CONTENTS

◆ Papers ◆

Influence of Li₂CO₃ additions to CaSiO₃–Al₂O₃ ceramics on sintering temperature and microwave dielectric properties
Qinghua YANG, Huanping WANG, Zuopeng HE, Denghao LI, Qiuhong WANG and Shiqing XU
125

Barium titanate dispersion obtained by a high pressure methods and light resistant composites containing the nanoparticles
Hideo NOMOTO, Yusuke MORI and Hiroki MATSUO
129

Preparation of silica hydrogels using a synthetic peptide for application as carriers for controlled drug release and mesoporous oxides
Yuki KAWACHI, Shin-ichi KUGIMIYA and Katsuya KATO
134

Protective effect of CeO₂ nanoparticles on photo-induced oxidative damage of DNA
Naoko FUJITA and Kai KAMADA
141

Synthesis YFeO₃ by salt-assisted solution combustion method and its photocatalytic activity
Yuanyuan CHEN, Jun YANG, Xuelei WANG, Feiyi FENG, Yuanming ZHANG and Yu TANG
146

Fabrication and evaluation of hybrid materials from A-zeolite and ground glass powders for vitrified radioactive waste
Masataka KAMITANI, Toru TAGAMI, Mitsunori KONDO, Tomonori HIKI, Toru WAKIHARA and Atsushi NAKAHIRA
151
Morphological change and enhanced photocatalytic activity of tantalum nitride (Ta$_3$N$_5$) by ammonothermal treatment with mineralizer
Kazuhisa KISHIDA and Tomoaki WATANABE
156

Effect of soda-lime-silica glass addition on the physical properties of ceramic obtained from white rice husk ash
Nasirn Heidari BATENI, Mohd Nizar HAMIDON and Khamirul Amin MATORI
161

Mechanical properties of La$_2$O$_3$ and Nb$_2$O$_5$ doped Al$_2$O$_3$ ceramics prepared by microwave sintering
Yun-Long AI, Kai WU, Bing-Liang LIANG, Chang-Hong LIU, Wen HE, Wei-Hua CHEN and Fei HE
166

◆ Technical report ◆
Joining strength characteristics of large silicon nitride block joined without using any insert material
Mikinori HOTTA, Naoki KONDO, Hideki KITA and Tatsuki OHJI
171

◆ Note ◆
Characterization of Ti-doped CaFe$_2$O$_4$ prepared from a malic acid complex
Akane DOI, Mami NOMURA, Yuki OBUKURO, Ryosuke MAEDA, Kenji OBATA, Shigenori MATSUSHIMA and Kenkichiro KOBAYASHI
175

Supplement
◆ Paper ◆
The mechanism of red color formation of red clay for Japanese rakuyaki [in Japanese]
Young-Joo KWON and Byung-Ha LEE
S1
