## EJPB Vol 11 (2) 2020
### Contents

| S. No. | Title                                                                 | Page No. |
|-------|-----------------------------------------------------------------------|----------|
| **Research Articles**                                                                                   |
| 1.    | Two dimensional *in-vitro* phenotyping of root system architecture using Poly Ethylene Glycol in backcross inbred lines harboring drought tolerant QTLs of rice (*Oryza sativa* L.) | 335-345  |
|       | K. Baghyalakshmi, P. Jeyaprakash, S. Ramchander, M. Raveendran and S. Robin                                   |
| 2.    | New multipetalous variety G. Ad.2 in *Adenium obesum*                                                              | 346-350  |
|       | Alka Singh, S. K Chavan, A J Bhandari, Vipulkumar Parekh, H P Shah, A I Patel and B N Patel                       |
| 3.    | Assessment of variability in phenological, morphological and yield traits in a biparental RIL population in wheat (*Triticum aestivum* L) | 351-358  |
|       | Sadiah Shafi, Parvaze A. Sofi, Bikram Singh, J. P. Jaiswal, V. K. Mishra and R. R. Mir                              |
| 4.    | Hayman’s diallel analysis for yield and attributing traits in sesame (*Sesamum indicum* L.)                      | 359-366  |
|       | R.A. Gami, B.B. Chauhan, and R.N. Patel                                                                           |
| 5.    | Study of genetic divergence in rice (*Oryza sativa* L.) genotypes with high grain zinc using Mahalanobis’ D² analysis | 367-372  |
|       | S. K. Singh, Vishal Pandey, Korada Mounika, D. K. Singh, A. R. Khaire, Sonali Habde and Prasanta Kumar Majhi           |
| 6.    | Performance of cluster bean [*Cynopsis tetragonoloba* (L.) Taub.] genotypes for growth, yield and quality characters | 373-381  |
|       | Bakang K. Kgasudi, G. Kranthi Rekha, K. Uma Jyothi and K. Sasikala                                                  |
| 7.    | Stability analysis in maize (*Zea mays* L.)                                                                         | 382-385  |
|       | S. N. Patil, M.V. Duppe and R. M. Bachkar                                                                          |
| 8.    | Assessment of combining ability and standard heterosis through diallel analysis in sesame (*Sesamum indicum* L.)       | 386-391  |
|       | G. Jeeva, K. Saravanan and C. A. Sowmiya                                                                           |
| 9.    | Studies on genetic variability and character association for yield and its attributes in greengram [*Vigna radiata* (L.) Wilczek) | 392-398  |
|       | Reshmi Jahan Mohammed, L. Prasanthi, Lakshminarayana R. Vemireddy and P. Latha                                        |
| 10.   | Genetic variability, correlation and path analysis studies for yield and yield attributes in African rice (*Oryza glaberrima*) germplasm | 399-404  |
|       | V. G. Ishwarya Lakshmi, M. Sreedhar, C. Gireesh and S. Vanisri                                                     |
| 11.   | Performance evaluation of different genotypes of brinjal (*Solanum melongena* L.) under mid hill conditions of Himachal Pradesh | 405-410  |
|       | Divya Arti, A. K. Sharma and Ramesh Kumar                                                                         |
| 12.   | Variability and path analysis studies in F₂ population of sorghum (*Sorghum bicolor* L.) Moench                    | 411-415  |
|       | S. Subhashini, D. Kavithamani, B. Selvi, and N. Vadivel                                                            |
| 13.   | Combining ability analysis for yield & its contributing traits based on multi-environment testing in upland cotton (*G. hirsutum* L.) | 416-424  |
|       | R. K. Giri, S. K. Verma and J. P. Yadav                                                                            |
| 14.   | Screening of okra, *Abelmoschus esculentus* L. (Moench) germplasm collections against two spotted spider mite, *Tetranychus urticae* (Koch) based on damage grading index | 425-429  |
|       | T. D. Jayabal, C. Chinniah and M. Kalyasundaram                                                                    |
| 15.   | Genetic diversity assessment of extant cotton varieties based on Principal Component Analysis (PCA) and cluster analysis of enlisted DUS traits | 430-438  |
|       | V. Santhy, K. Rathinavel, M. Saravanan, Mithila Meshram and C. Priyadharshini                                       |
| No. | Title                                                                 | Authors                                                                 | Pages |
|-----|----------------------------------------------------------------------|------------------------------------------------------------------------|-------|
