Buddhist Endowments by Śaiva Kings under the Maitrakas of Valabhi in Western India (5th–8th Cent.) and the Yodhāvaka Grant of Dharasena IV, [Valabhi] Year 326

Abstract

The phenomenon of interreligious patronage on the Indian subcontinent in the pre-modern period is best attested in royal inscriptions recording religious endowments. It is striking that most pre-Islamic Indian rulers patronised priests, monks, ascetics, and religious establishments of multiple faiths. The personal religious affiliations of the kings often contrasted remarkably with the patronage patterns followed by them according to the testimony of their epigraphs. The strongest indication for the individual confessions of rulers is given by the religious epithets among their titles. While the ambivalent relationship between the personal beliefs of the kings and their donative practices has been repeatedly described as an expression of Indian religious “tolerance” or of the specific character of Indian religious traditions, this paper emphasises that there were several reasons for the dichotomy. This will be investigated on the basis of the epigraphic material of the Maitraka dynasty, which ruled in Gujarat from the 5th to the 8th centuries. The article also contains an edition and translation of the hitherto unpublished Yodhāvaka Grant of Dharasena IV.

Keywords

India – Maitraka dynasty – Buddhism – Mahāyāna – Śaivism – royal endowments
Introduction

Compared to the early historic period, the so-called early medieval period, especially the time between the 6th and 10th centuries, was characterised by a remarkable decrease in evidence for private religious donations and grants compared to royal religious endowments in many regions of the Indian subcontinent.\(^1\) Hence, a specific, almost pan-Indian, type of documentary evidence is the major source for any study of endowments in this period: royal copper-plate charters\(^2\) in Sanskrit recording pious grants for the regular support of religious persons and institutions.

According to the traditional understanding of a foundation (German: “Stiftung”) in medieval Latin Christianity, “a material endowment constitutes a necessary condition by whose regular revenues the goal of the foundation is fulfilled”.\(^3\) In contrast, an initial endowment (German: “Gründungsausstattung”) of monasteries and temples with property was apparently not obligatory in medieval India. However, the founder of an institution often seems to have petitioned the king as his overlord for a landed endowment for the permanent maintenance of this institution.\(^4\) At least this is what the epigraphic evidence tells us.

If we adopt the terminology of Latin Christianity, this means that, in practice, different people were responsible for the *fundatio* (the foundation) and the *dotatio* (the endowment).\(^5\) In the first three centuries CE, it had been not unusual that a lay follower of Buddhism erected a cave monastery at the Indian West coast (= *fundatio*) and deposited some capital with a guild for the regular support of the monks living in this monastery from the interest of that money (= *dotatio*).\(^6\) But in the early medieval period, private donors seem to have focussed on the foundation of monasteries and temples, whereas kings supported religious persons and institutions through the permanent transfer of the tax revenue from villages. This change in patronage patterns may

have been related to the increasing size of monastic and temple complexes, which probably could not be maintained from a small investment, but instead required the income of whole villages. The role model for this patronage pattern may have been royal endowments for individual Vedic Brahmins (without a discernible temple connection), a type of grant discussed in Brahmanical literature and well attested since late antiquity, which did not require any “foundation” or intervention by third parties.

It is a matter of fact that the concepts and terminology attested in royal copper-plate charters were strongly influenced by Brahmanical theoretical ideas. In addition, Brahmins often acted as the royal officers who composed such endowment records, including the panegyric parts eulogising the dynasty of the donor king. On the other hand, we find indications for Buddhist influence on the wording of endowment records as well: “[...] the members of the Buddhist samgha had to struggle to get their grants formulated according to their ideas and in accordance to Buddhist legal terminology. [...] It may be this wish to gain influence on or even control of the chancellery that is reflected in the changing wordings. In the end the Buddhists managed to push the development into the desired direction [...].” Some Buddhist canonical texts also attempted to make the founder of a monastery responsible for its future maintenance.

Through the increase of religious endowments by kings in the early medieval period, the ruling dynasties, who not only possessed substantial private property, but also had access to the official possessions of the crown, could directly influence and often even dominate the patronage system. With thousands of royal endowments for the maintenance of religious persons and institutions, it was largely the kings who decided which religious traditions were fostered and kept alive. However, many endowment records prove that other parties also exerted significant influence on these processes. Especially when the tax income of villages was granted by rulers, conflicting interests of local, regional, and sometimes even supra-regional elites had to be balanced. With the foundation of monasteries and temples by members of the court, high-ranking officials, traders, etc., somehow preliminary decisions seem to have been made as to which religious institutions would later be patronised by royal endowments. In the endeavour

9 For references to such obligations in Mūlasarvāstivāda texts, see Schopen’s (1996: 101) remark: “The donors themselves determine that they should provide the financial resources for the future maintenance of their vihāras.”
to win the loyalty of local religious leaders and, at the same time, to gain the backing of their secular supporters among the local and regional elites, many Indian kings provided regular sources of income in the form of villages and land for numerous monasteries and temples, which had not been erected in their name, but on their territory. There may have been also cases where the overlord did not actually grant a village or land, but the subordinate ruler “requesting” an endowment merely pursued the legitimation of this legal act. In any case, the rulers reacted with their endowments to the specific needs and interests of their wider courtly environment, which was a “multi-religious world”.

