Accelerated differentiation of microencapsulated NPCCs

Supplementary Fig. 1. Intraperitoneal glucose tolerance test (IPGTT) and area under the curve (AUC). (A) IPGTT in 4 weeks after transplantation (n=4 for control [Con]; n=7 for Diff [–]; n=6 for Diff [+] group). (B) IPGTT in 8 weeks after transplantation (n=6 for Con; n=6 for Diff [–]; n=5 for Diff [+] group). (C) AUC of IPGTT in 4 weeks after transplantation. (D) AUC of IPGTT in 8 weeks after transplantation. Diff (–), undifferentiated neonatal porcine pancreatic cell cluster (NPCC); Diff (+), differentiated NPCC.