| 16. | Floral, reproductive biology and morphological variation in annatto (*Bixa orellana* L.) | M. Umadevi, S. Giridharan and K. Kumaran                               | 439-446 |
| 17. | Assessment of genetic variability, character association and path analysis in F₂ population of sesame (*Sesamum indicum* L.) | M. Saravanan, R. Kalaiyaras and PL. Viswanathan                          | 447-450 |
| 18. | Interspecific hybrid confirmation in wide crosses of cotton (*Gossypium spp*) through morphological, cytological and molecular analysis | S. Imtiyazahmed, L. Mahalingam, N. Premalatha, K. Senguttuvan and V. P. Sobhakumari | 451-460 |
| 19. | Economic heterosis in sunflower (*Helianthus annuus* L.): Seed yield and yield attributing traits in newly developed hybrids | S. S. Lakshman, N. R. Chakrabarty and P. C. Kole                         | 461-468 |
| 20. | K 12 (TKA 9102/3) - A high yielding superior medium staple *Gossypium arboreum* cotton variety suited for rainfed vertisol tracts of Tamil Nadu | N. Muppidathi, C. R. Ananda Kumar, A. Ramalingam, S. Hari Ramakrishnan, N. Malini and E. Murugan | 469-478 |
| 21. | Assessment of drought tolerance in Nagina 22 mutants of rice using Poly Ethylene Glycol (PEG) | K. Manonmani, P. Jeya Prakash, S. Manonmani, M. Rapeendran and P. Jeyakumar | 479-486 |
| 22. | Varietal characterization and categorization of barnyard millet varieties, cultivars and mutants for varietal identification | R. Nilavarasi, K. Sujatha, R. Geetha and C. Vanniarajan                  | 487-493 |
| 23. | Evaluation of rice varieties for physicochemical characters related to puffing quality | P. Parkavi, S. Banumathy, K. Thangaraj, R. Suresh, P. Arunachalam and K. Jothilakshmi | 494-498 |
| 24. | Genetic divergence and clustering studies in advanced breeding lines of rice (*Oryza sativa* L.) | S. Palaniyappan, P. Arunachalam, S. Banumathy, M. L. Mini and S. Muthuramu | 499-504 |
| 25. | Genetic variability, correlation and path coefficient studies in F₂ generation of short slender aromatic and medium slender non-aromatic rice (*Oryza sativa* L.) | R. Sathishkumar, R. P. Gnanamalar, R. Suresh, G. Anand and S. Vellaikumar | 505-510 |
| 26. | Evaluation of sesame (*Sesamum indicum* L.) based on correlation and path analysis | A. Disowja, C. Parameswarai, R. P. Gnanamalar and S. Vellaikumar          | 511-514 |
| 27. | Variability in perennial moringa (*Moringa oleifera* Lam.) genotypes for quantitative and qualitative traits | P. Balaguru, V. A. Sathiyamurthy, G. J. Janavi and S. Santha              | 515-520 |
| 28. | SSR Marker-based DNA fingerprinting and morphological characterization for varietal identification in popular sorghum varieties of Tamil Nadu | S. Santhiya, K. Kowsihiga, D. Abisha, C. Sarankumar, D. Kavithamani, B. Selvi and N. Senthil | 521-527 |
| 29. | Diversity and stability studies in barnyard millet (*Echinochloa frumentacea* (Roxb).Link.) germplasm for grain yield and its contributing traits | R. Prabu, C. Vanniarajan, M. Vetrivanthan, R.P. Gnanamalar, R.Shanmughasundaram and J. Ramalingam | 528-537 |
| 30. | Genetic variability and multivariate analyses in coloured sorghum landraces (*Sorghum bicolor* (L.) Moench) of Tamil Nadu | C. Kavipriya, A. Yuvaraja, C. Vanniarajan and J. Ramalingam               | 538-542 |
| 31. | Selection indices for improving the selection efficiency of rice genotypes using grain quality traits | R. Venmuhil, D. Sassikumar, C. Vanniarajan and R. Indirani                | 543-549 |
|   | Title                                                                 | Authors                                | Pages   |
|---|----------------------------------------------------------------------|----------------------------------------|---------|
| 32. | Inheritance study for lint colour in naturally brown coloured upland cotton (Gossypium hirsutum L.) | R. Nivedha, S. Rajeswari, N. Premalatha and N. Sritharan | 550-555 |
| 33. | Heterosis and nicking ability studies for yield and fibre quality in intra-hirsutum hybrids | S.R. Kirthika, T. Kalaimagal, S. Rajeswari and N. Sritharan | 556-565 |
| 34. | Identification of superior drought tolerant maize hybrids based on combining ability and heterosis with Line × Tester mating design | Aswin Reddy Chilakala, M. Sudha, A. Senthil, S. Sivakumar and N. Senthil | 566-573 |
| 35. | Estimation of variability, heritability, genetic advance and assessment of frequency distribution for morphological traits in intercross population of maize | C. Neelima, C. Sarankumar, M. Sudha, K. N. Ganesan, R. Ravikesavan and N. Senthil | 574-580 |
| 36. | Marker-assisted selection for sheath blight resistance in rice (Oryza sativa L.) | Chandavarapu Raveendra, C. Vanniarajan, E. G. Ebenezar and J. Ramalingam | 581-584 |