The Maitraka Evidence

The corpus of inscriptions of the Maitraka dynasty, which ruled in Gujarat, mainly on the Kathiawar peninsula, from the 5th to the 8th centuries, is particularly dense and consists of ca. 11010 copper-plate charters issued by 16 different rulers in favour of various religious recipients. The epithet *parama-māheśvara*, “highly devoted to Mahēśvara (= god Śiva)”, was the geographically and chronologically widest-spread and most-used religious title in royal epigraphs of the Indian subcontinent.11 Most of the kings of the Maitraka dynasty were also Śaivas (*paramamāheśvara*), and only some early members of the royal line deviated from this general scheme: Dhruvasena I was described as an adherent of Viṣṇu (*paramabhāgavata*); and Dharapaṭṭa was labelled “a devout worshipper of the sun god” (*paramādityabhakta*). The Maitraka king Guhasena, who reigned at the beginning of the second half of the 6th century, is called a *paramamāheśvara* in two of his three known copper-plate charters, and an “excellent [Buddhist] lay follower” (*paramopāsaka*) in the last of his title-deeds;12 all three epigraphs record Buddhist endowments.

---

10 The number 110 includes all the known records where at least the description of the endowment is preserved.

Conforming to a pattern seen widely in the Indian subcontinent, the religious identification of the Maitraka kings did not prevent a wide-spread distribution of their patronage. The vast majority of the charters of the Maitraka dynasty, i.e., seventy per cent, record endowments to Brahmins, to members of the brāhmaṇa-varṇa. One quarter record grants to Buddhist monasteries (vihāra), which is a rather large share compared with other regions at that time. Only six epigraphs record donations for “Hindu” deities or temples. In many parts of the Indian subcontinent, we do see such a picture of religious non-exclusivity.

This paper will mainly focus on the Buddhist endowments of the Maitraka kings. All the copper-plate charters of this dynasty in favour of Buddhist monasteries record grants of villages or, less frequently, of individual plots of land,

---

13 Five of the six records are published: Bühler 1880; Jackson 1898 (2 grants); Banerji 1931/32; Parikh and Shelat 1988/89.
i.e., primarily the transfer of the tax income of fields or whole rural settlements to already existing vihāras. Unfortunately, we do not know of separate foundation records for the monasteries in the kingdom. But most of the vihāras mentioned in the inscriptions of this dynasty are characterised as ॐkārita, “erected by [a certain person]”. Out of the at least 16 Buddhist institutions referred to in the Maitraka corpus, only a single one definitely had a royal founder: the vihāra established by king Śīlāditya I.14 Śīlāditya I ruled in the early 7th century and had himself called paramamāheśvara. With this exception, the known Buddhist institutions of the Maitraka kingdom were founded by noble ladies, high-ranking officials, learned monks, and traders or other private individuals.

However, the extant endowment records issued for the upkeep of these vihāras were exclusively made by kings. In contrast to the pattern followed in other regions of India,15 the Maitraka charters do not mention petitions by the founders of monastic establishments to the rulers for grants in order to guarantee the maintenance of their foundations. But it can be assumed that the system was perhaps similar. For many of the relevant title-deeds, it cannot be verified when exactly these monasteries, which were sustained by particular royal endowments, had been originally erected. Only if the founders of the institutions were somehow directly connected with the donor kings, can one suppose that not too much time had elapsed.16

More than half of the 26 Buddhist Maitraka endowment records were discovered during excavations around Valabhipur (Bhavnagar District), ancient Valabhī, the capital of the dynasty. Buddhist monastic foundations in or near Valabhī are also mentioned in some copper plates whose provenance is unknown. Only two Buddhist charters were discovered in an entirely different region: in Ambalasa in the Talala Taluk of the Junagadh District.17 There is no evidence, however, that the Maitraka kings might have funded Buddhist institutions outside Kathiawar.

14 The phrase used is asmatkārita, which means “founded by us”. For the text, see Diskalkar 1925: 34, line 22.

16 See below for such examples.
17 Shastri and Dholakia 1969/70: 235–239; 1973/74: 178–184.
The most famous Buddhist vihāra in Valabhi seems to have been the Ṭuḍḍāvihāra, a monastery (for monks) founded by and named after princess Ṭuḍḍā, a Buddhist laywoman and niece of the Maitraka king Dhruvasena I, an adherent of Viṣṇu, who ruled in the second quarter of the 6th century. The first known endowment of a village for the Ṭuḍḍāvihāra is attested in a charter of king Dhruvasena I, Ṭuḍḍā’s uncle, dated 534 CE. In this copper-plate record, the king is called paramabhāgavata, whereas princess Ṭuḍḍā is

---

18 Guhasena was called paramopāsaka in the last of his grants; cf. Bühler 1876b: 207, line 2. His father Dharapaṭṭa was a paramādityabhakta; see, e.g., Bühler 1877: 11, line 9.

19 This amendment is made to underline the fact that there were also nunneries in the Maitraka kingdom; see below.

20 Ṭuḍḍā was his niece, the daughter of his sister (svabhāgineyī), not his sister-in-law, as claimed by Dikshit (1940: 816).

21 Bühler 1875a: 105, line 21.
portrayed as paramopāsikā, “excellent [Buddhist] laywoman”, very much in the same way as king Guhasena, probably a nephew of Dhruvasena I, was labelled a paramopāsaka in 567 CE. The terms upāsaka (m.) and upāsikā (f.) are used in Buddhist texts to denote a special group of lay adherents, who followed five of the altogether ten precepts compulsory for monks; paramopāsaka is a religious title attested for kings, but it was not the only title used to express the Buddhist leanings of Indian rulers.

