from rather a different point of view, using another kind of data available, namely the notes, colophons and material traces left by patrons, scribes, owners, and readers. Investigation of these sometimes arbitrary paratextual elements may allow us to reconstruct different facets of the production, circulation, and consumption of these manuscripts. In this perspective, the most interesting manuscript among the Judeo-Persian Ḥāfeẓ manuscripts from various collections is without doubt the manuscript HEB. 28°5088.

Ms HEB. 28°5088

Ms HEB. 28°5088 is a 18th century Divān of Ḥāfeẓ, with the heading ֶתֶכֶזֵי הָעַדֶמֶה רָהַמֶה אֶלֶּכְאֶלֶךְ לוֹלִיָּה אֶלֶּכְעַמֶה in 138 pages and the format of 15x20 cm, is written on Western paper (inside watermark date 1792) and holds decorative motives of bote-ğe (curved-top Cedar designs), flanked by two motives of Ḥoḵšid-Ḥāntūm “Lady Sun” on the initial page (fols. 1v–2r, Fig. 2). The manuscript comprises eighteen multilingual folios (124v to 138r) at the end of the manuscript, directly after the closing phrase הָמֶתֶה אֶלֶּכְעַב, which are mostly secundo manus and relate to the various owners. The marginalia and back matter are in Hebrew, Judeo-Persian, Persian, and two ‘Indian’ scripts, and comprise selections of poetry and personal notes. The notes and selected poems added at the end of the manuscript give an interesting impression of the cultural background of its owners, and the geographical and intellectual exchange of the Judeo-Persian manuscripts of this genre. Among others the monaḥāt-name ascribed to ʼAṯār, described asfeitnāt namā ḥaṭat mīsā ʻalayhe salām dar kūh-e tūr.59 “The intimate conversation of Moses, peace be upon him, in Mount Tūr” (fol. 126r, Fig. 3). Evidently the scribe uses the title of ʼAṯār’s magnāt from Elāhū-nāmā “Book of the Divine”, referring to the biblical Moses narrative. However, according to my knowledge, the poem is not to be found within the canonical collections of ʼAṯār’s works. The scribe reveals his identity by using the title צער... “Finished! [I’ve] written for the sake of vanity, this script [...] will outlive me and remain as my commemoration, [written by] the young man, who [...] Bavalpur [...] Year [...]”.

The poetic formulation here is a well-known cliche of Persian colophons. Unfortunately, the year and the name of the scribe are illegible, but not of less importance, the location of the then-owner of the manuscript is clearly stated: the princely state of British India Bahawalpur in the Punjab province, today Pakistan. Bahawalpur state was founded in 1727 CE by the Muslim Naḵb Ṣādiq Muḥammad Khān Ḵabhāsī I (1715–1742). The town and surrounding region, specially the neighbour historic city of Uch (Uch Sharif “Noble Uch”), which came under the control of the Bahawalpur princely state in 1748, is known for its Şūfī affairs and contains numerous tombs of prominent pīrs.60 Uch is also closely connected with Sayyed Gaḥāl al-Dīn Boḥārī, known as Sbrhpūs (595/1198–690/1292), the

59Written monaḥāt-name ḥaṭat mīsā ʻalayhe salām dar kūh-e tūr.
60For the Sohrawardiya order in Uch cf. Hasan Ali Khan, Constructing Islam on the Indus: The Material History of the Sohrawardi Sufi Order, 1200–1500 AD (Cambridge, 2016), pp. 199–244.
renowned Central Asian Sūfī mystic, who migrated from Bukhara to Uch in 1244–1245, under Mongol rule. He was a Sūfī saint and missionary and a follower of Bahā’-ʾod-dīn Zakarīyāʾ (577/1182–661/1262), Sūfī saint, scholar and poet who established the Sohravardiya order of Baghdad in medieval South Asia.61 Another note (fol. 124v) mentions also Multan, a city and capital of Multan Division located also in Punjab, today Pakistan. Like the nearby city of Uch, hosting a large number of Sūfī shrines, Multan was also a ‘City of Saints’, attracting congregations of Sūfī mystics from the 11th and 12th centuries onwards. The note (fol. 124v, Fig. 4) mentions a certain Rabbi Reuben Cohen רֵיעֵצ בָּאוֹן in Multan.

