| Topic                        | Item No | Checklist item description                                                                 | Reported on Page Number/Line Number | Reported on Section/Paragraph |
|-----------------------------|---------|-------------------------------------------------------------------------------------------|------------------------------------|------------------------------|
| Title                       | 1       | The diagnosis or intervention of primary focus followed by the words "case report"         | Page1/Line1                        | on title                     |
| Key Words                   | 2       | 2 to 5 key words that identify diagnoses or interventions in this case report, including "case report" | Page2                              | on key words                 |
| Abstract (no references)    | 3a      | Introduction: What is unique about this case and what does it add to the scientific literature? | Page2                              | on abstract                  |
|                             | 3b      | Main symptoms and/or important clinical findings                                           | Page2                              | on abstract                  |
|                             | 3c      | The main diagnoses, therapeutic interventions, and outcomes                                | Page2                              | on abstract                  |
|                             | 3d      | Conclusion—What is the main “take-away” lesson(s) from this case?                         | Page2                              | on abstract                  |
| Introduction                | 4       | One or two paragraphs summarizing why this case is unique (may include references)        | Page2                              | introduction                 |
| Patient Information         | 5a      | De-identified patient specific information                                                  | Page3                              | on case report               |
|                             | 5b      | Primary concerns and symptoms of the patient                                               | Page3                              | on case report               |
|                             | 5c      | Medical, family, and psycho-social history including relevant genetic information           | none                               | none                         |
|                             | 5d      | Relevant past interventions with outcomes                                                  | none                               | none                         |
| Clinical Findings           | 6       | Describe significant physical examination (PE) and important clinical findings             | Page3                              | on discussion                |
| Timeline                    | 7       | Historical and current information from this episode of care organized as a timeline       | none                               | none                         |
| Diagnostic Assessment       | 8a      | Diagnostic testing (such as PE, laboratory testing, imaging, surveys).                    | Page2                              | on case report               |
|                             | 8b      | Diagnostic challenges (such as access to testing, financial, or cultural)                 | none                               | none                         |
|                             | 8c      | Diagnosis (including other diagnoses considered)                                           | none                               | none                         |
|                             | 8d      | Prognosis (such as staging in oncology) where applicable                                  | Page3                              | on discussion                |
| Therapeutic Intervention    | 9a      | Types of therapeutic intervention (such as pharmacologic, surgical, preventive, self-care) | Page3                              | on discussion                |
|                             | 9b      | Administration of therapeutic intervention (such as dosage, strength, duration)            | Page3                              | on discussion                |
|                             | 9c      | Changes in therapeutic intervention (with rationale)                                      | Page3                              | on discussion                |
| Follow-up and Outcomes | 10a    | Clinician and patient-assessed outcomes (if available) | none | none |
|-----------------------|--------|------------------------------------------------------|------|------|
| 10b                   |        | Important follow-up diagnostic and other test results | Page3| on discussion |
| 10c                   |        | Intervention adherence and tolerability (How was this assessed?) | none | none |
| 10d                   |        | Adverse and unanticipated events | Page2| on case report |
| Discussion            | 11a    | A scientific discussion of the strengths AND limitations associated with this case report | Page3| on discussion |
| 11b                   |        | Discussion of the relevant medical literature with references | Page3| on discussion |
| 11c                   |        | The scientific rationale for any conclusions (including assessment of possible causes) | Page3| on discussion |
| 11d                   |        | The primary “take-away” lessons of this case report (without references) in a one paragraph conclusion | none | none |
| Patient Perspective   | 12     | The patient should share their perspective in one to two paragraphs on the treatment(s) they received | none | none |
| Informed Consent      | 13     | Did the patient give informed consent? Please provide if requested | Yes | No |