The Maitraka king Guhasena, the nephew of Dhruvasena I, continued to patronise the monastery founded by the niece of Dhruvasena I some decades before: In 566 CE, he granted four villages (with one charter) to the Ḍuḍḍāmahāvihāra. King Śīlāditya I, a grandson of Guhasena, endowed the Ḍuḍḍāvihāra with one village, three fields, two irrigation cisterns, and four wells with flower gardens, the last four being situated on the city territory of Valabhī, in 605 CE. Despite the evidence of this and at least six more Buddhist endowments, despite the fact that he apparently founded a Buddhist vihāra, and despite claims made in Buddhist texts that he was a follower of Buddhism, Śīlāditya I seems to have been a Śaiva. At the beginning of his rule, in the early 7th century, the official account of the dynastic genealogy was rewritten. One of the major changes was that Śīlāditya I, himself labelled a paramamāheśvara, had only those of his predecessors mentioned who had been Śaivas as well. Thus, he (or rather his chief secretary) left out even Śīlāditya I’s own great-grandfather Dharapaṭṭa, a paramādityabhakta, “devout worshipper of the sun god”. This “Śaiva only” policy seems to have been part of an attempt to homogenise the dynastic tradition. From that time onwards, all the Maitraka kings declared themselves (or were declared) paramamāheśvara. However, still through the middle and second half of the 7th century, the

28 Such an account was contained in each copper-plate charter of the Maitrakas. For the new template used, see Schmiedchen 2018a: 39–40.
successors of Śilāditya I, all Śaiva kings, endowed the Ṛuddāvihāra and other Buddhist monasteries with villages.

The Ṛuddāvihāra, referred to in twelve Maitraka copper-plate records, was called mahāvihāra, “great monastery”, in one of these charters, and vihāramandala, “monastic complex”, in two of the others. At least six economically independent structures seem to have been attached to the Ṛuddāvihāra in the 6th/7th centuries. This development started already rather early: an inscription of king Dhruvasena I, dated 536 CE, mentions a vihāra founded by the monk Buddhadasa as apparently belonging to the Ṛuddāvihāra and receiving an endowment of a village from the Maitraka king. Monasteries established by the monks Vimalagupta and Sthiramati, by the trader Kakkamākila, and by one Gohaka, as well as a Tārā temple erected by the chief secretary (divirapati) Śrī-Skandabhaṭa followed. There have been attempts to identify some of the learned monks, Sthiramati in particular, also Buddhadasa, referred to as founders of vihāras in the Maitraka charters with famous Buddhist scholars known from other sources. But these identifications are rather doubtful, as there have been surely multiple Sthiramatis; and scepticism is probably also justified for a figure like Buddhadasa.

The Divirapati Śrī-Skandabhaṭa, on the other hand, can be relatively clearly identified. Two high-ranking officials of this name, grandfather and grandson, occur in Maitraka inscriptions, no. 1 in the second half of the 6th century, and no. 2 in the second quarter of the 7th century; “our” Skandabhaṭa was probably the second. Both were chief secretaries of the kings and responsible for the composition of their charters, as is mentioned in these records. The use of the title divirapati is attested for Skandabhaṭa I only at the end of his career, whereas Skandabhaṭa II was called divirapati from the beginning of his career. Skandabhaṭa I worked for the kings Guhasena and Dharasena II; he also composed the charter where Guhasena was called paramopāsaka. Vatrabhaṭṭi, probably Skandabhaṭa I’s son, took over in the early 7th century, rewrote the genealogy of Śilāditya I, describing the dynasty as “Śaiva only”, and worked also for Śilāditya’s successors. During the second quarter of the 7th

29 Bühler 1875b: 175, line 8; 1877: 15, line 25; Diskalkar 1925: 39, line 21.
30 Bloch 1895: 383, lines 14–18.
31 For a rough overview, see Shastri 2000: 442.
32 Bühler (1877: 10) was the first to identify this Sthiramati with the “famous pupil of Vasubandhu”. Silk (2009: 384–385), however, rightly remarked that “there might have been more than one Sthiramati”. See also Kramer 2019.
33 Tournier 2020: 888.
34 Bühler 1876b: 207, line 15. For the activity of Skandabhaṭa I, see also Hinüber 2013: 372.
century, Skandabhaṭa II, the son of Vatrabhaṭṭi, followed in his father’s footsteps; Skandabhaṭa II acted as divirapati under the Maitrakas Dhruvasena II and Dharasena IV. Anahila, the son of Skandabhaṭa II, succeeded his father in the third quarter of the 7th century. But in the late 7th century, the family tradition in the divirapati office, which had lasted some one hundred years, apparently ended. It is remarkable, however, that up to this point, the same chief secretaries had been taken over even when a king had not been succeeded by his eldest son, but by a member of a collateral branch. Thus, the continuity in the divirapati family seems to have been even stronger than that in the royal line. It can also be assumed that the chief secretaries were quite influential at the Maitraka court.

