### S2 Table. Covariates included for value transfer functions.
Sources of covariates either from valuation databases [13, 36] or from other global datasets. The table shows the groups of covariates (1) scale, 2) economy, 3) policy/governance, 4) society, 5) ecology, 6) valuation methods) and the names, spatial and temporal scale as well as source of covariates. Only covariates are listed that show a statistical influence in one of the value transfer functions.

| Group | Name of variable | Unit | Spatial scale | Temporal scale | Source |
|-------|------------------|------|---------------|---------------|--------|
| 1     | Area             | Square kilometer | Site scale to continental | 1975-2012 | [13, 36] |
|       | Spatial extent of the investigation area applied in the case study for each monetary valued ES. | | | | |
| 1     | Year             | Year | Site scale to continental | 1975-2012 | [13, 36] |
|       | Publication year of the case study. | | | | |
| 1     | Beneficiary      | Unitless index | Site scale to continental | 1975-2012 | [13, 36] |
|       | Indication of population that benefits from enjoyment, consumption or use of valued ES. | | | | |
| 2     | Provider         | Unitless index | Local to international | 1975-2012 | [13, 36] |
|       | Type of supplier of ES or landowner of service area that is being valued, e.g. private, Non-Governmental Organization, Non-Profit Organization or government. | | | | |
| 6     | ES sub-services  | ES sub-types | Site scale to continental | 1975-2012 | [13, 36] |
|       | Determined ES sub-classes based on the TEEB classification system. The TEEB categories consist of 27 ES, e.g. food provision or climate regulation, which were sub-divided into 74 sub-classes. | | | | |
| 6     | Value method     | Type of method | Site scale to continental | 1975-2012 | [13, 36] |
|       | Classification of techniques used in the case study to value ES in monetary terms. | | | | |
| 6     | Value Type       | Type of value | Site scale to continental | 1975-2012 | [13, 36] |
|       | The type of monetary “output” value from the case study, determined by the aggregated value of the ES benefits provided in a given state. | | | | |
| 2     | Consumer prices  | Unitless index | National level | 2007 | International Labour Office database provided by ILO. Retrieved 01/07/2015, from: [http://laborsta.ilo.org/applv8/data/c7e.html](http://laborsta.ilo.org/applv8/data/c7e.html) |
|   | Indicator | Description | Unitless index | National level | Year | Source |
|---|-----------|-------------|----------------|----------------|------|--------|
| 2 | GDP growth | Annual percentage growth rate of Gross Domestic Product (GDP) per capita based on constant local currency. GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy (plus any product taxes and minus any subsidies, not included in the value of the products) measured in purchaser’s prices. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. | Annual percentage of GDP per capita | National level | 2007 | World Development Indicators provided by The World Bank. Retrieved 01/07/2015, from: [http://data.worldbank.org/indicator/NY.GDP.PCA.P.KD.ZG](http://data.worldbank.org/indicator/NY.GDP.PCA.P.KD.ZG) |
| 2 | Tax revenue | Tax revenue refers to compulsory financial transfers to the central government for public purposes. Certain compulsory transfers such as fines, penalties, and most social security contributions are excluded. Refunds and corrections of erroneously collected tax revenue are treated as negative revenue. | Annual percentage of GDP | National level | 2007 | World Development Indicators provided by The World Bank. Retrieved 01/07/2015, from: [http://data.worldbank.org/indicator/GC.TAX.TOT.LGD.ZS](http://data.worldbank.org/indicator/GC.TAX.TOT.LGD.ZS) |
| 2 | Income GINI | The income GINI coefficient measures the deviation of the distribution of income or consumption expenditure among individuals or households within an economy from a perfectly equal distribution. | Unitless index | National level | 2000-2010 | Cross-National Socio-Economic and Religion Data, 2011, from Association of Religion Data Archive (ARDA). Retrieved 01/07/2015, from: [http://www.thearda.com/Archive/Files/Descriptions/ECON11.asp](http://www.thearda.com/Archive/Files/Descriptions/ECON11.asp) |
