For citation: Benson P. A Description of Dzә (Jenjo) Nouns and Noun Phrases, an Adamawa Language of Northeastern Nigeria. Vestnik of Saint Petersburg University. Asian and African Studies, 2020, vol. 12, issue 4, pp. 490–504. https://doi.org/10.21638/spbu13.2020.402 (In Russian)

Dzә [jen] is an Adamawa language spoken in some parts of Taraba, Adamawa and Gombe states in Northeastern Nigeria. The study presented in the article syntactically describes nouns and noun phrases in Dzә. In an attempt to document Dzә and taking into consideration that Dzә is an under-investigated and under-documented language, the result will provide important data to typological research and to linguists working on Adamawa languages. The study adopts a descriptive research design in collecting, describing and analyzing the data. The data was obtained from fieldwork in December 2014, personal observations of daily conversations, introspection and the Dzә Bible. In the article, a brief overview of the phonology and tone of Dzә is provided. It also shows the different kinds of nouns, pronouns and noun phrases in Dzә; simple and complex noun phrases. The language is rich in pronouns, consisting of subject pronouns, object pronouns, reflexive pronouns, interrogative pronouns and possessive pronouns. As it is with most African languages, the elements that constitute a noun phrase occur after the head noun. These elements are articles, demonstratives, possessives, adjectives, numerals, quantifiers, genitive constructions (inalienable and alienable possessives) and relative clauses. This is a preliminary study of Dzә and it is open for further research and contributions.

Keywords: Dzә, nouns, noun phrases, Jenjo, Adamawa.

Introduction

Dzә [jen] is an Adamawa language spoken in some parts of Adamawa, Taraba and Gombe States, Northeastern Nigeria. The original name of the language is Dzә but it is widely known as Jenjo. It is a minority language that belongs to the poorly studied Adamawa languages. Its speakers are predominantly in Jen (their capital home), Karim-Lamido local government area of Taraba State. The number of Dzә speakers is also not yet known.
With this in mind, there is a need to describe the minority languages in Nigeria especially those of Northeastern Nigeria so as to prevent them from dying.

According to T. Givón, nouns in any language includes words that express the most time-stable concepts, e.g. rock, tree, mountain, house etc [1, p. 51]. E. T. Payne further states that to determine whether any given word is a noun or not, one must first determine the morphosyntactic characteristics of prototypical nouns. Then the grammatical category of a questionable word can usually be determined according to how closely the word follows the morphosyntactic pattern of prototypical nouns [2, p. 33]. However, there will always be some truly ambiguous examples as well as words that function sometimes as a verb and sometimes as a noun depending on the context. There is also the issue of nominalization. For example, in Dzə ‘i’ is a nominal marker which turns verb into noun lēbī is ‘sing’ ilēbī is ‘singer’. Their idea is prescriptive rather than descriptive. On the other hand, A. Radford states that a noun phrase is a phrase whose head is a noun, for example a structure such as “The king of Utopia” is a noun phrase comprising the head noun “king”, the complement “of Utopia” and its specifier (determiner) “the”. Therefore, noun phrase is a phrase consisting of a noun and other dependents and the noun serving as the head of the phrase [3, p. 87]. This study describes the nouns and noun phrases in Dzə. The study adopts descriptive research design in collecting, describing and analyzing the data. The sections that follow describe the phonology, tone and noun phrases in Dzə.

The phonology of Dzə

Consonants

According to N. K. Othaniel, there are 33 consonant phonemes in Dzə language [4]. The consonant phonemes are symmetrical in terms of voicing. These consonant phonemes are shown in the table 1 below.

| Table 1. Dzə consonant sounds |
|--------------------------------|
| bilabial | labio dental | alveolar | post alveolar | palatal | labio velar | velar | glottal |
| p b | t d | c j | k p q b | k g |
| affricate | t s d z | y y d j | n | |
| nasal | m m | n | | | |
| fricative | f v | s z | f j | | | | w |
| approximant | l | j j | y y | | w |

Vowel

The vowel inventory of Dzə consists of nine distinct oral vowels, seven nasalized vowels and six breathy vowels (Table 2–4).
Table 2. Oral vowels

|                  | +ATR VOWELS |                  | −ATR VOWELS |                  |
|------------------|-------------|------------------|-------------|------------------|
|                  | front       | central         | back        | front           | central         | back        |
| close            | i           |                 | u           |                 | i               |             |
| mid              | e           |                 | o           | e               |                 | o           |
| open             |             |                 |             |                 | a               |             |