This must have had implications for the patronage patterns as well. Skandabhaṭa II apparently founded several Buddhist, notably Mahāyāna, institutions in the Maitraka kingdom. He established a Mahāyānikavihāra in a village named Yodhāvaka in the Hastavapra district in Surāṣṭra (which is the ancient name for Kathiawar or at least parts of the peninsula). This vihāra is the only monastery in the Maitraka kingdom known so far which was explicitly labelled Mahāyāna/Mahāyānika. Divirapati Skandabhaṭa II was also responsible for the composition of the charter dated 644 CE, where Dharasena IV, a Śaiva, endowed this Mahāyānikavihāra with the very same village of Yodhāvaka. Two other charters of king Dharasena IV record endowments of this very same Maitraka king in favour of a temple of the female Bodhisattva named Tārā (Tārāpura, also called devakula or gandhakuṭī), erected by the chief secretary Skandabhaṭa II in the village of Kāṇasīhānaka in Surāṣṭra. Mahāyāna textual influence can be already found in three charters composed by Skandabhaṭa I, who was probably the grandfather of Skandabhaṭa II.

Although the majority of vihāras in Valabhi (and in the Maitraka kingdom) were monasteries for monks, it is quite remarkable that there are several references to apparently economically independent nunneries (also called vihāra) in the capital. Four charters found together during excavations near a tank at Vala/Valabhipur in 1930 record endowments in favour of those convents. Three of the inscriptions refer to a monastic complex for nuns on the city territory of Valabhī, the Yakṣaśūravihāra[maṇḍala]. Nothing is known about

39 Gadre 1934: 74–85, 88–91.
Yakṣaśūra, except for his name. It is only once explicitly said that he was the founder of the monastery named after him. Besides the vihāra probably established by Yakṣaśūra, a second monastery for nuns, founded by Pūrṇabhaṭṭā, the mother of a subordinate ruler (sāmanta) named Kakkuka, was attached to this vihāramandala. The nunneries received, like their “male counterparts”, whole villages from Śaiva kings of the Maitraka dynasty in the 7th century – i.e., from Śilāditya I and Dhrusasena II.

The standard formula to describe the purpose of Buddhist grants in early medieval India, which was also used in the Maitraka records, was threefold: [1] for the maintenance of the local monastic order; [2] for the worship of the Buddha(s); [3] for the upkeep and repairs of the monastic buildings. The relevant passage of a Maitraka charter of 609 CE reads: “for the use of robes, alms-food, beds and seats, medicine to cure the sick of the noble order of monks coming from the four directions and residing there, for the uninterruptedness regarding fragrance, flowers, garlands, lamps, oil, etc. for the cult and ceremonial bathing of the eminent Buddha(s), and for the purpose of repairing [those parts] of the monastery [which are] split and cracked” (tan-nivāsi-catur-ddig-abhyāgatāryya-bhikṣu-saṅghasaya ca cīvara-piṇḍapāta-śayanāsana-gāna-pratyaya-bhaṣajyapaṇḍaretāya bhagavatām ca buddhānāṁ pūjā-snapana-gandha-pālaka-dīpa-tailādy-avyavacchittaye vihārasya ca khaṇḍa-sphuṭita-pratisaṁskārāya).

According to the evidence from the Buddhist endowment records of the 6th/7th-century Maitraka kings, Valabhi, the capital of this dynasty, must have been dotted with monasteries and nunneries, which were mostly non-royal foundations. Unfortunately, no remains of the Valabhi vihāras have been excavated so far. However, the report of the Chinese pilgrim Xuanzang, who travelled through this region in the mid-7th century, corroborates the information on the existence of numerous residential structures for monks in and around Valabhi, stating that there were some one hundred monasteries with some 6,000 monks in the region of “Falapi”.

As has been shown, the epigraphic material attests that Buddhist monks founded monasteries in the city of Valabhi. Royal ladies, high-ranking officials, traders, etc., who were rarely labelled Buddhist lay followers, are said to have

42 Great Tang Dynasty Record 301–302 (online version); 342 (printed version). Xuanzang lists the numbers of monasteries and monks of the regions where he travelled to. However, he does not mention any nunneries.
erected monasteries as well as nunneries in the Maitraka capital. Most of these founders of vihāras might have been permanently based at Valabhi, unlike the Maitraka kings, who must have been frequently absent for military campaigns, as many of their title deeds were issued from so-called “victory camps” (vijayaskandhāvāra), especially from the 7th century onwards. However, in the 6th/7th centuries, the Valabhi monasteries received a number of villages as regular sources of income from the Maitraka kings, which had strong personal leanings towards Śaivism. This patronage pattern is all the more interesting, as the rulers of Valabhi did not merely officially support Buddhism as such, but they extended their patronage, among others, to specific Buddhist groups, which could be regarded as “minorities” – i.e., to nuns (on the city territory of Valabhi) and to Mahāyānins (outside the city limits).

The last extant Buddhist grants of the Maitraka kings date from around 675 CE, while donations to Brahmins continued to be made until the end of Maitraka rule (that is, until 765/766 CE). There is some evidence that internal reasons may have contributed to a decrease in royal patronage of Buddhism. This can be deduced from a comparison of the stipulations in the Buddhist and Brahmanical endowments of the Maitrakas. It is stated that the endowments ought to be utilized “according to the proper condition of a religious grant”. A complete clause of this kind in a Brahmanical endowment record might read, e.g.: “Therefore not even a slight hindrance should be made or [any] objection [be raised] by anyone against the one (i.e., the Brahmanical donee) who is, according to the proper condition of a gift in favour of a Brahmin, enjoying [the land/village], cultivating [it], having [it] cultivated, or assigning [it to others for cultivation]” (yato ’syocitayā brahmadāyasthitā bhū[ṁ]jataḥ kṛṣataḥ karṣayataḥ pradiśato vā na kaiścit svalpāpy ābādhā vicāraṇā vā kāryā). This regulation entitled the recipient to simple usufruct as well as to – at least de jure – more complex usages of the object donated. In particular, when plots of arable land were singled out and then bestowed, the stipulation can be seen.