| 2 | Imports of goods and services | Represents the value of all goods and other market services received from the rest of the world. It includes the value of merchandise, freight, insurance, transport, travel, royalties, license fees, and other services, such as communication, construction, financial, information, business, personal, and government services. | Annual percentage of GDP | National level | 2007 | World Development Indicators provided by The World Bank. Retrieved 01/07/2015, from: [http://data.worldbank.org/indicator/NE.IMP.GNF.S.ZS](http://data.worldbank.org/indicator/NE.IMP.GNF.S.ZS) |
| 2 | Net barter terms of trade | The index net barter terms of trade is calculated as the percentage ratio of the export unit value indexes to the import unit value indexes, measured relative to the base year 2000 (2000=100). | Unitless index | National level | 2007 | World Development Indicators provided by The World Bank. Retrieved 01/07/2015, from: [http://data.worldbank.org/indicator/TT.PRI.MRC.H.XD.WD](http://data.worldbank.org/indicator/TT.PRI.MRC.H.XD.WD) |
| Code | Measure                                                                 | Indicator                                                                 | Data Source                                                                 |

|      | agricultural production for each year in comparison with the reference  |                                                                           |                                                                            |
|      | period 2004-2006 (=100). It is based on the sum of price-               |                                                                           |                                                                            |
|      | weighted quantities of different agricultural commodities produced      |                                                                           |                                                                            |
|      | (crops and livestock) after deductions of quantities used as seed and   |                                                                           |                                                                            |
|      | feed weighted in a similar manner.                                       |                                                                           |                                                                            |
|   | Indicator | Description | Data Source | Year |
|---|-----------|-------------|-------------|------|
| 2 | Hydro-energy | Per capita production of electricity from hydroelectric power plants during the given year, counted in tonne of oil equivalent (toe). | National level | 2007 |
|   |           | Tonne of oil equivalent (toe) | World Development Indicators provided by The World Bank. Retrieved 01/07/2015, from: [http://data.worldbank.org/indicator/EG.ELC.HYR.O.KH](http://data.worldbank.org/indicator/EG.ELC.HYR.O.KH) |
| 2 | Renew energy | Percentage of total primary energy supply derived from renewable sources. The renewable electricity production includes biodiesel, biogasoline, other biogas, charcoal, geothermal, hydro, other liquid biofuels, sludge gas, solar-photovoltaics, solar-thermal, tide wave & ocean, as well as wind. | National level | 2007 |
|   |           | Annual percentage of total electricity production | Online data services provided by the International Energy Agency. Retrieved 01/07/2015, from: [http://data.iea.org](http://data.iea.org) |
| 2 | UNRENEW energy | Percentage of total primary energy supply derived from renewable sources. | National level | 2007 |
|   |           | Annual percentage of total electricity production | Cross-National Socio-Economic and Religion Data, 2011, from Association of Religion Data Archive (ARDA). | Indicator | Description | Unit | Level | Year | Source |
|-----------|-------------|------|-------|------|--------|