Table 3. Nasalized vowels

|------------------|-------------|------------------|-------------|
| close            | i           | i                | ũ           |
| mid              | e           |                 | ō           |
| open             |             | ō                |             |

Table 4. Breathy vowels

|                  | front       | central         | back        |
|------------------|-------------|------------------|-------------|
| close            | i           |                 | u           |
| mid              | e           |                 | ō           |
| open             |             |                 | ō           |

Tone

The Dzə language has contrastive three level tone: H, M, L. example: H: bí ‘song’, M: bĩ ‘metal’ L: bi ‘word’. There are also two contrastive contour tones which are H/L, H/M, M/L, H/R, L/R, M/R.

Nouns and Pronouns

Nouns may be derived from verbs by using the nominalizer prefix –i. Most of the derived nouns refer to doer. See table 5 below. Detailed description of nominalisation is not relevant here. Here are the examples.

Table 5. Nominalized Form

| Verb   | Gloss     | Nominalized form | Gloss     |
|--------|-----------|------------------|-----------|
| tenwá  | announce  | i-tenwá          | announcer |
| tsáki  | mourn     | i-tsáki          | mourner   |
| dʒòwé  | travel    | i-dʒòwé          | traveller |
| lè     | sing      | i-lèbí           | singer    |
| dʒò    | buy/sell  | i-dʒò-niŋ         | buyer     |
The following section describes the different types of nouns in Dzə.

**Proper Names (Nouns)**

“proper names are nouns that are used to address and identify particular persons or culturally significant personages or places” [2, p. 39]. Examples of such nouns in Dzə are:

1. **Place:** Dzə ‘Jen’, Bwè, Nwàkó, Tànko, names of villages around Jen’ Môn Binuwe, ‘River Benue’ Môn Taraba ‘River Taraba’.
   
2. **Person:** Fillah ‘Fillah’, Filalo, Fijamilo, Kanmila “these are all common names of Dzə people.

**Count and Mass Nouns**

Count nouns refer to things that can be counted and mass nouns refer to substances like water, sand, air and wood [2, p. 41]. The plural form of count nouns in Dzə are marked by the plural marker ‘e’ examples are: yɛ̀ ‘chicken’ e-yɛ̀ ‘chickens’, yɔ̀ ‘pig’ e-yɔ̀ ‘pigs’, idzwə ‘dog’ e-idzwə ‘dogs’, pɨ́sahù ‘school’, e-pɨ́sahù ‘schools’, ninpù ‘goat’ e-ninpù ‘goats’. Examples of mass nouns are nɨ̀ŋmari ‘rice’, nɨ̀ŋyì ‘beans’, mɨ̀ŋ water and hywə ‘sugar’ nywì ‘oil’ tfukwə ‘salt’ and more below. The following comes either under the count nouns or mass nouns.

**Common Nouns**

General names of place, person and thing. They are not capitalised. Examples are:

2. **Place:** hywə ‘country’ (Lit. land), lômwę ‘market’, kwañfi ‘church’, pɨ́pinwə ‘place of worship’, pɨ́pakù ‘mosque’.
   
3. **Person:** iñò ‘king’, klo ‘king maker’ ijì ‘person/human’.
   
4. **Thing:** nɨ́bînhu ‘animal’, nwañkɔ̀və ‘clan’ vi ‘day’, dɔrò ‘book, hû ‘grass, kɔ ‘tree’.

**Concrete Nouns**

Names of persons, places and things that are tangible with one or more of the senses.

3. **Person:** ibwì ‘man’, ije ‘woman’ imwò ‘child’, iñàfi ‘elder’ itwè ‘owner/lord’.
   
4. **Place:** fônî ‘farm’, pɨ́sahù ‘school’.
   
5. **Thing:** bi ‘metal’, mambìñ ‘frog’ fjò ‘pocupine’, ì ‘crocodile’, lwèî ‘canopy’.

**Abstract Nouns**

Names idea, feeling and quality. Examples:

4. sùkù ‘shame’, yidi ‘love’, nyıtò ‘peace’ ywâbè ‘bitter’, pwàffiti ‘anger’, lalí ‘happiness’, mwohë ‘beauty’, ibè ‘poverty’.