43 Some of the military camps lay just outside the city gates of Valabhi (valabhīpradvāra), whereas others were situated at more distant places, such as present-day Kheda, Bharuch, and Vadnagar in Gujarat, or Ujjain in Madhya Pradesh.
44 See above. For the Mahāyānikavigāra, see the edition and translation of the relevant charter in the appendix.
45 For the last dated Maitraka endowment to a Buddhist monastery, see Diskalkar 1925: 57–63. For the last dated copper-plate charter of the Maitrakas, a Brahmanical grant, see Fleet 1888: 171–191.
46 See, e.g., Sukthankar 1919/20: 257, lines 19–20.
as even more important, because it permitted the beneficiaries to carry out different degrees of agricultural activity.

A similarly complex equivalent was also used in some Buddhist grants of the Maitrakas. But often the formula was altered – perhaps after a request by monastic clergy for a more appropriate Buddhist adaptation. Such a modified phrase reads, for example: “Therefore, no impairment should be made or [any] objection [be raised] by anyone against those appointed there, who are having what grows there collected” (yataḥ tatādhikṛtānāṁ yat tatropadyate tad udgrāhāyatāṁ na kenacit pratiṣedho vicāranā vā kāryā). Under king Śilāditya I, a particular formula, stressing the rather passive approach of Buddhist beneficiaries, was used: “Therefore, [the endowment,] being enjoyed according to the proper condition of a rent-free holding in favour of a deity, shall not be obstructed by anyone” (yata uciṭayā ca devāgrāhārasthitīyā bhujyamānakaḥ na kaścit paripanthaniyāḥ).

In comparison to Brahmanical endowments, this somewhat ambiguous handling of the prescriptions in Maitraka grants to vihāras may be explained by the Buddhists’ generally strict attitude towards agriculture and their lack of interest in getting involved in farming.

In many parts of India, a certain decline in Buddhist donations by royal figures can be observed during the early medieval period. Inversely, Brahmins (and later, increasingly, “Hindu” temples) were favoured on an even larger scale. As mentioned, one reason for this development might have been the comparative lack of interest which the Buddhist monasteries showed in the village life; their traditional base in India was in towns and cities rather than the countryside. Brahmins, by contrast, seem to have fulfilled the expectations of the kings, who had their own “agenda” for the official patronage; and Brahmins apparently shaped the rural landscape in a much better way – quite

49 See, e.g., Kielland 1885: 339, line 29. The term devāgrāhāra seems to have denoted grants for collective bodies. See also the edition and translation in the appendix. For agrahāra/agrāhāra, see Sircar 1966: 13–11.
50 Schmiedchen 2019: 208–209. The Chinese Buddhist pilgrim Yijing quoted the comment of a Vietnamese monk on the practice followed in Tāmralipti in the 7th century (Record of the Buddhist Religion 62): “The priests in this monastery are mostly observers of the precepts. As cultivation by the priests themselves is prohibited by the great Sage, they suffer their taxable lands to be cultivated by others freely, and partake of only a portion of the products. Thus they live their just life, avoiding worldly affairs, and free from the faults of destroying lives by ploughing and watering fields.”
a number of them were personally active in agriculture, particularly those that received small plots of land, not whole villages.

Conclusion

The kings of the Maitraka dynasty, like many Indian rulers, not only supported the religious groups or deities they personally followed. One conventional explanation for the fact that many pre-Islamic Indian rulers patronised different religious groups, i.e., made endowments in favour of the Buddhist, “Hindu”-Brahmanical, and Jaina traditions, has been Indian religious tolerance and/or the “specific character of Indian religious traditions”, i.e., that the differences between these religions were not as strict as between different belief systems in other parts of the world. In his critique on the assumption of the existence of a “single Hindu religion” since the early medieval period, if not even earlier, Alexis Sanderson has noted: “It is widely believed that this complex unity displays an exemplary degree of religious tolerance, not only between Vaidikas, Vaiṣṇavas, Śaivas, Śāktas, Sauras, but also between these and the followers of the other two major faiths of the age, namely Buddhism and Jainism.”

There have been tendencies in the “Hindu” traditions to somehow incorporate the Buddhist (and also the Jaina) faiths, for instance, through declaring the Buddha as one of the avatāras of the god Viṣṇu. But in Buddhist and Jaina normative texts, we do find a strong emphasis on their specific identity and distinctiveness. The Sanskrit endowment records also have preserved these traces of distinctions between different religious groups. Besides, Indian rulers would have chosen their religious epithets not just “out of the blue”, even if one has to admit that the predominant preference for being labelled as parama-māheśvara (“highly devoted to Śiva” or even “paramount Śaiva”) may have been related to a certain “mainstream” agenda, using this epithet similarly to the

53 Sanskrit sources did not only differentiate Buddhism and Jainism from “Hindu” systems, but also the Vaidika (Vedic-Brahmanical), Vaiṣṇava, Śaiva, Śākta (goddess-worship), and Saura (sun-worship) traditions; cf. Sanderson 2015: 156.
54 Lévi 1937; Schmiedchen 1993; 2010/11; Sanderson 2009; Hinüber 2009; 2013; Chitwood et al. 2017: 29–36.
imperial titles paramēśvara (“paramount sovereign”) and paramabhaṭṭāraka (“supreme ruler”).

