## Supplementary Table S1- Core Outcome Set-STAndards for Reporting (1)

| Section/topic            | Item No. | Checklist item                                                                 | Manuscript page |
|--------------------------|----------|--------------------------------------------------------------------------------|-----------------|
| **Title/abstract**       |          |                                                                                |                 |
| Title                    | 1a       | Identify in the title that the paper reports the development of a COS.          | 1,3             |
| Abstract                 | 1b       | Provide a structured summary.                                                  | 1               |
| **Introduction**         |          |                                                                                |                 |
| Background and objectives| 2a       | Describe the background and explain the rationale for developing the COS.       | 3               |
|                          | 2b       | Describe the specific objectives with reference to developing a COS.            | 4               |
| Scope                    | 3a       | Describe the health condition(s) and population(s) covered by the COS.          | 4               |
|                          | 3b       | Describe the intervention(s) covered by the COS.                               | 4               |
|                          | 3c       | Describe the setting(s) in which the COS is to be applied.                     | 4               |
| **Methods**              |          |                                                                                |                 |
| Protocol/Registry entry  | 4        | Indicate where the COS development protocol can be accessed, if available, and/or the study registration details. | 4               |
| Participants             | 5        | Describe the rationale for stakeholder groups involved in the COS development process, eligibility criteria for participants from each group, and a description of how the individuals involved were identified. | 5               |
| Information sources      | 6a       | Describe the information sources used to identify an initial list of outcomes.  | 5               |
|                          | 6b       | Describe how outcomes were dropped/combined, with reasons (if applicable).      | 6               |
| Consensus process        | 7        | Describe how the consensus process was undertaken.                             | 6               |
| Outcome scoring          | 8        | Describe how outcomes were scored and how scores were summarised.              | 8               |
| Consensus definition     | 9a       | Describe the consensus definition.                                             | 9               |
|                          | 9b       | Describe the procedure for determining how outcomes were included or excluded from consideration during the consensus process. | 9, 10           |
| Section                          | Page | Description                                                                 | References |
|----------------------------------|------|-----------------------------------------------------------------------------|------------|
| Ethics and consent               | 10   | Provide a statement regarding the ethics and consent issues for the study.   | 5          |
| Results                          |      |                                                                             |            |
| Protocol deviations              | 11   | Describe any changes from the protocol (if applicable), with reasons, and describe what impact these changes have on the results. | n/a        |
| Participants                     | 12   | Present data on the number and relevant characteristics of the people involved at all stages of COS development. | 11, 12, 13 |
| Outcomes                         | 13a  | List all outcomes considered at the start of the consensus process.         | Supp Table S3 |
|                                  | 13b  | Describe any new outcomes introduced and any outcomes dropped, with reasons, during the consensus process. | 12, Supp Table S3 |
| COS                              | 14   | List the outcomes in the final COS.                                        | 13          |
| Discussion                       |      |                                                                             |            |
| Limitations                      | 15   | Discuss any limitations in the COS development process.                    | 15          |
| Conclusions                      | 16   | Provide an interpretation of the final COS in the context of other evidence, and implications for future research. | 14,15,16   |
| Other information                |      |                                                                             |            |
| Funding                          | 17   | Describe sources of funding/role of funders.                               | 18          |
| Conflicts of interest            | 18   | Describe any conflicts of interest within the study team and how these were managed. | 18          |
### Supplementary Table S2- Recommendations for the Conducting and Reporting of Delphi Studies (CREDES)(2)

| Item no. | Recommendation | Manuscript page |
|----------|----------------|-----------------|
| **Rationale for the choice of the Delphi technique** | | |
