Supplementary Figure 2. Gating strategy. Representative gating strategy in (A) cervix and (B) blood for CD4+ T cells (second to last panel) and CD45RA- CD4+ T cells (last panel). Cells were gated on singlets, lymphocytes, live cells, CD3+CD4+ and CD45RA- cells. (C) Representative gating strategy for CD4+ T cells and CD45RA- CD4+ T cells expressing and coexpressing β7, αE, CCR5 and CD38. α4β7+ - cells β7+ and αE-; αEβ7+ - cells β7+ and αE+.
