Supplementary Fig. 1

H&E and Oil red staining for the liver and adipose tissue in aging mice.

(A) Representative images of H&E stained sections of the liver from aging mice.
(B) Representative images of oil red stained sections of the liver from aging mice.
(C) Representative images of H&E stained sections of adipose tissue from aging mice.
(D) Representative images of oil red stained sections of adipose tissue from aging mice. The scale bar is 50 μm for all the pictures, and the pictures are shown as the representative of at least five independent experiments.