| 1 | Justification. The choice of the Delphi technique as a method of systematically collating expert consultation and building consensus needs to be well justified. When selecting the method to answer a particular research question, it is important to keep in mind its constructivist nature | 4, 6 |
| **Planning and design** | | |
| 2 | Planning and process. The Delphi technique is a flexible method and can be adjusted to the respective research aims and purposes. Any modifications should be justified by a rationale and be applied systematically and rigorously. | 6-9 |
| 3 | Definition of consensus. Unless not reasonable due to the explorative nature of the study, an a priori criterion for consensus should be defined. This includes a clear and transparent guide for action on (a) how to proceed with certain items or topics in the next survey round, (b) the required threshold to terminate the Delphi process and (c) procedures to be followed when consensus is (not) reached after one or more iterations. | 9 |
| **Study conduct** | | |
| 4 | Informational input. All material provided to the expert panel at the outset of the project and throughout the Delphi process should be carefully reviewed and piloted in advance in order to examine the effect on experts’ judgements and to prevent bias. | 6-9 |
| 5 | Prevention of bias. Researchers need to take measures to avoid directly or indirectly influencing the experts’ judgements. If one or more members of the research team have a conflict of interest, entrusting an independent researcher with the main coordination of the Delphi study is advisable. | 6-9 |
| 6 | Interpretation and processing of results. Consensus does not necessarily imply the ‘correct’ answer or judgement; (non)consensus and stable disagreement provide informative insights and highlight differences in perspectives concerning the topic in question. | 6-9 |
| 7 | External validation. It is recommended to have the final draft of the resulting guidance on best practice reviewed and approved by an external board or authority before publication and dissemination. | 5, 6-9 |
| **Reporting** | | |
| 8 | Purpose and rationale. The purpose of the study should be clearly defined and demonstrate the appropriateness of the use of the Delphi technique as a method to achieve the research aim. A rationale for the choice of the Delphi technique as the most suitable method needs to be provided. | 4, 6-9 |
| 9 | Expert panel. Criteria for the selection of experts and transparent information on recruitment of the expert panel, sociodemographic details including information on expertise regarding the topic in question, (non)response and response rates over the ongoing iterations should be reported | 6-9, 11-13, Table 2 |
|---|---|---|
| 10 | Description of the methods. The methods employed need to be comprehensible; this includes information on preparatory steps (How was available evidence on the topic in question synthesised?), piloting of material and survey instruments, design of the survey instrument(s), the number and design of survey rounds, methods of data analysis, processing and synthesis of experts’ responses to inform the subsequent survey round and methodological decisions taken by the research team throughout the process. | 6-9 |
| 11 | Procedure. Flow chart to illustrate the stages of the Delphi process, including a preparatory phase, the actual ‘Delphi rounds’, interim steps of data processing and analysis, and concluding steps. | 11, Figure 1 |
| 12 | Definition and attainment of consensus. It needs to be comprehensible to the reader how consensus was achieved throughout the process, including strategies to deal with non-consensus. | Table 1 |
| 13 | Results. Reporting of results for each round separately is highly advisable in order to make the evolving of consensus over the rounds transparent. This includes figures showing the average group response, changes between rounds, as well as any modifications of the survey instrument such as deletion, addition or modification of survey items based on previous rounds. | 11-13, Supp Table S4 |
| 14 | Discussion of limitations. Reporting should include a critical reflection of potential limitations and their impact of the resulting guidance. | 15 |
| 15 | Adequacy of conclusions. The conclusions should adequately reflect the outcomes of the Delphi study with a view to the scope and applicability of the resulting practice guidance. | 14-17 |
| 16 | Publication and dissemination. The resulting guidance on good practice in palliative care should be clearly identifiable from the publication, including recommendations for transfer into practice and implementation. If the publication does not allow for a detailed presentation of either the resulting practice guidance or the methodological features of the applied Delphi technique, or both, reference to a more detailed presentation elsewhere should be made (e.g. availability of the full guideline from the authors or online; publication of a separate paper reporting on methodological details and particularities of the process (e.g. persistent disagreement and controversy on certain issues)). A dissemination plan should include endorsement of the guidance by professional associations and health care authorities to facilitate implementation. | 14-17 |
| Outcome domain                      | Outcome                                      | Definition                                                                                                                                                                                                 | Round/s |