Here again the title רֵיעֵצ “young” is used for false humility, which suggests that the owner of the manuscript was a great Rabbi and probably a high-ranking community leader:

“Written in Multan, 5th of Iyar 5574 (April 25th 1814), the young Reuben Cohen”

The notes at the end of these manuscript here show remarkable connections to both major Sūfī orders of Ne’mat-ollāhī (mostly in Deccan)62 as well as Sohravardiya (in Punjab).

61Amina M Steinfeld, ‘The Travels and Teachings of Sayyid Jalāl Al-Dīn Husayn Bukhārī (1308–1384)’ (PhD Dissertation, Yale University, 2003), p. 47.

62Gavād Nūrbāḥš, Pībuah taqīyat [The Spiritual Guides of the Path], Motūn-e Ṣaravin 64 (Tehran, 1358 [1979]), p. 48.
Interestingly enough, the manuscript contains two notes in two different ‘Indian’ scripts (fol. 129r, Fig. 5). The first line seems to be in Landa, an old italic that was common in what is now Pakistan and is the basis of the script of the second note below, which could be an italic Gurmukhi (for Punjabi) or Khudabadi script, the pre-Arabic script for Sindhi. It shows clearly that at a certain time the manuscript was in circulation among
Persian-speaking Şūfi Jews in the region of Punjab, where Şūfi connections were already present.

Furthermore, beside the mention of the Bahavalpur in Punjab there are numerous other poems written both in Persian and Hebrew scripts which are signed as زید علی شاه/ از بی علی شاه/ ze yad-e 'Ali-Sāh/ az yad-e 'Ali-Sāh “[written by the] hand of 'Ali-Sāh” (fols. 128r, 130v, 131r-132r). The scribe’s name recalls again clearly the honorific titles of the masters of the Ne’matollahi Şūfi order. One of the cited poems (fol. 130v) bears a date, which is not very eligible, but eventually can be read as 1211 [AH], corresponding to 8th February 1797. Just to give an impression of the colourful variety of the poems noticed at the back matter of the manuscript, I render one of the very last ones in Persian script (Fig. 6) which bears the

Fig. 4. Detail from the Judeo-Persian Dīvān of Ḥāfez, Ms. Heb. 28°5088, Fol. 124v.

Fig. 5. Detail from the Judeo-Persian Dīvān of Ḥāfez, Ms. Heb. 28°5088, Fol. 129r.
Courtesy of The National Library of Israel
The last known complete Judeo-Persian Dīvān of Ḥāfeẓ belongs to the rich collection of the Judeo-Persian manuscript collection of British Library. The 18th century manuscript is dated to 5499 of the Hebrew calendar (corresponding to 1739 CE) and is written in 120 folios (+ 1 unfoliated paper flyleaf at the end) in quires of mostly 8 leaves each, with a page size of 215 x 160 mm (written area 175 x 140 mm). It has a fragile brown and black leather binding (post-1600) with Islamic end bands and spine piece from leather and tidemarks at edges and stains within the text block from liquid and usage. It has a uniform layout with 21 written lines per page in Persian semi-cursive script of the 18th century and larger square initials. The manuscript contains marginal notes and additions, as well as catchwords (rekāhe) on every verso. It was purchased from its former owner S. J. A. Churchill by the British Museum on 14 February 1894. Though in general there is a lack of information regarding

63Jiří Bečka, “Tajik Literature from the 16th Century to the Present”, in History of Iranian Literature, (ed.) Jan Rypka (Dordrecht, 1968), pp. 500–501.

64However, several folios unfortunately are missing, whereas the opening and last folios are there.

65For complete descriptions cf. George Margoliouth, ‘Persian Hebrew MSS. in the British Museum’, The Jewish Quarterly Review 7/1 (1894), p. 119; Glyn Munro Meredith-Owens, Handlist of Persian Manuscripts 1855–1966 (London, 1968), p. 41; George Margoliouth, Catalogue of the Hebrew and Samaritan Manuscripts in the British Museum, 4 Vols (London, 1899–1935), vol. 3, p. 273, no. 948.
the production and circulation of Judeo-Persian manuscripts, Or. 4745 fortunately has an extant colophon. The complete colophon (fol. 120v, Fig. 7) reads as follows:66