**Compound Nouns**

These are nouns that are formed by joining two simple nouns. Examples are:

(5) a. \(\text{ìf} + \text{a} + \text{iyé} = \text{ìfàiyé}\) ‘female’

b. \(\text{ìmwò} + \text{ibwi} = \text{ìmwòibwi}\) ‘boy’

c. \(\text{niŋ} + \text{tsikù} = \text{niŋtsikù}\) ‘pillow’

d. \(\text{niŋ} + \text{chi} + \text{niŋ} = \text{niŋchìniŋ}\) ‘wealth’

e. \(\text{ìmwò} + \text{sahu} = \text{ìmwòsahu}\) ‘student’

f. \(\text{ìm} + \text{na} + \text{s} + \text{ìŋ} = \text{ìmna}sìŋ\) ‘teacher’

g. \(\text{nwà} + \text{kò} + \text{vò} = \text{nwàkòvò}\) ‘clan’

**Pronouns**

There are several pronouns in Dzə. Some occur as subject and others as object pronouns. The following are the examples of pronouns found in Dzə (Table 6, 7).

*Table 6. Subject pronoun*

| Person | Singular | Plural |
|--------|----------|--------|
| 1st    | \(n\) ‘I’ | \(bì\) ‘we’ |
| 2nd    | \(à\) ‘you’ | \(bò\) ‘you’ |
| 3rd    | \(ò\) ‘he/she’ | \(è\) ‘they/it’ |

*Table 7. Object pronoun*

| Person | Singular | Plural |
|--------|----------|--------|
| 1st    | \(mì\) ‘me’ | \(bì\) ‘us’ |
| 2nd    | \(mò\) ‘you’ | \(bò\) ‘you’ |
| 3rd    | \(wò\) ‘her/him’ | \(là\) ‘them’ |

**Possessive Pronoun**

The possessive pronouns in Dzə are formed by adding a genitive marker “\(a\)” before the object pronoun (singular) and the possessive morpheme “\(vò\)” before an object pronoun (plural) (Table 8). Except for 3rd person which is a subject pronoun.

*Table 8. Possessive Pronoun*

| Person | Singular | Plural |
|--------|----------|--------|
| 1st    | \(à\text{mì}\) ‘mine’ | \(à\text{vò} \text{bì}\) ‘ours’ |
| 2nd    | \(à\text{mò}\) ‘yours’ | \(à\text{vò} \text{bò}\) ‘yours’ |
| 3rd    | \(à\text{ò}\) ‘hers/his’ | \(à\text{vò} \text{lò}\) ‘theirs’ |
Reflexive Pronoun

The reflexive pronouns in Dzə are formed by prefixing a morpheme 'ku' which literally mean 'head' to the object pronouns. The 3rd person singular uses object pronoun wə when it comes to reflexive pronoun to when the prefix 'ku' is attached. See the table 9 below.

| Person | Singular | Plural |
|--------|----------|--------|
| 1st    | kú mi 'myself' | kú bî 'ourselves' |
| 2nd    | kú mə 'yourself' | kú bô 'yourselves' |
| 3rd    | kú wó 'her/himself' | kú lô 'their selves' |

Nouns and Pronouns as head of NP and their categories

It is universally known that nouns and pronouns form the head of a noun phrase. This no different with Dzə. Noun phrase usually occurs with other elements which include determiners, numerals, genitives, modifiers, relative clauses, noun classifiers and the head noun [2, p.86].

(6) o wù dò 3.sub come yesterday 'he came yesterday'.

(7) e-ije ni tsɔvə si libɛnì pl-woman DET marry LOC proud 'married women are proud'.

(8) e-ifi ni tsô ivô si wù pl-person DET crown king LOC come 'people that crown king are coming'.

(9) mngbô ni di pi vado ni dé e-və ɪhyənɪŋ flood DET take place last time DET destroyed pl-house many 'the flood that happened last time destroyed many houses'.

(10) bî fì bá ni a wùka ni 1sub.pl slaughter goat DET 2.sub come DET 'we slaughtered the goat you brought'.

Nominal Identification

The following are the nominals in Dzə that are identified based on syntactic criteria.