|-------------------------------------|----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| **Anthropometry**                   | Child weight-based anthropometry             | Includes child height, weight, body mass index (BMI), BMI z-score, percentile, prevalence of overweight and obesity, weight for height or length.                                                            | 1,2,3   |
|                                     | Child body composition                       | Proportion of fat, muscle, bone and water. Includes child lean body mass, body fat, percent body fat, fat free mass, abdominal fat, skinfolds.                                                               | 1,2,3   |
|                                     | Child circumference                          | Includes child waist circumference, waist to height/length, arm circumference, head shape or circumference.                                                                                               | 1,2,3   |
| **Sedentary behaviour**             | Child screen time                            | Includes time spent by the child watching DVDs, TV, videos or using computers, tablets, smart phones or other portable electronic devices.                                                             | 1,2,3   |
|                                     | Sedentary behaviour or physical activity home environment | Includes measures of the home environment that may influence sedentary behaviour or physical activity, including fixed and non-fixed home and yard features. For example, size of backyard, presence of playground or play equipment. | 1,2,3   |
|                                     | Child time spent sedentary                   | Includes time spent by the child sitting, lying awake, immobile but awake, or with no trunk movement. Includes time spent in restricted movement (e.g. in a car seat or a stroller). Does not include time asleep or screen time. | 1,2,3   |
| **Physical activity**               | Child active transport                       | Includes frequency, duration, use of active transport by the child (e.g. walking, cycling, public transport or scooting).                                                                                   | 1,2,3   |
|                                     | Child physical fitness                       | Includes measures of child physical fitness, including shuttle run tests, handgrip strength tests, standing long jump tests, one-leg stance tests.                                                        | 1,2,3   |
|                                     | Child active indoor play                     | Includes frequency or time spent by the child in active indoor play, playing indoors, indoor play in a playful context combined with activity that is above resting metabolic rate. | 1,2,3   |
| Category                        | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | References |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Child active outdoor play      | Includes frequency or time spent outdoors by the child, playing outdoors, in active outdoor play or outdoor play in a playful context combined with activity that is above resting metabolic rate.                                                                                                                                                                                                                                                                  | 1,2,3      |
| Child physical activity        | Includes frequency or time spent by the child in physical activity, including total physical activity, moderate-to-vigorous physical activity, leisure physical activity, walking, crawling. Includes organised physical activity (e.g. frequency or time spent by the child at sport, dance, swimming) and unorganised physical activity (e.g. frequency of time spent by the child in energetic play, play, active play, running, jumping, climbing, structured free play or common play activities, frequency or time spent by the child at the park, playground, excursions). | 1,2,3      |
| Infant tummy time              | Includes commencement age, frequency, time spent by the infant in tummy time.                                                                                                                                                                                                                                                                                                                                                    | 1,2,3      |
| Infant floor based play time   | Includes time spent by the infant playing on the floor, unconfined or unrestrained.                                                                                                                                                                                                                                                                                                                                                 | 1,2,3      |
| Child enjoyment of physical activity and playing | Includes child’s enjoyment of playing with parents, child’s enjoyment of physical activity (movement, play), child’s enjoyment of playing with objects and toys.                                                                                                                                                                                                                                                  | 1,2,3      |
