Re: Spectrum00571-21 (Identification of Novel Rotihibin Analogues in Streptomyces scabies including Discovery of its Biosynthetic Gene Cluster)

Dear Prof. Bart Devreese:

Based on your thoughtful responses to the prior round of review and in consultation with another Editor, your manuscript has been accepted, and I am forwarding it to the ASM Journals Department for publication. You will be notified when your proofs are ready to be viewed. We will require the addition of a 'Data Availability' heading in the Methods section where you describe where the proteomic data can be accessed, but this should be easily done by our editorial staff.

The ASM Journals program strives for constant improvement in our submission and publication process. Please tell us how we can improve your experience by taking this quick Author Survey.

As an open-access publication, Spectrum receives no financial support from paid subscriptions and depends on authors' prompt payment of publication fees as soon as their articles are accepted. You will be contacted separately about payment when the proofs are issued; please follow the instructions in that e-mail. Arrangements for payment must be made before your article is published. For a complete list of Publication Fees, including supplemental material costs, please visit our website.

Corresponding authors may join or renew ASM membership to obtain discounts on publication fees. Need to upgrade your membership level? Please contact Customer Service at Service@asmusa.org.

Thank you for submitting your paper to Spectrum.

Sincerely,

Jeffrey Gralnick