Despite this distinctiveness, there was a kind of glue for the Buddhist, “Hindu”-Brahmanical, and Jaina endowment cultures. This was the overarching concept of puṇya, religious merit, to be obtained, inter alia, through religious gifts and donations, grants and endowments. In this context, it is worth mentioning that the formula used to describe the religious merit (puṇya) acquired by royal grants was, despite minor modifications, a pan-religious one in the great majority of official charters, regardless of who the donees were. Mostly, royal endowments (as well as many private gifts) were made “for the increase of the religious merit” of the donor and his parents (e.g., mātāpitror ātmanaś ca puṇyābhivr̥ddhayē; mātāpitroḥ puṇyāpyāyanāya). This was a kind of basic formula, which could be modified and extended. Notwithstanding the differences, the common, trans-religious goal of all those donations was to gain puṇya. The extant epigraphs are ample evidence that there was a kind of consensus among the followers of the various beliefs regarding the religious merit of pious grants. Future kings were requested to preserve existing donations and were promised a share of puṇya. This consensus must have been a major precondition for the coexistence of different endowment cultures on a royal level. However, this patronage system only worked as long as there existed a consensus regarding the puṇya concept. With the advent of Islam, this consensus ceased to exist.

Appendix: Yodhāvaka Grant of Maitraka Dharasena IV, [Valabhi] year 326, Māgha ba. 5

Date: year 326 [of the Valabhi era], month Māgha, dark half, 5th titthi = Friday, 24th December 644 CE (if regular and pūrṇimānta)\(^58\)

Edition: no previous edition; only translation of the grant portion in Bhandarkar 1872: 45–46; facsimile not published, although announced in Indian Antiquary 1 (Bhandarkar 1872)

Documentation: ARIE 1963/64: p. 45, A 25 ["Museum No. BB 22 (58)"]; ARIE 1964/65: list of photographs, p. 217, no. 5344 [described as "plate facing 1A 1, p. 64"]

Provenance: original find-spot apparently unknown; according to Bhandarkar 1872, sent to the editor of Indian Antiquary 1 (James Burgess) from Bhavnagar\(^59\)

Depository: Chhatrapati Shivaji Maharaj Vastu Sangrahalaya (CSMVS), Mumbai (museum accession no. 58)

Condition: only the second plate of a charter of originally two plates preserved; moderate state of preservation; right-hand edge as well as some portion around the left hole broken off

Format: height of the preserved plate: 26.5 cm; width: 32 cm; engraved on one side only; two binding holes at the top; neither rings nor seal preserved

Language / Script: Sanskrit / Late Western Brāhmī

Summary: grant of the village of Yodhāvaka in favour of the Mahāyānikavihāra in Yodhāvaka; the only known Maitraka charter which is explicitly in favour of a Mahāyāna monastery

References: Kielhorn 1898/99: no. 482; Bhandarkar 1927/28–1935/36: no. 1348; Shastri 2000: 419, no. 67B; Njammasch 2001: 366, no. 73.

Photographs: photograph of the original received from the Prince of Wales Museum (now CSMVS), Mumbai, in March 1993; digital photograph received from the CSMVS in October 2011

---

\(^58\) This is the earliest attested date for Dharasena IV.

\(^59\) The find-spot is not known, but the inscription records a grant in the medieval district of Hastavapra, present-day Hathab in the Bhavnagar Taluk and District, 25 km south-east of Bhavnagar and some 60 km south-east of Valabhipur.
The text has been read from the original as well as from the photographs. For the transliteration rules followed here, see Balogh and Griffiths 2019. The option of hyphenation in compound words is not used in this edition. These are the editorial conventions followed: (i) for line numbers at the beginning of the line; ① for stanza numbers; ⊕ for space due to the position of the binding hole; (abc) for text not clearly readable due to corrosion; [abc] for confidently restored text in lacunae where portions of the plate are broken off; {abc} for superfluous text deleted by the editor; ¡abc! for scribal errors; ⟨abc⟩ for supplied text, either omitted by the scribe or emended by the editor for scribal errors.

This is the beginning of the description of Dhruvasena II Bālāditya, the father of Dharasena IV, current ruler and issuer of this charter. The description must have started on the lost first plate.

ENDOWMENT STUDIES 5 (2021) 107-134
Translation

(1–7) […] Śrī-Dhruvasena [ii],66 highly devoted to Śiva; who […] all the former kings by [his] good deeds;
who, like an incarnation of heroism, was a conqueror even of [those] districts which are difficult to conquer;
who, like Manu himself, was petitioned by subjects whose sentiments were full of devotion because of [his] high virtues;
who, [like] the moon, mastered the arts in [their] totality (/ attained all digits), caused delight, was bright [and] faultless (/ spotless);
who, [like] a constantly rising sun, wiped out the dense darkness in the quarters [of the sky], which were covered by [his] great splendour;
who was versed in both the theories, [1] that of kingship as well as [2] that of Śālāturīya (= Pāṇini),67 because [(1) in politics] he inspired in [his] subjects the highest confidence, which was related to material comfort (artha), associated with quite manifold objectives, and full of profit, as he was capable of deciding on [matters of] concord, dispute, and indifference, as he gave the correct order in the [right] place, [and] as he caused the arrangement of good [people] by the rule of promotion [according] to [their] virtues (/ as [(2) in grammar] he put a suffix after roots, significant, with