| Sleep                          | Includes child sleep quantity, hours of total daily sleep duration, total minutes of sleep in 24-hour period, the average length of a sleep bout and duration of individual sleep bouts, average night time sleep, sleep hours per night, sleep consecutive hours at night, rate of sleeping through the night. Can be used to derive child awake time.                                                                                                                                                                                                 | 1,2,3      |
| Child sleep duration           | Includes difficulty sleeping, difficulty falling asleep in own bed, sleep reluctance, disturbances in the amount or quality of sleep, night wakings of the child.                                                                                                                                                                                                                                                                       | 1,2,3      |
| Child sleep efficiency         | The percentage of total time the child spends in bed actually spent in sleep.                                                                                                                                                                                                                                                                                                                                                    | 1,2,3      |
| Child sleep latency            | The time it takes the child to fall asleep.                                                                                                                                                                                                                                                                                                                                                                                        | 1,2,3      |
| Child sleep patterns or timing | Includes napping or sleep patterns, timing of sleeps of the child. | 1,2,3 |
|-------------------------------|---------------------------------------------------------------|-----|
| Child sleep quality | Quality of sleep of the child. | 1,2,3 |

**Dietary intake**

| Child carbohydrate intake or glycemic load | Includes quantity or frequency of carbohydrate intake by the child, glycemic load of the child (rates carbohydrates according to how quickly they raise blood glucose). | 1,2,3 |
| Child dairy intake | Includes quantity or frequency of dairy intake by the child. Also includes child's requests for calcium, dairy or milk products. | 1,2,3 |
| Child diet quality | Includes child's diet quality in relation to the proportion of less healthy foods in relation to overall energy intake, the proportion of healthy foods in relation to overall energy intake, the intake of nutrients compared to dietary guideline recommendations, the intake of a healthy dietary pattern, the change in healthy meals consumed; child healthy eating index score or child nutrition risk scores. | 1,2,3 |
| Child dietary intake | Includes quantity or frequency of child's general dietary intake. | 1,2,3 |
| Child fat intake | Includes quantity or frequency of child's fat intake. | 1,2,3 |
| Child fibre intake | Includes quantity or frequency of child's fibre intake. | 1,2,3 |
| Child fruit and vegetable intake | Includes quantity or frequency of child's consumption of fruits and/or vegetables. | 1,2,3 |
| Child grains, breads, cereals intake | Includes quantity or frequency of child's consumption of cereals, bread, pasta, rice, porridge, whole grains. | 1,2,3 |
| Child meat, poultry, fish intake | Includes quantity or frequency of child's consumption of meat, poultry, fish. | 1,2,3 |
| Child non-core food intake | Includes quantity or frequency of child's consumption of processed snack foods, energy dense sweets (e.g. chocolate bars, ice cream), high caloric foods, savoury snacks, discretionary calories, french fries, fast or deep-fried foods. | 1,2,3 |
| Category                                                   | Description                                                                                                                                                                                                 | References |
|------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Child non-core beverages intake                            | Includes quantity or frequency of consumption of sodas, soft drinks, sugar-sweetened beverages, juices, cordials, high caloric drinks by the child.                                                           | 1,2,3      |
| Child out of home foods intake                             | Includes quantity or frequency of child's consumption of meals not prepared in the home, commercially prepared meals, fast foods, eating in restaurants.                                                   | 1,2,3      |
| Child protein intake                                        | Includes quantity or frequency of child's protein intake.                                                                                                                                                   | 1,2,3      |
| Child sodium intake                                         | Includes quantity or frequency of child's sodium intake.                                                                                                                                                   | 1,2,3      |