(11) a. ʃə́ le' 'that pot'

pot that
b. ฏิ mĩ ‘my brother’
brother my

c. ฏิ นิ ‘this hoe’
hoe this

d. chilik̓ə tihyanə ‘many fruits’
fruit many

e. โอะ akə ‘large house’
house large

The lexical items appearing in the position where ṭọ ‘pot’, ṭɨ ‘hoe’, ṭɨ ‘brother’, โอะ ‘house’ etc are consider nominals other categories cannot substitute them.

**Interrogative Pronouns**

Interrogatives pronouns in Dzə are:

(12) ǎkè ‘which’
wə ‘who’
pwənē ‘how much’
bàdē ‘what’
bé ‘where’

**Simple Noun Phrase**

Simple noun phrase is categorized by nouns and determiners such as articles, demonstratives, possessive pronouns, adjectives quantifiers (some, many, a few, each, and every) numerals. Demonstratives imply ‘pointing to’ or demonstrating [2, p. 103]. Consider the following.

**Articles**

There is only one type of article in Dzə and the definite articles. It is also used to mark agreement. Determiners can appear with both animate and inanimate, human and non-human entity. The definite article de can only be used when the noun has been mentioned before. And can occur both in the subject and object positions.

(13) โอะ ḍe
city det ‘the city’

(14) bè ḍe
rope det ‘the rope’

**Demonstratives**

Demonstratives can occur any where in the noun phrase except the pre-head position. They could be proximal, medial or distal.
(15) a. kwəfí lè
   church that
   ‘that church’
   e kwəfí lè
   ‘those churches’

b. kwəfí lè pà lè
   church that far
   ‘that far church’
   e kwəfí lè pà lè
   far that
   ‘those far churches’

c. kó nī e kó nī
   tree this pl tree this
   ‘this tree’
   ‘these trees’

d. bá nī píni e bá nī píni
   goat this near pl goat this near
   ‘this goat here’
   ‘these goats here’

Possessives

Possessives form parts of the determiners in Dzə noun phrase. They occur after the head noun in the phrase.

(16) jí mī
   child my
   ‘my child’
   jí mə
   child your
   ‘your child’
   jí bí
   child our
   ‘our child’
   jí lé
   child their
   ‘their child’
   jí wə
   child his/her
   ‘his/her child’

Adjectives

(17) ńi
     heart
     ‘small heart’
     jì fì
diy ni
     heart small
     ‘large heart’
     jì akà
     heart large
     ‘beautiful heart’
     jì hìli
     heart beauty
     ‘good heart’
     jì àpìkònì
     heart good
     ‘old heart’
     kwíl
old heart
bè kuku ‘short rope’
rope short
bè afili ‘long rope’
rope long
bè mwili ‘heavy rope’
rope heavy
bè jefile ‘light rope’
rope soft
bè atsá ‘hard rope’
rope hard

Numerals

Numerals in Dzá like every other language are categorized into cardinal and ordinal. The cardinals start counting from one to five, it then changes numbering from six referring back to one. Six is ‘sibling of one’, seven is ‘sibling of two’ until the number ten. Eleven is referring back to ten which means ‘ten sprang one, ten sprang two continue to fifteen. Reference is made to fifteen at sixteen which is fifteen sprang one continuous to twenty. From twenty upward to three hundred, reference is made to twenty. Thirty is twenty sprang ten, thirty-five is twenty sprang fifteen, forty is two twenties and that pattern continues. Example of cardinals:

(18) a. tśin ‘one’
jui ‘two’
tó ‘three’
ño ‘four’
mymi ‘five’
yi-tśiŋ ‘six’
yi-ju ‘seven’
yi-tó ‘eight’
yi-nò ‘nine’
yó ‘ten’
yó dzi tśiŋ ‘eleven’
yó dzi jui ‘twelve’
yó dzi tó ‘thirteen’
yó dzi ‘fourteen’
ño lí ‘fifteen’
lí dzi tśiŋ ‘sixteen’
lí dzi jui ‘seventeen’
lí dzi tó ‘eighteen’
lí dzi nó ‘nineteen’
uŋ-tsúŋ ‘twenty’
Their examples in noun phrase are as follows:

(19) b. è-ìlə̀ŋ
   bwató
   PL-calabash
   'three calabashes'

c. è-fó
   bwanó
   PL-pot
   'four pots'

Ordinals in Dza are dependent on the genitive marker ‘â’ which is attached to the cardinal number except for the first and last which are ‘nwatsi’ and ‘tsitwó’. ‘Second’ is ājúŋ or ānîŋ júŋ, ‘third’ ātọ, ‘fourth’ āɲó and ‘fifth’ āmìnì.

