**Composition, Distribution, Fishing Activities, and Physico-Chemical Characteristics: The Case of Jemma and Wonchit Rivers, Amhara Region, Ethiopia**

Published On: March 24, 2016 | Pages: 010 - 014

Author(s): Dereje Tewabe*, Birhan Mohamed, Mihret Endalew and Binyam Hailu

The distribution of fish species in Jemma and Wonchit Rivers was studied from November 2012 to May 2014 based on samples collected during wet and dry seasons using gillnets of 60, 80, 100, 120 and 140 mm stretched mesh sizes. Labeobarbus intermedius, Labeobarbus nedgia, Heterobranchus longifilis, Bagrus docmak, Varicorhinus beso and Oreochromis niloticus are commercial ...
Fluoxetine Induced Erythematous Maculopapular Rash: A Case Report

Author(s): Sumit Kumar Gupta* and Bhavuk Garg

Drugs known as Selective Serotonin Reuptake Inhibitors (SSRI) are amongst the most commonly described psychototropic drugs. These are used in the treatment of a multitude of Psychiatric and non-psychiatric conditions and are also being explored as potential immunosuppressants/immunomodulators [1]. ...