| Child total and added sugars intake                         | Includes quantity or frequency of child's consumption of total and added sugars, foods with added sugars.                                                                                                   | 1,2,3      |
| Child desire for drinks                                     | Includes child's desire or requests for drinks.                                                                                                                                                              | 1,2,3      |
| Child eating in response to emotion                         | Child eating more or less, in response to emotional state, emotional undereating, emotional overeating.                                                                                                     | 1,2,3      |
| Child enjoyment of food                                     | Includes child's response to the food, enjoyment of food.                                                                                                                                                   | 1,2,3      |
| Child meal patterns                                         | Includes child meal times and snack patterns, number of meals per day.                                                                                                                                     | 1,2,3      |
| Child food neophobia                                        | Includes child reluctance to eat, selectivity about the range of foods accepted or the avoidance or unwillingness to eat new foods.                                                                        | 1,2,3      |
| Child satiety responsiveness                               | Includes child feeding self-regulation, stopping eating when full.                                                                                                                                         | 1,2,3      |
| Child slowness in eating                                    | Child dawdling over meals, eating slowly.                                                                                                                                                                   | 1,2,3      |
| Outcomes in parents/caregivers                             | Parent/caregiver weight based anthropometry Includes parent/caregiver height, weight, body mass index (BMI), BMI z-score, percentile, prevalence of overweight and obesity, weight for height or length. | 1,2,3      |
|                                                           | Parent/caregiver screen time parenting practice Includes rules around screen time in the home or early education and care settings. Includes parents' use of TV viewing as a form of family recreation, | 1,2,3      |
| **Parent/caregiver role modelling of sedentary behaviours** | **Includes frequency, time spent by the parent/caregiver in sedentary activities, such as watching TV, sitting, lying still.** | 1,2,3 |
| **Parent/caregiver role modelling of physical activity** | **Includes frequency or time spent by the parent/caregiver in physical activity, or work-related physical activities.** | 1,2,3 |
| **Parent/caregiver role modelling of healthy eating** | **Parent/caregiver role modelling of healthy eating (e.g. eating a wide variety of fruits and vegetables, minimising discretionary food intake)** | 1,2,3 |
| **Parent/caregiver encouragement of physical activity** | **Includes encouragement of physical activity by parent/caregiver, support for physical activity.** | 1,2,3 |
| **Parent/caregiver co-participation in physical activity** | **Includes engagement of parent/caregiver in physical activity or physically active play with child.** | 1,2,3 |
| **Parent/caregiver physical activity parenting practice** | **Includes parent/caregiver rules and practices, intentions or habit strength for activity behaviours.** | 1,2,3 |
| **Parent/caregiver sleep parenting practice** | **Includes general sleep parent/caregiver practices, bedtime or sleep routine, assistance to sleep by touching, intervening when awake in the night.** | 1,2,3 |
| **Parent/caregiver daytime dysfunction or fatigue** | **Parent/caregiver difficulty in carrying out tasks due to tiredness or sleepiness. Parent/caregiver feeling of extreme or constant tiredness.** | 1,2,3 |
| **Parent/caregiver nutrition parenting practices** | **Includes parent/caregiver rules about nutrition, trying new foods, habit strength for new feeding behaviours.** | 1,2,3 |
| **Parent/caregiver’s dietary intentions** | **Includes parent/caregiver’s readiness or intention to eat more fruit and vegetables, habit strength for dietary behaviours.** | 1,2,3 |
| **Parent/caregiver food variety** | **Includes variation in types of foods offered by the parent/caregiver.** | 1,2,3 |
| Parent/caregiver anxiety symptoms | Parent/caregiver symptoms of anxiety. | 1,2,3 |
|----------------------------------|-------------------------------------|------|
| Parent/caregiver concerns about child's weight | Parent/caregiver concerns about child's weight. | 1,2,3 |
| Parent/caregiver depression symptoms | Parent/caregiver symptoms of depression. | 1,2,3 |
| Parent/caregiver self-efficacy | Includes parent/caregiver self-efficiency, self-efficacy, confidence, self-agency for promoting healthy behaviours. | 1,2,3 |
| Parent/caregiver social support | Includes parent/caregiver support, partner and family support. | 1,2,3 |
| Parent/caregiver stress | Parent/caregiver feeling of emotional tension. | 1,2,3 |