| Pop age  | The indicator represents the average population age per country. Data are shown for six major age groups weighted by absolute number of people per age group. | Unitless index | National level | 2007 | International Data Base 2013 of the U.S. Census Bureau. Retrieved 01/07/2015, from: [https://www.census.gov/population/international/data/idb/region.php](https://www.census.gov/population/international/data/idb/region.php) |
| Unemployment rate | Unemployment rate in a country. Data are shown in percentage of the labor force that is without jobs. | Annual percentage | National level | 2007 | Cross-National Socio-Economic and Religion Data, 2011, from Association of Religion Data Archive (ARDA). Retrieved 01/07/2015, from: [http://www.thearda.com/Archive/Files/Descriptions/ECON11.asp](http://www.thearda.com/Archive/Files/Descriptions/ECON11.asp) |
| City access | Travel time to major cities using road and rail networks or shipping lanes on navigable rivers, lakes and oceans. The calculation based on raster grids that contain values on time required to travel across them. It accounts for the infrastructure (roads, rivers), terrain characteristics (slopes, land-cover) and political factors (national boundaries). | Minutes of travel time | National level | 2009 | Uchida, H. and A. Nelson, 2008, Agglomeration Index: Towards a New Measure of Urban Concentration. Background paper for the World Bank’s World Development Report 2009. Retrieved 01/07/2015, from: [http://forobs.jrc.ec.europa.eu/products/gam](http://forobs.jrc.ec.europa.eu/products/gam) |
| Internet users | Internet users are people with access to the worldwide network. Measured in total number of people per country. | Total number of users | National level | 2007 | World Development Indicators provided by The World Bank. Retrieved 01/07/2015, from: [http://data.worldbank.org/indicator/IT.NET.USER](http://data.worldbank.org/indicator/IT.NET.USER) |
| Market access | Accessibility to markets based on measurements of travel time to cities and major maritime ports as proxies for domestic and international markets. It rather accounts for the infrastructure (roads, rivers) and a number of terrain characteristics (slopes, land-cover) that impede access to the markets than for the absolute distance. Furthermore a uniform velocity was used to calculate the total travel time. | Unitless index | National level | 2011 | P.H. Verburg, E.C. Ellis, A. Letourneau, 2011, A global assessment of market accessibility and market influence for global environmental change studies Environmental Research Letters, 6 Article No: 034019, 12 pp. Retrieved 01/07/2015, from: [http://www.ivm.vu.nl/En/Organisation/departments/spatial-analysis-decision-support/Market_Influence_Data/index.asp](http://www.ivm.vu.nl/En/Organisation/departments/spatial-analysis-decision-support/Market_Influence_Data/index.asp) |
| Linguistic groups | Number of linguistic groups, based on the global dataset Ethnologue (digitilized version of the Atlas Narodov Mira). | Total number of linguistic groups | National level | 2000 | Alesina, A.F., S. Michalopoulos and E. Papaioannou, 2012, Ethnic Inequality, Retrieved 01/07/2015, from: [http://dx.doi.org/10.2139/ssrn.2169485](http://dx.doi.org/10.2139/ssrn.2169485) |
|   | Ethnicity GINI |
|---|----------------|
|   | Deviation of spatial distribution of ethnicity groups within a country from a perfectly equal distribution. Gini coefficients are calculated across ethnicity groups for each country. Data for homeland ethnicity based on the global dataset Geo-Referencing of Ethnic Groups (GREG). |
|   | Unitless index |
|   | National level |

|   | Ethnicity |
|   | Number of ethnic groups per country based on the global dataset Geo-Referencing of Ethnic Groups (GREG). |
|   | Total number of ethnic groups |
|   | National level |
|   | 2000 |
|   | Alesina, A.F., S. Michalopoulos and E. Papaioannou, 2012, Ethnic Inequality, Retrieved 01/07/2015, from: [http://dx.doi.org/10.2139/ssrn.2169485](http://dx.doi.org/10.2139/ssrn.2169485) |
|   | GREG distance to Sea |