62 Anuṣṭubh metre. Cf. Pargiter 1912: 249, no. 2; Sircar 1965: 180, no. 23.
63 Indravajrā metre. Cf. Sircar 1965: 200; also 183, no. 43 and n. 2.
64 Anuṣṭubh metre. Cf. Sircar 1965: 194, no. 123.
65 Conventions: (1–2) for line range; ① for stanza numbers; [...] for lost text; [abc] for restored and supplied text as well as for words inserted for clarification; (/ abc) for a pun; (= abc) for explanations added; (abc) for Sanskrit terms added.
66 Xuanzang visited the Maitraka kingdom during Dhruvasena ii’s reign. He describes this region without mentioning the name of the dynasty, and reports that “Dhruvapaṭu”, the Buddhist king of Valabhi, was “a nephew of the former King Śīlāditya of the country of Mālava (i.e., Maitraka Śīlāditya I – AS) and the son-in law of the present King Śīlāditya of the country of Kanyākubja (i.e., Harṣa of Kanauj – AS)”; Great Tang Dynasty Record 302 (online); 342 (printed).
67 This is a pun (śleṣa) on politics and grammar. For a translation of this passage, see, for instance, Hultzsch 1892: 91.
indicatory letters for various functions, and completed by an augment, as he was well-versed in euphonic rules, the analysis of compounds, and [their] composition, as he put the correct substitute in the place [of another word], [and] as he caused the formation of correct [words] by the performance of the lengthening of vowels (guna and vrddhi);

who, although of strong prowess, had a soft heart out of mercy;

who, although learned, was not haughty;

who, although handsome, was unagitated;

who, although constant in friendship, threw out the wicked;

[and] whose famous second name Bālāditya (= “morning sun”) was appropriate, as the world had been pervaded by the devotion (/ redness) of the people, which was produced at the time of [his / the sun’s] rise.

(7–11) His son Śrī-Dharasena [iv], the paramount sovereign, overlord of great kings, supreme ruler, world emperor, highly devoted to Śiva, who had been favoured by [his] respected grandfather (śrī-ajjaka);68

who [like Śiva] bears a crescent of the moon on [his] forehead, i.e., the mark of a scar [produced through rubbing] the earth, while bowing down to his (= the father’s) foot-lotuses;

who, already in [his] childhood, was distinguished by sacred learning, which was as spotless as the charm of the pearl-ornaments fixed to [his] ears;

the fingers of whose hand-lotuses are [washed in the water sprinkled] at donations;

who, by imposing light taxes, has intensified the creation of pleasure for the earth as if for a girl (/ by taking [her] soft hand [= marrying her]);

who, with regard to [his] bow, is like [an incarnation of] archery, as he hits [all kinds of targets];

whose decrees resemble the crest-gems which are borne on [their] heads by the circle of [his] bowing vassals – being of good health, notifies truly all [the officers] as they are concerned:

(11–18) Be it known to you that [I] have bestowed as religious gift (dharmadāya), with a libation of water, in order to augment the religious merit of [my] parents, upon the noble Mahāyāna order of monks coming from the four directions to the Mahāyāna monastery erected by Divirapati Skandabhaṭa in the Yodhāvaka village in the Hastavapra

---

68 For the meaning of ajjaka (from Sanskrit āryaka), see Fleet 1888: 186–188, n. 1. The epithet śrī-ajjaka-pādānudhyāta is attested for Dharasena iv in his earliest inscriptions; it seems to refer to a specific relationship of the (new) king to his grandfather, i.e., Kharagraha I. Shastri (1989: 54) interpreted this phrase as referring to the maternal grandfather, whom he believed to have been Harṣa of Kanauj. For doubts regarding this assumption, see Virji 1952: 78–79.
district (āhāra) in Surāṣṭra, three of the four parts of the very same Yodhāvaka village for the use of robes, alms-food, beds and seats, medicine to cure the sick, etc., and for fragrance, incense, flowers, lamps, oil, etc. for the cult and [ceremonial] bathing of the eminent Buddha[s], and for repairing [those parts] of the monastery [which are] split and cracked, and for the sustenance of the servants (pādamūla), and the fourth part of the very same Yodhāvaka village for the further digging and excavating as well as repairing of cracked [parts] of the tank dug by Divirapati Skandabhaṭa at the very same place – thus, this village for the monastery and for the tank, with principal tax (udraṅga), with additional taxes, with the [income] grown and blown, with the levies in corn and gold, with [the right to punish] the ten offences, with forced labour as it arises, not to be touched with the hand by all royal officers, with the exclusion of grants to [gods and] Brahmins given earlier, according to the maxim of barren land, to last as long as the moon, the sun, the ocean, the earth, rivers and mountains [exist].

(18–21) Therefore, no impairment should be caused by anyone against this noble Mahāyāna order of monks, which is, according to the proper condition of a rent-free holding in favour of a deity (devāgrāhāra), enjoying [the village], cultivating [it], having [it] cultivated, or assigning [it to others for cultivation]. [Future] pious kings, whether born in our dynasty [or in] another, should approve of and protect [this] our donation, bearing in mind that rulership is perishable, that human existence is...