(20) a. jì ìnì júŋ
    child GEN
    eye
    two
    ‘second child’

For nwatsi ‘first’, there is a lexical item na which literally means ‘hand’ but tsitwó ‘last’ does not have that. So we can have:

b. jì na nwatsí
   child
   hand
   first

    c. jì tsitwó
       child
       last

Quantifiers

Dza quantifiers are parts of determiners in Dza noun phrase and they occur after the head noun in a phrase. This study correponds with A. Lusekelo whose study in Nyakyusa noun phrase attests that determiners are post-nominal and is true for many other African languages [5, p. 306]. Consider:

(21) e-ìjè
    tswòmbí
    PL woman
    quant
    ‘few women’

    e-ìjè
    ihyànníŋ
    PL woman
    quant
    ‘many women’

Other universal quantifiers are listed below:

(22) kè
    ‘any/each’

    hè
    ‘all’

    àkò
    ‘some’

    tsìn tìnì
    ‘each’

Genitive constructions

A possessive noun phrase contains two elements; a possessor and a possessed item. Sometimes the possessor is referred to as the genitives [2, p. 104]. Like any other lan-
guage, the genitive constructions in Dzə have both inalienable and alienable possession. The inalienable juxtaposed two nouns to show possession (possessee possessor). While the alienable use the genitive morpheme və to show possession (possessee genitive marker possessor).

**Inalienable Possessive**

(23)  

|   |   |   |
|---|---|---|
| nwa | Esther | 'Esther's mouth' |
| mouth | Esther |   |
| nìŋ | mì | 'my eye' |
| eye | my |   |
| nə | mì | 'my mother' |
| mothe | my |   |
| ywá | Mídáfi | 'Mídáfi's stomach' |
| stomach | Mídáfi |   |
| tʃúwì | Mídáfi | 'Mídáfi's neck' |
| neck | Mídáfi |   |
| hywì | Mídáfi | 'Mídáfi's brother/sister' |
| brother | Mídáfi |   |

The examples show the closeness between the possessee and the possessor. The possessees are not on their own but dependent on a larger entity or relation.

**Alienable Possessee**

Distance is created with the marker in between the possessee and the possessors.

(24)  

|   |   |   |
|---|---|---|
| èmwaibwi | və | Yeso |
| disciples | of | Jesus |
| Jesus's disciples' |   |   |
| b. | idza və | Nlabefi |
| dog GEN | Nlabefi |   |
| 'Nlabefi's dog' |   |   |
| c. | dɔŋ | və | Nlabefi |
| dance GEN | Nlabefi |   |
| 'Nlabefi’s dance' |   |   |

**Complex Noun Phrase**

S. M. Dryer states that a complex noun phrase contains more complex modifiers such as genitive or possessive construction and relative clauses, as in English London's mayor or the mayor of London [6]. The examples of complex noun phrases in Dzə can be seen below.
Adjectives are limited in Dzə. They have the ability to modify the head noun and they usually follow the noun. See the above examples.

The head noun of the above example is nịjàbë ‘evil’ while the prepositional phrase vọ ëifu fàngwà ‘of people world is its complement.

**Coordinative**

Dzə allows noun phrases that are formed by coordinating two noun phrases. That is additive coordination is present in the nominal system. The examples are:

(27) a. kwọ̀ọ́ bè lè ntsìlè
tortoise and rabbit

b. ntsìlè dè bè nàndàny
rabbit det and spider

‘the rabbit and spider’

The word bi ‘and’ is a coordinator. It conjoins the two noun phrases ntsìlè dè ‘the rabbit’ and nàndàny ‘spider’ together. Once the first NP contains the determiner de, the second NP do not need the definite article, sometimes there is no need of the definite article so long as it has been mentioned before in the conversation.

**Relative construction**

The relative marker nì is used in relative construction. Relative clauses in Dzə appear after the noun head in the phrase. The structure of the relative clause modifier is N. Rel.

