Research impact:

1. At this phase of my career, I have 100 publications with 27 are published in A* journals and 55 papers in A journals (based on journal ranking via the Australian Mathematical Society FoR 0101). I have 856 citations by 412 authors listed in MathSciNet, and Google Scholar: 1282, h-index 20, i10-index 42; (as of Apr 2024).
2. Among all my publications, some of the papers are published in Memoirs of the American Mathematical Society, Journal de Mathematiques Pures et Appliquees, Mathematische Annalen, Advances in Mathematics, Annales de l'Institut Fourier, Indiana University Mathematics Journal, Mathematische Zeitschrift, Transaction of the American Mathematical Society. These journals have long tradition and high reputation in the world. Also, some other papers are published in Analysis and PDE, Applied and Computational Harmonic Analysis, Journal d'Analyse Mathématicque, Journal of Functional analysis, Journal of Differential Equations, and Revista Matemática Iberoamericana. These are top international journals in the field of analysis.

4. In mathematics, invitations to speak at conferences are one of the main indicators of research quality and impact. Since 2009, I have been invited to give a total of over 80 presentations in conferences, workshops and seminars in the USA, Europe and Asian countries, which covered various topics in analysis and PDE, demonstrating the impact of my research in the field. Among these, I would like to highlight that I was invited to give a talk in
