CA10 Regulates Neurexin Heparan Sulfate Addition via a Direct Binding in the Secretory Pathway - APPENDIX

Table of content
Appendix Figure S1 (related to Fig 7A-B).................................................................page 2

1
Appendix Figure S1 (related to Fig 7A-B). Total neurexin levels in cell-surface binding experiments, assessed by immunostainings using a polyclonal antibody directed against Nrxn1α but reactive to all neurexin isoforms. Data shown as mean ±SEM of 4 biological replicates.