|   | Spatial inequality of distance to sea coasts across ethnic homelands. Gini coefficients are calculated across ethnicity homelands for each country. As a prerequisite the geodesic distance from the centroid of each ethnic homeland to the nearest coastline is measured in 1000s of km’s. Data for homeland ethnicity based on the global dataset Geo-Referencing of Ethnic Groups (GREG). |

|   | Land quality |
|   | Spatial inequality indicator of the average land quality for cultivation across ethnic homelands per country. The GINI index is the product of two components capturing the climatic and soil suitability for farming. The spatial analysis frame for the inequality measures are ethnic homelands based on the global dataset Geo-Referencing of Ethnic Groups (GREG). |

|   | Moisture index seasonality | Coefficient of variation | 10 arc-minutes | 1951-2000 mixed with 1961-1990 |
|---|---------------------------|--------------------------|----------------|--------------------------------|
| 5 | The moisture index is a measure of relative soil moisture. The Moisture index seasonality is the coefficient of variation calculated by the standard deviation of the weekly rainfall and evaporation estimates expressed as a percentage of the annual mean of those estimates. | Coefficient of variation | 10 arc-minutes | 1951-2000 mixed with 1961-1990 |
| 5 | Annual temperature | Celsius | 10 arc-minutes | 1961-1990 |
| 5 | The annual mean of all the weekly mean temperatures. Each weekly mean temperature is the mean of that week's maximum and minimum temperature over the whole year. | Celsius | 10 arc-minutes | 1961-1990 |
| 5 | Diurnal temperature | Celsius | 10 arc-minutes | 1961-1990 |
| 5 | The Diurnal Temperature Range is the difference between that week's diurnal maximum and minimum temperature averaged for a year. | Celsius | 10 arc-minutes | 1961-1990 |
| 5 | Annual precipitation | Millimeter | 10 arc-minutes | 1951-2000 mixed with 1961-1990 |
| 5 | The sum of all 12 monthly precipitation estimates per year. | Millimeter | 10 arc-minutes | 1951-2000 mixed with 1961-1990 |
| 5 | Annual radiation | Watt per square meter | 10 arc-minutes | 1961-1990 |
| 5 | Weekly solar radiation estimates averaged over the whole year. | Watt per square meter | 10 arc-minutes | 1961-1990 |
|   |   |   |   |
|---|---|---|---|
| 5 | Highest weekly radiation  
The largest solar radiation estimate for all weeks of the year. | Watt per square meter 10 arc-minutes | 1961-1990 | Kriticos, D.J., B.L. Webber, A. Leriche, N. Ota, I. Macadam, J. Bathols, J.K. Scott, 2012, CliMond: global high-resolution historical and future scenario climate surfaces for bioclimatic modelling, Methods in Ecology and Evolution, 3, pp. 53–64. Retrieved 01/07/2015, from: [https://www.climond.org/Resources.aspx](https://www.climond.org/Resources.aspx) |
| 5 | Radiation seasonality  
The coefficient of variation calculated by the standard deviation of the weekly solar radiation estimates expressed as a percentage of the annual mean of those estimates. | Coefficient of variation 10 arc-minutes | 1961-1990 | Kriticos, D.J., B.L. Webber, A. Leriche, N. Ota, I. Macadam, J. Bathols, J.K. Scott, 2012, CliMond: global high-resolution historical and future scenario climate surfaces for bioclimatic modelling, Methods in Ecology and Evolution, 3, pp. 53–64. Retrieved 01/07/2015, from: [https://www.climond.org/Resources.aspx](https://www.climond.org/Resources.aspx) |
| 5 | Annual moisture index  
The moisture index is a measure of relative soil moisture. Annual moisture index represents the mean over the whole year of all the weekly moisture index values. The weekly moisture index values are calculated from the weekly precipitation and evaporation values obtained from the climate surfaces in conjunction with the soil type and maximum soil water availability values supplied by the user. | Unitless index 10 arc-minutes mixed with 1961-1990 | 1951-2000 | Kriticos, D.J., B.L. Webber, A. Leriche, N. Ota, I. Macadam, J. Bathols, J.K. Scott, 2012, CliMond: global high-resolution historical and future scenario climate surfaces for bioclimatic modelling, Methods in Ecology and Evolution, 3, pp. 53–64. Retrieved 01/07/2015, from: [https://www.climond.org/Resources.aspx](https://www.climond.org/Resources.aspx) |