\[
\text{םתראגזורדייארבטןיאםתשונראגאידנאמבטסנאמנןמיראגדאידנאמנהכסכןאזיראגדאידנאמנהכסכןאזירהיםלעםאמשי׳פרעהמאבתכהתסימא׳כןיאדושםאמת悩みומחרזארישה׳ט׳פאחה׳כארעושפדילעם׳אריצילטצתהתנשלוליאםוא׳חהיבנש׳הזוררדהיילעהאלאריקחריק׳א׳כרוחבהרקייהחאהתהגהיגאמ׳ההשמןירתמכהדנבתעא׳טבלאכדרומ׳מ׳הלאכיםרבוהדננא׳כרבוהדנסיונרבדאבךראבמהכדימא׳כביהיולהלםלועדעוהתעמהלסחצנןמאבאתכבחאצרبدوוא׳דאידנוכידמח.
\]

\[\text{_finished!}\]

I wrote this so when the time comes,
When I will not remain, this script will remain as commemoration;
All those, who don’t bequeath any commemoration from themselves,
They won’t be remembered after they death (lit. they won’t be counted any more).

\[\text{66Margoliouth, op. cit.; the colophon without any translation is only partly rendered there.}\]
[Writing down of] this auspicious book of the poet laureate, the venerable Ha'fez of Shiraz, requi-
escat in pace, is finished on Thursday, the 8th of [the month of] Elul of the year 5499 of the cre-
ation of the world, by the hand of this poor fellow of scanty means, the most humble
lowly servant Moshe […] Abraham Mulē (?) for the sake of his dear brother, the young man,
Mikā(e)l […] Mordechai […?], in the hope it brings prosperity upon the scribe, and upon the reader, and upon the owner of this book, peace and eternity from now on, and forever, hallelujah.

May the one who would remember the scribe by reciting an ‘al-Ḥamd [= the Fātiḥa] be loaded with God’s mercy”.

Not even if the colophon reveals the place of the production of this manuscript unfortunately. Though, it contains some valuable stylistic information. The colophon has a fair mixed Hebrew-Judeo-Persian vocabulary. Both names of the scribe and the owner, which manuscript was written either as a commission or as a gift are in place. A certain Moshe Avraham has copied the Divān for a Mikā(e)l Mordechai, who is addressed in Hebrew as רוחבהรกיהחאה “dear brother and young man”. It is remarkable that the scribe hoped for a certain merit by coping the Divān in his closing prayers by uttering the wish for eternal peace and prosperity for himself as well as the owners and readers of the manuscript. Though, such closing prayers are not surprising, by having them here in Hebrew formulation, rather than the expected Judeo-Persian, it seems that the scribe saw a kind of ‘religious’ or maybe better to say ‘spiritual’ merit in fulfilling his task. He refers to himself with humble and traditional devotional formula of self-abasement as נירתמכהדנבתעא׳טבלאריקחריקפ “the poor and insignificant lowly servant” (faqīr haqīr al-baṣāʾat bande-ye kamtarin), which denotes a certain commitment to the general Sūfī milieu. Using the very last formula of remembering the scribe by reciting a ‘al-Ḥamd (referring to the first sūn of the Quran, al-Fātiḥa), traditionally recited in Muslim funeral services and by each recalling the name of the belated ones, signifies a deep acculturation of Iranian Jewry into the Islamicate Iranian environment and most specifically into its scribal traditions.

Conclusion

One more aspect that could not be treated here is certainly the relation between Jewish Kabbala and mysticism to Iranian Muslim Sūfism. It is fair to suppose that the preoccupation with Jewish kabbalistic issues was a fact that cannot be neglected by talking about the Iranian and Persian-speaking Jewish tendencies towards the influence of Persian Sūfī literature. The lack of any systematic study of the manuscripts regarding this issue is a serious desideratum, which still must be undertaken. In the lack of any certain knowledge regarding either kabbalistic groups arose within the Iranian Jewish community or less conceivable influence by the European Hassidic streams, though, it can in so far be observed, that such a relation between the two mentioned metaphysical movements could indirectly be promoted by the popularity of the aggadic and halakhic Midrāsim among Iranian Jewry and within Judeo-Persian literature.67 Persian-speaking Jews were able to adopt the dominant Sūfī symbolic language and terminology alongside its mystical elements in the expression of their own, Hebrew Bible-derived, theology and philosophy.
