Supplemental Table 1: Haplotype association analysis in PXFG cohort

| Haplotype | PXFG<sup>a</sup> | Control | p value | OR<sup>b</sup> (95 % CI) |
|-----------|------------------|---------|---------|--------------------------|
| G-G-G     | 0.78             | 0.57    | 0.03    | 2.77 (1.11 to 6.9)       |
| T-G-G     | 0.22             | 0.30    | 0.48    | 0.63 (0.25 to 1.63)      |
| G-A-C     | 0                | 0.13    | 0.03    | N/A                      |

<sup>a</sup> Association analysis carried out in pseudoexfoliation patients with glaucoma alone.

<sup>b</sup> Odds ratios calculated may be inflated due to small sample size.

N/A Zero cell count, odds ratio could not be calculated.