| 5 | CO₂ growth  
Average annual growth in per capita carbon dioxide emission from 1970-2008. Human-originated carbon dioxide emissions stemming from the burning of fossil fuels, gas flaring and the production of cement, including carbon dioxide emitted by forest biomass through depletion of forest areas, divided by mid-year population. | Annual percentage of CO₂ emission growth National level | 1970-2008 | World Bank, 2013, World Development Indicator 2013. Washington D.C. provided by Statistics of the Human Development Report of the United Nations Development Programme. Retrieved 01/07/2015, from: [http://hdr.undp.org/en/data-explorer](http://hdr.undp.org/en/data-explorer) |
| 5 | Indoor air quality  
Percentage of population using solid fuel as the primary cooking fuel. | Annual percentage of population National level | 2007 | Smith K.R., S. Mehta, M. Mauezezahl-Feuz, 2004, Indoor air pollution from household use of solid fuels. In: Comparative Quantification of Health Risks: Global and Regional Burden of Disease Attributable to Selected Major Risk Factors. Geneva: World Health Organization, 1435-1493. |   | Description                                                                 | Unit            | Data Source                                                                                                           |
|---|------------------------------------------------------------------------------|-----------------|-----------------------------------------------------------------------------------------------------------------------|
| 5 | PM25 air quality Population-weighted exposure to fine particulates (PM$_{2.5}$) in micrograms per cubic meter. These data are derived from a model that was parameterized by MODIS Aerosol Optical Depth (AOD) data. The model covered all areas south of 60 degree north latitude and north of 60 degree south latitude. | Microgram per cubic meter | Boys, B.L., R.V. Martin, A. van Donkelaar, R. MacDonell, N.C. Hsu, M.J. Cooper, R.M. Yantosca, Z. Lu, D.G. Streets, O. Zhang, S. Wang 2014 Fifteen-year global time series of satellite-derived fine particulate matter, Environ. Sci. Technol, 10.1021/es502113p. Retrieved 01/07/2015, from: [http://epi.yale.edu/downloads](http://epi.yale.edu/downloads) |
| 5 | Carbon soil sequestration Suitability of soil conditions for carbon soil sequestration derived from the raster version of the FAO/UNESCO soil map of the world (wdsmwgr). | Unitless index | Food and Agriculture Organization of the United Nations. FAO GEONETWORK. Suitability of Soil conditions for Soil Carbon Sequestration (GeoLayer). Retrieved 01/07/2015, from: [http://data.fao.org/map?entryId=f8c27d50-88fd-11da-a88f-000d939bc5d8](http://data.fao.org/map?entryId=f8c27d50-88fd-11da-a88f-000d939bc5d8) |
| 5 | Change forest area Percentage change in area under forest cover from 1990-2008. | Percentage of forest area | Data-platform of the Statistic Division of Food and Agriculture Organization of the United States (FAOSTAT). Retrieved 01/07/2015, from: [http://faostat.fao.org/site/377/default.aspx#ancor](http://faostat.fao.org/site/377/default.aspx#ancor) |
| 5 | Forest lost The loss of forest area owing to deforestation from either human or natural causes, such as forest fires. This indicator uses a baseline forest cover layer (forest cover fraction with a 30% forest cover threshold) to measure the area under forest cover in the year 2000. It then combines forest loss estimates from Landsat for the periods 2000-2005 and 2005-2010 to arrive at a total forest cover change amount for the decade. This total is then divided by the forest area estimate for 2000 to come up with a percent change in forest cover over the decade. | Annual percentage of forest area | Matthew C.H., V.S. Stephen and P.V. Potapov 2010: Quantification of global gross forest cover loss PNAS 107 (19) 8650-8655, doi:10.1073/pnas.0912668107. Retrieved 01/07/2015, from: [http://epi.yale.edu/downloads](http://epi.yale.edu/downloads) |