69 This means that the very same village where the monastery itself had been erected was donated.

70 This is an amendment to the standard formula. For pādamūla, see Kielhorn 1898: 252; Schmiedchen 1993: 590–591. This formula appears in Maitraka endowments for Buddhist monasteries as well as for "Hindu" temples.

71 This formula seems to be rather improvised, perhaps due to the fact that a tank did not belong to the standard items mentioned in such contexts. The term bhūyah-kaḥanana, "further digging", appears to be irregular. The expected form would be kaḥanana, but the long ā is very clear and distinct. The author might have had in mind a causative form (e.g., kaḥanayana), like in kaḥānīta in the first part of the same compound. The word utk[ī]raṇa does not seem to be attested in dictionaries, but may be regarded as a kind of synonym for kaḥanana, as ut-kiṛati can, inter alia, mean “to dig up, excavate”; cf. Monier Williams 1899: 176. I would like to thank Dániel Balogh for a discussion about this passage.

72 The widely used, but problematic term udraṅga defines the fiscal privileges of a grant; cf. Ghoshal 1929: 276, 423; Altekar 1934: 213–215; Mirashi 1955: 21, n. 6; Sircar 1966: 349; Njammasch 1985; Hinüber 2004: 313. For the formula sa-bhūta-vāta-pratyāya, see Bühler 1875a: 106. Bühler (1876a: 151) has also translated it as "together with its green and dry produce". Furthermore, Schmiedchen 2014: 144.

73 For the interpretation of the problematic phrase bhūmi-cchidra-nyāyena, see Hinüber 2005.

74 This is one of the long and comprehensive stipulations largely inspired by Brahmanical endowments. For a discussion of the potential implications of the wording of this stipulation, see above.
uncertain, and that the reward of land grants is a common one.\textsuperscript{76} And it has been said\textsuperscript{77}:

\begin{itemize}
\item[(21–22)] By many kings, beginning with Sagara, the earth has been enjoyed. Whosoever, at any time, possesses the land, to him belongs, at that same time, the fruit. \textsuperscript{1}
\item[(22–23)] Those properties which were here, out of fear of poverty, made into religious donations by kings, are similar to garlands already used [as offerings to gods]. Which good man, indeed, takes them back? \textsuperscript{2}
\item[(23–24)] For sixty thousand years, the giver of land rejoices in heaven. He who confiscates or approves of [the confiscation of a grant] shall live for the same [number of years] in hell. \textsuperscript{3}
\item[(24–25)] The messenger is prince (rājaputra) Dhruvasena in this matter.\textsuperscript{78} Written was this [charter] by Skandabhaṭa, son of chief secretary (divirapati) Vatrabhaṭṭi,\textsuperscript{79} superintendent for [concord and] dispute. The year 326, [the month] Māgha, the dark [fortnight, the lunar day] 5. [This is] my signature.
\end{itemize}

\textsuperscript{76} Although instead of the term \textit{puṇya}, “religious merit”, the term \textit{phala}, “fruit/reward” has been used in the compound \textit{bhūmi-dāna-phala}, “reward of land grants”, this is one of the common phrases regarding the sharing of religious merit. For a discussion of the possible implications of the potential sharing of religious merit, see above.

\textsuperscript{77} Following the common practice in copper-plate charters, the Maitraka endowment records also quote several verses on the merit of granting land and on the punishment for confiscating it, which were very popular all over India, in the concluding portions of the title-deeds, or as Pargiter (1912: 248) put it more than one hundred years ago: “It was a common practice in making grants of land in ancient India for the donor to emphasize the gift and endeavour to secure its permanence by inserting in the deed of grant one or more verses which had been laid down as law regarding gifts of land. Such verses either affirmed the beneficent nature of such gifts of land, or proclaimed the merit and blessings which accrue to those who make such gifts and those who scrupulously respect them, or denounced the iniquity of those who deprived grantees of the land given, and declared the punishment which awaits such evil-doers.” These are the three most popular stanzas used in Maitraka copper-plate charters.

\textsuperscript{78} The first messenger (dūtaka) of Dharasena IV was prince Dhruvasena, probably his second cousin, one of the sons of his father’s first cousin. Dhruvasena III (ruler no. 13 in the pedigree above) was the successor of king Dharasena IV.

\textsuperscript{79} Whereas this description makes it clear that Skandabhaṭa II was the composer of the charter, it cannot be ruled out that the founder of the monastery had been Skandabhaṭa I. However, I regard it to be more likely that the \textit{vihāra} had been established by Skandabhaṭa II and that the endowment had been made shortly after the foundation.
Final remark
The title *sandhivigrahādhikṛta* was common for the authors of Maitraka copper-plate charters. Hinüber (2009: 166 and [332], n. 53) has translated the more complete title *sandhivigrahādhikaraṇādhikṛta*, as “Vorsteher der Abteilung für (innere und äußere) Eintracht und Streit”. See for this title also Einicke 2009: 446–447; Schmiedchen 2014: 189–190. For *sandhi-vigraha*, see Olivelle 2011: 131–139. So far, the *sandhivigraha* office has often been (mis)understood in a very modern way as “foreign office”. Altekar (1931/32: 139), for instance, has made the following remark in this context: “The genealogy had naturally to refer to the exploits of the ancestors of the donor, material for which was expected to be preserved in the archives of the foreign office, and its head was, therefore, expected to draft the charter containing the names and exploits of the donor and his ancestors.”
