Retraction

Retraction: Adaptive Beam forming algorithms for wireless Communication using LABVIEW (IOP Conf. Ser.: Mater. Sci. Eng. 1084 012046)

Published 09 February 2023

This article has been retracted by IOP Publishing following an allegation that this article may contain tortured phrases [1].

IOP Publishing has investigated in line with COPE guidelines, and agrees this article contains nonsensical terms and potential overlap to other previously published work [2]. This casts serious doubt over the legitimacy of the article and/or expertise of the authors in this topic.

IOP Publishing has made multiple attempts to contact the authors for an explanation, and to request evidence the authors were the original and genuine creators of the work, however at the time of publication of this notice, IOP Publishing has not received any response.

The evidence gathered by IOP Publishing to date, combined with unsatisfactory author response, considerably reduces confidence in the work to the extent that IOP Publishing has made the decision to retract the work.

IOP Publishing wishes to credit the problematic paper screener for bringing the issue to our attention.