| 5 | Privately owned forest Percentage of forest land that is owned by individuals, families, private co-operatives, corporations, industries, private religious and educational institutions, pension or investment funds, and other private institutions. | Annual percentage of forests | Rametsteiner E., A. Whiteman and E. Muller, 2014, State of the world’s forests 2014. Enhancing the socioeconomic benefits from forests. FAO, Rome. Provided by Gapminder. Retrieved 01/07/2015, from: [http://www.gapminder.org/data/](http://www.gapminder.org/data/) |
| 5 | **Biodiv threat** | Biodiversity threatened by stressors like catchment disturbance, pollution, water resource development and biotic factors. Calculated by using relative weights of 23 combined geospatial stressors to derive a cumulative threat index. Expert assessment of stressor impacts on biodiversity produced the weights. | Unitless index | 30 arc-minutes | 2010 | Vorosmarty, C.J., P.B. McIntyre, M.O. Gessner, D. Dudgeon, A. Prusevich, P. Green, S. Glidden, S.E. Bunn, C.A. Sullivan, C. Reidy Liermann and P.M. Davies, 2010, Global threats to human water security and river biodiversity, Nature 467, 555-561. Retrieved 01/07/2015, from: [http://www.riverthreat.net/data.html](http://www.riverthreat.net/data.html) |
| 5 | **Coastline length** | Length of coastline in kilometers per country. | Kilometers | National level | 2011 | Cross-National Socio-Economic and Religion Data, 2011, from Association of Religion Data Archive (ARDA). Retrieved 01/07/2015, from: [http://www.thearda.com/Archive/Files/Descriptions/ECON11.asp](http://www.thearda.com/Archive/Files/Descriptions/ECON11.asp) |
| 5 | **Water area** | Water area is the sum of the surfaces of all inland water bodies, such as lakes, reservoirs, or rivers, as delimited by international boundaries and/or coastlines. | Square kilometer | National level | 2011 | Cross-National Socio-Economic and Religion Data, 2011, from Association of Religion Data Archive (ARDA). Retrieved 01/07/2015, from: [http://www.thearda.com/Archive/Files/Descriptions/ECON11.asp](http://www.thearda.com/Archive/Files/Descriptions/ECON11.asp) |
| 5 | **Distance to Sea** | Spatial inequality of the distance to sea across artificial pixels (of 2.5 x 2.5 decimal degrees). As a measure of the distance to sea the geodesic distance from the centroid of each pixel to the nearest coastline is estimated. Gini coefficients are calculated across these pixels for each country. | Unitless index | National level | 2012 | Global Mapping International, Colorado Springs, Colorado, USA. Series name: Global Ministry Mapping System. Series issue: Version 3.0 |
| 5 | **Water security** | Degradation of freshwater resources threatened by stressors like catchment disturbance, pollution, water resource development and biotic factors. Human water security threat calculated by using relative weights of 23 combined geospatial stressors to derive a cumulative threat index. Expert assessment of stressor impacts on human water security produced the weights. | Unitless index | 30 arc-minutes | 2010 | Vorosmarty, C.J., P.B. McIntyre, M.O. Gessner, D. Dudgeon, A. Prusevich, P. Green, S. Glidden, S.E. Bunn, C.A. Sullivan, C. Reidy Liermann and P.M. Davies, 2010, Global threats to human water security and river biodiversity, Nature 467, 555-561. | 5 | Renew water dependency | The Indicator expresses the percentage of total renewable water resources originating outside the country. The higher the indicator the more renewable water is received from neighboring countries such as upstream areas. | Annual percentage of total renewable water resources originating outside the country | National level | 2007 | AQUASTAT database provided by Food and Agriculture Organization of the United Nations (FAO). Retrieved 01/07/2015, from: http://www.fao.org/nr/water/aquastat/data/query/index.html |
| 5 | SOC erosion | The total erosion of soil organic carbon (SOC) by water and tillage on croplands. Global estimates based on a revised Universal Soil Loss Equation (USLE) model and are computed for a global grid of 5 arc-minutes. | Milligram Carbon per hectare and year | 5 arc-minutes | 2007 | Van Oost, K., T.A. Quine, G. Govers, S. De Gryze, J. Six, J.W. Harden, J.C. Ritchie, G.W. McCarty, G. Heckrath, C. Kosmas, J.V. Giraldez, J.R.M. da Silva, R. Merckx. 2007. The impact of agricultural soil erosion on the global carbon cycle, Science, 318, pp. 626–629 |