| 37. | Study of morphological diversity of rice landraces (Oryza sativa L.) | R.S. Priyanga, D. Kumaresan, K. Amudha and S. Geetha | 585-594 |
| 38. | Characterization and comparative analyses of genetic divergence for identification of diverse parents on napier grass germplasm (Pennisetum purpureum L. Schumach) | S. Anandhinatchiar, C. Babu, K. Iyana, T. Ezhilarasi and V. Ravichandran | 595-605 |
| 39. | Diversity study using principal component analysis in barnyard millet (Echinochloa frumentacea (Roxb.) Link) | R. Prabu, C. Vanniarajan, M. Vettrivanthan, R.P. Gnanamalar, R. Shanmughasundaram and J. Ramalingam | 606-609 |
| 40. | Estimate of genetic consistency, diversity and traits association in late-maturing soybean breeding lines | Lawal, Oluwafemi Oluwatosin | 610-619 |
| 41. | An appraisal of genetic divergence in some indigenous collections of mungbean (Vigna radiata (L.) Wilczek) | M. Sneha, S. Saravanan, S. Merina Premkumari and M. Arumugam Pillai | 620-625 |
| 42. | Use of infrared thermography imaging for assessing heat tolerance in high and low iron pearl millet lines | R. Pushpavalli, A. Kanatti and M. Govindaraj | 626-632 |
| 43. | Breeding for evolution of photo-insensitive pole type vegetable dolichos (Lablab purpureus L.) varieties to suit year round cultivation | C. Susmita, N. Mohan and T. S. Aghora | 633-637 |
| 44. | In vitro mutagenesis to improve salt tolerance in rice (Oryza sativa L.) | G. Thamodharan and M. Arumugam Pillai | 638-644 |
| 45. | Genetic variability studies involving maintainers on maldandi and milo source of male sterility in rabi sorghum [Sorghum bicolor (L.) Moench] | N. Sandeep and B. D. Biradar | 645-649 |
| 46. | Combining ability study for yield and quality traits in cucumber (Cucumis sativus L.) | K. Rajaguru, T. Arumugam, D. Sassi Kumar and S. Jeeya | 650-655 |
| 47. | QTL analysis for yield-related traits under flowering stress in tropical maize (Zea mays L.) | B. V. Ananda Kumar, S. R. Venkatachalam, R. Ravikesavan, S. Nakeeran, Venkatesh Selvarangam and P. Kathirvelan | 656-664 |
| 48. | Yield stability analysis in multi-environment trials of hybrid rice (Oryza sativa L.) in Northern India using GGE Biplot Analysis | Somanagoudra Chandrashekhkar, Raman Babu, P. Jeyaprakash, R. Umarani, K. Bhuvaneshwari and S. Manonmani | 665-673 |
|   | Title                                                                 | Authors                                                                                               | Pages |
|---|----------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|-------|
|49.| Assessment of genetic relationship among diverse Indian mustard (*Brassica juncea* L.) genotypes using XLSTAT | Vivek K Singh, Ram Avtar, Mahavir, Nisha Kumari, Manjeet, Rohit Kumar and Vineeta Rathore               | 674-680 |
|50.| Correlation studies on yield and yield components in brinjal (*Solanum melongena* L.) | P. Irene Vethamonai, D. Rameshkumar and R. Ravikesavan                                                 | 681-685 |
|51.| Genetic analysis on the extent of variability among the greengram (*Vigna radiata* L.) Wilczek genotypes | K. Vadivel, A. Mahalingam and N. Manivannan                                                           | 686-689 |
|52.| Assessing the viability and storage life in pollen grains of rice (*Oryza sativa* L.) | P. R. Navitha and P. Sindhumole                                                                      | 690-693 |
|53.| Genetic variability and character association studies in curry leaf (*Murraya koenigii*) | N. Shoba, S. Balakrishnan, P. Paramaguru and K. Vithya                                               | 694-697 |
|54.| Influence of pollen on physicochemical characteristics of selected guava (*Psidium guajava* L.) genotypes | Praveena Jannila, Aditi Chakraborty, Nilesh Bhowmick, Amarendra Nath Dey, Arup Sarkar and Manoj Kanti Debnath | 698-701 |
|55.| Genetic variability for yield and yield attributing traits in *F*$_3$ generation of blackgram | M. Sarvani, P. Shanthi, M. Reddi sekhar and P. Latha                                                 | 702-706 |
|56.| Genetic variability studies in extra large and large seeded *kabuli* chickpea(*Cicer arietinum*) genotypes | B. Manasa, M. Shanthi Priya, V. Jayalakshmi and P. Umamaheswari                                      | 707-712 |
|57.| Appraisal of genetic variability for different quantitative traits in *kharif* maize(*Zea mays* L.) | Bineeta Devi                                                                                           | 713-715 |
|58.| Per se performance of monoecious cucumber land races | S. Praneetha, V. Rajashree and G. Nagaraj                                                             | 716-720 |