(28) pì nì à wàkò nì
hoe dem 2sub break dem
‘the hoe that you broke’

(29) e-imwà de nì ngọkọ keke nwa nìhyà
pl-children det nì ngọkọ keke nwa nìhyà
‘the children who rode bicycles on the road’

(30) ò bọ̀ è kìsì nì nìwàkò mọ̀ nì
he see 3pl elder which hold spear det
‘he saw the elder who held the spear’
The word *nì* is a relative pronoun, demonstrative pronoun and a completive depending on the context it is used. These relative pronouns are used to link or connect the noun (nominal) with the rest of the clause or phrase.

**Multiple NP extension**

Other NP extension in Dzò noun phrase may contain adjectives and other elements. Adjectives modify the head noun and almost always follow the head noun.

(32) *dòró* *āhu* *āpikán*  
book new nice  
’a new nice book’

Adjectives can co-occur as post-modifiers in Dzò. If this two adjectives co-occur, it is ungrammatical for *āpikán* ‘nice/good’ to appear before *āhu* ‘new’. *Āhu* ‘new’ will always occur first in a phrase like this. Other examples are:

(33) *ijè* *āmwílì* *jùmwahe*  
woman fat beauty  
’a fat beautiful woman’

(34) *jó* *nì* *mwílì* *kànko*  
pot DEM large big  
‘that large big pot’

(35) *d̀ró* *nì* *tšì* *kahye* *nì*  
book DEM one red DEM  
‘this one red book’

In (35), whatever the arrangement of adjectives after the head noun *dòró* ‘book’, it is grammatical. But is more common to hear speakers place the *tšì* ‘one’ before *kahye* ‘red’. See also example (36) below.

(36) *e-bá* *lè* *jùn* *kòbì* *nì*  
pl.-goat DEM two black DEM  
‘those two black goats’

(37) *kè* *kòakuli* *tàngsà* *kwà* *de* *nì*  
every chair in room DET COMPL  
‘every chair in the room’

The phrase in (37) shows how NP can be extended in Dzò with the qualifiers. The determiner *kè* ‘every’ precedes the head noun *kòakuli* ‘chair’ *kè* selects only count nouns in Dzò. This agrees with M. J. Rugemalira [7] where distributive determiners of this kind ‘each and every’ are pre-nominal. This is one of the rare circumstances in Dzò where determiner precedes the head noun in a noun phrase that contains prepositional phrase.
(38) ke e-kwi ibwi mi afili amwili ni kəbi le be kabu kwakwali
quart pl-old man poss tall fat det black dem with leg bow
‘each of those my five tall fat black men with bow legs’.

The plural can precede the adjective of age to show number agreement as in e kwi ibwi ‘old men’. It means that adjectives can mark plurality in Dzə.

**Conclusion**

This study described the Dzə nouns and noun phrases. It demonstrated the different kinds of nouns and noun phrases. The elements that constitute noun phrase in Dzə ranges from determiners, possessives, demonstratives, numerals, and quantifiers. As expected, these elements are mostly post-modifiers. From the study, we understand that determiners are agreement markers in Dzə. This is just a preliminary study of the Dzə nouns and noun phrases. There is a lot that has not been looked into. There is a need for in-depth description of Dzə.

**Abbreviations**

1 — first person  
2 — second person  
3 — third person

Язык джен относится к семье адамава и распространен в некоторых районах штатов Тараба, Адамава и Гомбе Северо-Восточной Нигерии. Рассматриваются существительные и именные группы в языке джен. Поскольку джен недостаточно изучен и описан, статья предоставляет важные данные для типологических исследований и для лингвистов, работающих с языками адамава. Данные были получены в результате полевых исследований в декабре 2014 г., личных разговоров, наблюдений и изучения Библии на языке джен. Представлены краткий очерк фонологии и тонов языка джен, а также различные типы существительных, местоимений, простых и сложных именных групп. В языке джен много местоимений: личные, объектные, возвратные, вопросительные и притяжательные. Как и в большинстве других африканских языков, элементы, которые составляют именную группу, стоят после основного существительного. К таким элементам относятся артикли, указательные и притяжательные местоимения, прилагательные, числительные, генитивы (приятательные и непритяжательные) и определительные придаточные предложения. Эта статья — предварительное исследование языка джен, которое открывает путь для его дальнейшего изучения.

Ключевые слова: джен, существительные, именные группы, адамава, дженджо.