| 5 | Adjusted net savings | The indicator represents the true rate of savings in an economy after taking into account investments in human capital, depletion of natural resources and damage caused by pollution. Adjusted net savings are equal to net national savings plus education expenditure and minus energy depletion, mineral depletion, net forest depletion, and carbon dioxide and particulate emissions damage. | Percentage of GNI | National level | 2007 | World Development Indicators provided by The World Bank. Retrieved 01/07/2015, from: http://data.worldbank.org/indicator/NY.ADJ.SVN.G.NI.ZS |
| 5 | Anthromes | Anthropogenic Biomes of the world (anthromes) indicate globally-significant ecological patterns within the terrestrial biosphere caused by human interaction with ecosystems, including agriculture, urbanization, forestry and other land uses. | Anthrome types | 5 arc-minutes | 2008 | Ellis, E.C. and N. Ramankutty. 2008. Anthropogenic Biomes of the World, Version 1. Palisades, NY: NASA Socioeconomic Data and Applications Center (SEDAC). Retrieved 01/07/2015, from: http://sedac.ciesin.columbia.edu/data/set/anthromes-anthropogenic-biomes-world-v1 |
| 5 | EPI | The Environmental performance Index (EPI) describes environmental compatibility of a state’s policy concerning to human health affected by ecosystem health and human interventions, such as ecosystem protection and resource management. The EPI focused on a core set of environmental outcomes linked to policy goals. | Unitless index | National level | 2010 | Emerson, J., D. C. Esty, M.A. Levy, C.H. Kim, V. Mara, A. de Sherbinin, and T. Srebotnjak. 2010. 2010 Environmental Performance Index. New Haven: Yale Center for Environmental Law and Policy. Morrison, C.J. Loucks, T.F. Allnutt, T.H. Ricketts, Y. Kura, J.F. Lamoreux, W:W. Wettengel, P. Hedao, K.R. Kassem, 2001, Terrestrial ecoregions of the world: a new map of life on Earth. Bioscience 51(11):933-938. Retrieved 01/07/2015, from: https://worldwildlife.org/publications/terrestrial-ecoregions-of-the-world |
| 5 | AZE protection | Percentage area of AZE site(s) that fell within protected areas per country | National level | 2007 | Ricketts, T.H., E. Dinerstein, T. Boucher, T.M. Brooks, S.H.M. Butchart, M. Hoffmann, J.F. Lamoreux, J. Morrison, M. Parr, J.D. Pilgrim, A.S.L. Rodrigues, W. Sechrest, G.E. Wallace, K. Berlin, J. Bielby, N.D. Burgess, D.R. Church, N. Cox, D. Knox, C. Loucks, G.W. Luck, L.L. Master, R. Moore, R. Naidoo, R. Ridgely, G.E. Schatz, G. Shire, H. Strand, W. Wettengel, and E. Wikramanayake, 2005, Pinpointing and preventing imminent extinctions PNAS 102 (51) 18497-18501. Retrieved 01/07/2015, from: http://epi.yale.edu/downloads |
| 5 | Marine Protected Area | Percentage of each country's Exclusive Economic Zone (EEZ) that is under protection by a marine protected area (MPA). MPAs may include non-take marine reserves (forbidden: fishing, aquaculture, dredging, and mining, usually allowed: swimming, boating, and scuba diving), as well as other zones in which multiple use is afforded. The vast majority of MPAs, both in terms of numbers and area, are open for fishing, diving, boating, and other recreational and commercial uses. | National level | 2011 | Wood, L.J., 2007, MPA Global: A database of the world's marine protected areas. Sea Around Us Project, UNEP - WCMC & WWF. Retrieved 01/07/2015, from: http://epi.yale.edu/downloads |
| 5 | Conservation area proactive | Unitless index | 30 arc-minutes | 2006 | Brooks T.M., R.A. Mittermeier, G.A. da Fonseca, J. Gerlach, M. Hoffmann, J.F. Lamoreux, C.G. Mittermeier, J.D. Pilgrim, A.S. Rodrigues, 2006, Global biodiversity conservation priorities. Science 313, 58–61. doi:10.1126/science.1127609 |

Critical habitat protection sites that are identified by the Alliance of Zero Extinction (AZE). Each site represents the last refuge of one or more of the world's most highly threatened species. These sites are specified as percentage of the total AZE sites within each country that are within a protected area.
