| TITLE        |        |                                                                                                                                                                                                                                                                                                                                              |                                   |                             |
| Title        | 1      | Identify the report as a systematic review, meta-analysis, or both.                                                                                                                                                                                                                                                                         | Page 3, Line 54 | Table                      |
| ABSTRACT     |        |                                                                                                                                                                                                                                                                                                                                              |                                   |                             |
| Structured summary | 2      | Provide a structured summary including, as applicable: background; objectives; data sources; study eligibility criteria, participants, and interventions; study appraisal and synthesis methods; results; limitations; conclusions and implications of key findings; systematic review registration number.                                                                                             | Page 5, Line 101-122 | Abstract                   |
| INTRODUCTION |        |                                                                                                                                                                                                                                                                                                                                              |                                   |                             |
| Rationale    | 3      | Describe the rationale for the review in the context of what is already known.                                                                                                                                                                                                    | Page 6, Line 128-141 | Introduction               |
| Objectives   | 4      | Provide an explicit statement of questions being addressed with reference to participants, interventions, comparisons, outcomes, and study design (PICOS).                                                                                                                                 | Page 6, Line 141-143 | Introduction               |
| METHODS      |        |                                                                                                                                                                                                                                                                                                                                              |                                   |                             |
| Protocol and registration | 5      | Indicate if a review protocol exists, if and where it can be accessed (e.g., Web address), and, if available, provide registration information including registration number.                                                                                                                                                       | Page 7, Line 157-175 | Methods, Paragraph 2-3     |
| Eligibility criteria | 6      | Specify study characteristics (e.g., PICOS, length of follow-up) and report characteristics (e.g., years considered, language, publication status) used as criteria for eligibility, giving rationale.                                                                                                                                                   | Page 7, Line 154-163 | Methods, Paragraph 1-2     |
| Information sources | 7      | Describe all information sources (e.g., databases with dates of coverage, contact with study authors to identify additional studies) in the search and date last searched.                                                                                                                                                                              | Page 6-7, Line 150-154 | Methods, Paragraph 1       |
| Search       | 8      | Present full electronic search strategy for at least one database, including any limits used, such that it could be repeated.                                                                                                                                                                                                                 | Page 6-7, Line 150-155 | Methods, Paragraph 1       |
| Study selection | 9      | State the process for selecting studies (i.e., screening, eligibility, included in systematic review, and, if applicable, included in the meta-analysis).                                                                                                                                                                                                 | Page 7, Line 157-166 | Methods, Paragraph 2       |
| Data collection process | 10     | Describe method of data extraction from reports (e.g., piloted forms, independently, in duplicate) and any processes for obtaining and confirming data from investigators.                                                                                                                                                                           | Page 7, Line 168-175 | Methods, Paragraph 3       |
| Data items   | 11     | List and define all variables for which data were sought (e.g., PICOS, funding sources) and any assumptions and simplifications made.                                                                                                                                                                                                        | Page 7, Line 161-163 | Methods, Paragraph 2       |
| Section / Topic | Item | Description | Page / Line References | Methods / Paragraphs |
|----------------|------|-------------|------------------------|---------------------|
| Risk of bias in individual studies | 12 | Describe methods used for assessing risk of bias of individual studies (including specification of whether this was done at the study or outcome level), and how this information is to be used in any data synthesis. | Page 7, Line 172-175 | Methods, Paragraph 3 |
| Summary measures | 13 | State the principal summary measures (e.g., risk ratio, difference in means). | Page 8, Line 178-179 | Methods, Paragraph 4 |
| Synthesis of results | 14 | Describe the methods of handling data and combining results of studies, if done, including measures of consistency (e.g., I²) for each meta-analysis. | Page 8, Line 179-181 | Methods, Paragraph 4 |
| Risk of bias across studies | 15 | Specify any assessment of risk of bias that may affect the cumulative evidence (e.g., publication bias, selective reporting within studies). | Page 8, Line 181-182 | Methods, Paragraph 4 |
| Additional analyses | 16 | Describe methods of additional analyses (e.g., sensitivity or subgroup analyses, meta-regression), if done, indicating which were pre-specified. | Page 8, Line 183-185 | Methods, Paragraph 4 |

**RESULTS**

| Section / Topic | Item | Description | Page / Line References | Results / Paragraphs |
|----------------|------|-------------|------------------------|---------------------|
| Study selection | 17 | Give numbers of studies screened, assessed for eligibility, and included in the review, with reasons for exclusions at each stage, ideally with a flow diagram. | Page 8, Line 191-199 Appendix Page 3 | Results, Paragraph 1 Appendix, Table A.3 |
| Study characteristics | 18 | For each study, present characteristics for which data were extracted (e.g., study size, PICOS, follow-up period) and provide the citations. | Page 9, Line 201-222 | Results, Paragraph 2-4 |
| Risk of bias within studies | 19 | Present data on risk of bias of each study and, if available, any outcome level assessment (see item 12). | Appendix Page 2 | Appendix, Table A.2 |
| Results of individual studies | 20 | For all outcomes considered (benefits or harms), present, for each study: (a) simple summary data for each intervention group (b) effect estimates and confidence intervals, ideally with a forest plot. | Page 10, Line 225-226; 230-231 | Results, Paragraph 5; 6 |
| Synthesis of results | 21 | Present results of each meta-analysis done, including confidence intervals and measures of consistency. | Page 10, Line 226-228; 231-234 | Results, Paragraph 5; 6 |
| Risk of bias across studies | 22 | Present results of any assessment of risk of bias across studies (see Item 15). | Page 10-11, Line 245-251 | Results, Paragraph 9 |
| Additional analysis | 23 | Give results of additional analyses, if done (e.g., sensitivity or subgroup analyses, meta-regression [see Item 16]). | Page 10, Line 236-240 | Results, Paragraph 7 |

**DISCUSSION**

| Section / Topic | Item | Description | Page / Line References | Discussion / Paragraphs |
|----------------|------|-------------|------------------------|------------------------|
| Summary of evidence | 24 | Summarize the main findings including the strength of evidence for each main outcome; consider their relevance to key groups (e.g., healthcare providers, users, and policy makers). | Page 11, Line 256-261 | Discussion, Paragraph 1 |
| Limitations | 25 | Discuss limitations at study and outcome level (e.g., risk of bias), and at review-level (e.g., incomplete retrieval of identified research, reporting bias). | Page 16, Line 380-391 | Discussion, Paragraph 11 |
| Conclusions | 26 | Provide a general interpretation of the results in the context of other evidence, and implications for future research. | Page 16-17, Line 394-402 | Conclusions |
