Erratum: The Combined NVSS–FIRST Galaxies (CoNFIG) sample – I. Sample definition, classification and evolution

by M. A. Gendre* and J. V. Wall*

Key words: surveys – galaxies: active – galaxies: luminosity function, mass function – galaxies: statistics – radio continuum: galaxies.

The paper ‘The Combined NVSS–FIRST Galaxies (CoNFIG) sample – I. Sample definition, classification and evolution’ was published in Mon. Not. R. Astron. Soc., 390, 819–828 (2008). The caption and the images in figs 1 and 2 in that paper are in error, and the correct figures are important in the context of the work presented.

Fig. 1 shows the FIRST contour plot of an FRI source, 3C 272.1, where the regions of highest surface brightness are located along the jets.

Fig. 2 shows the FIRST contour plot of an FRII source, 3C 223, displaying distinct hot spots at the ends of the aligned lobes.

ACKNOWLEDGMENTS

The authors would like to thank Martin Hardcastle for pointing out the error in the manuscript.