|   |   |   | Unitless index | 30 arc-minutes | 2006 | Brooks T.M., R.A. Mittermeier, G.A. da Fonseca, J. Gerlach, M. Hoffmann, J.F. Lamoreux, C.G. Mittermeier, J.D. Pilgrim, A.S. Rodrigues, 2006, Global biodiversity conservation priorities. Science 313, 58–61. doi:10.1126/science.1127609 |
|---|---|---|---|---|---|---|
| 5 | Conservation area reactive | Areas that prioritizing high vulnerability of conservation areas in highly irreplaceable regions. These areas are characterized by a high threat that unique biodiversity will soon be lost unless immediate conservation action is taken within them. The indicator is based on an overlay of different conservation approaches, such as species and habitat diversity, species and habitat rarity, ecological functions at risk etc., in order to see whether certain areas are consistently identified as being of high priority. |   |   |   |
| 5 | Species richness | Total number of species including taxonomic groups of terrestrial mammals, birds, reptiles and amphibians. The indicator is based on global range polygon data from the International Union for Conservation of Nature (IUCN) database. | Total number of species per grid cell | Calculated from range polygons | 2014 | IUCN, 2015, The IUCN Red List of Threatened Species. Spatial data download. Retrieved 01/07/2015, from: [http://www.iucnredlist.org/technical-documents/spatial-data](http://www.iucnredlist.org/technical-documents/spatial-data) |
| 5 | UN habitat protected | Percentage of terrestrial area that is officially designated as protected by countries. Data is based on the United Nations List of Protected Areas. | Percentage of terrestrial area per nation | National level | 2009 | Cross-National Socio-Economic and Religion Data, 2011, from Association of Religion Data Archive (ARDA). Retrieved 01/07/2015, from: [http://www.thearda.com/Archive/Files/Descriptions/ECON11.asp](http://www.thearda.com/Archive/Files/Descriptions/ECON11.asp) |
| 5 | Natural disasters killed | Number of people killed due to natural disasters such as floods, wildfires, mass movements etc. per country. For a disaster one of the following criteria must be fulfilled: Ten (10) or more people reported killed, hundred or more people reported affected, declaration of a state of emergency, call for international assistance. | Number of deaths average per year, per one million people | National level | 2010 | Human Development Indicator by country provided by United Nation Development Programme 2011, hosted by Socrata. Retrieved 01/07/2015, from: [https://data.undp.org/dataset/HDI-Indicators-by-Country-2013/ah6ygzy/widget_preview?height=425&variation=vb6g-9138&width=500](https://data.undp.org/dataset/HDI-Indicators-by-Country-2013/ah6ygzy/widget_preview?height=425&variation=vb6g-9138&width=500) |
| 5 | Natural disasters affected | Number of people affected by natural disasters such as floods, wildfires, mass movements etc. per country. For a disaster one of the following criteria must be fulfilled: Ten (10) or more people reported killed, hundred or more people reported affected, declaration of a state of emergency, call for international assistance. | Average number per year, per one million people | National level | 2000-2009 | Cross-National Socio-Economic and Religion Data, 2011, from Association of Religion Data Archive (ARDA).
