This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
Highlights

An early assessment of priorities and obstacles is a cost saving strategy but it is complex.

- We use a KAOS extension to articulate migration goals and identify migration obstacles.
- Combined with repository of evidential knowledge, we implement a decision making framework for supporting cloud migration.
- We illustrate the approach with cloud migration case studies.
