A portion each of the human extracellular, transmembrane, and intracellular domains (base pairs 1004–1835) of human podocalyxin was PCR-amplified using the primers TTTGGATCCCAGATGCCAGCCAGCTCTACG and TTTGAATTCTTAGAGGTGCGTGCTTCTTC. A portion of the human extracellular domain (base pairs 1004–1492) was PCR-amplified using the primers TTTGGATCCCAGATGCCAGCCAGCTCTACG and TTTGAATTCTTAGAGGTGCGTGCTTCTTC. A region of the intracellular domain (bases 1726–2912) was PCR-amplified using the primers TTTGAATTCTTAGAGGTGCGTGCTTCTTC and TTTGGATCCCAGATGCCAGCCAGCTCTACG.