| Parent/caregiver attitudes | Parent/caregiver attitudes towards obesogenic behaviours, a healthy lifestyle, nutrition, physical activity, feeding. | 1,2,3 |
| Parent/caregiver awareness of behaviours | Parent/caregiver awareness of physical activity behaviours and feeding practices. | 1,2,3 |
| Parent/caregiver beliefs | Parent/caregiver beliefs in relation to feeding, healthy eating, physical activity, feeding. | 1,2,3 |
| Parent/caregiver health literacy | The skills and knowledge of a person to access, understand and use information to make decisions, and take action about health and healthcare, food, physical activity. | 1,2,3 |
| Parent/caregiver knowledge | Parent/caregiver knowledge of food, feeding, nutrition, physical activity, exercise, healthy eating, active play, sedentary behaviours, the sustainability consequences of food and toy selections, healthy lifestyles. | 1,2,3 |
| Parent/caregiver readiness to change | Parent/caregiver motivation, readiness for lifestyle change. | 1,2,3 |
| **Parenting style** | Includes parental style in relation to general parenting, healthy behaviours, discipline, rules, anxiety, nurturance, involvement, routine, anxiety, parental authority, cry tolerance and limit setting abilities. |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| **Parent/caregiver responsiveness** | Defined as the sensitive and accepting behaviours identified in a parent/caregiver toward a child. |
| **Family functioning** | The social and structural properties of the global family environment. |
| **Parent/caregiver perception of child weight** | Parent/caregiver perception of child weight, weight status, BMI, obesity risk. |
| **Perception of parent/caregiver influence on child's health behaviours** | Perception of parent/caregiver influence on child's health behaviours. |
| **Parent/caregiver perceptions of adequacy of resources and barriers** | Includes parent/caregiver perceptions of time and resource barriers to meal preparation, adequacy of resources needed to plan and prepare meals. |
| **Feeding** |  |
| **Parent/caregiver feeding control** | Includes parent/caregiver feeding control practices, restriction, covert restriction, pressure to eat, monitoring. |
| **Parent/caregiver emotional feeding** | Includes parent/caregiver using food to regulate the child’s emotional states. |
| **Parent/caregiver feeding encouragement** | Includes parent/caregiver encouraging child’s involvement in meal planning and preparation, promoting well-balanced food intake, teaching about nutrition. |
| **Parent/caregiver feeding interaction** | Includes parent/caregiver child-feeding interaction, encouragement to eat. |
| **Parent/caregiver feeding structure** | Includes positive, structure based feeding practices (limit-setting, consistent routines) that promote self-regulation. |
| **Parent/caregiver feeding style** | Parent/caregiver style in relation to feeding. | 1,2,3 |
|----------------------------------|-----------------------------------------------|------|
| **Parent/caregiver using food as a reward** | Includes parent/caregiver using food as a reward. | 1,2,3 |
| **Parent/caregiver frequency of bottle use** | Frequency of bottle use by parent/caregiver to feed child. | 1,2,3 |
| **Parent/caregiver promoting autonomy** | Includes parent/caregiver promoting internal control of eating, parents/caregivers allow the child control of his/her eating behaviours. | 1,2,3 |
| **Parent/caregiver that is responsible for feeding** | Includes person/s responsible for feeding. | 1,2,3 |

**Environmental**

| **Food environment** | Includes environments in which food is consumed, available, purchased, available to be purchased. Includes proximity to food store locations, the distribution of food store locations, accessibility and convenience of food sources. | 1,2,3 |
| **Household food security** | Reliable access to healthy and nutritious foods. | 1,2,3 |
| **Family meal environment** | Includes frequency of eating meals together as a family with the TV off, number of days that the child had dinner while watching TV, media device use at family meals, no. of days when healthy mealtimes occurred, family meals in car, at fast food restaurant, at dining table, eating alone. | 1,2,3 |
| **Early childhood education and care (ECEC) environment** | Includes fixed or non-fixed environmental features of childcare, preschool or kindergarten to address obesity-related behaviours (e.g. poor nutrition or diet, insufficient physical activity, excess sedentary behaviour, insufficient sleep). Fixed features might include playgrounds, kitchens. Non-fixed features might include service organisational and policies, equipment. | 1,2,3 |
| **Healthcare environment** | Physical environment in which healthcare is accessed. | 1,2,3 |
| Emotional or cognitive functioning | Child internalising and/or externalising behaviours | Aggressive, internalising and externalizing behaviours in child. | 1,2,3 |
|-----------------------------------|---------------------------------------------------|----------------------------------------------------------------|-----|
| Child emotion regulation          | Includes reports of child anger, frustration, temperament, emotional coping, emotion self-regulation. |                                                                 | 1,2,3 |
| Child emotional development       | The ability of the child to recognise, express, and manage feelings and to have empathy for the feelings of others. |                                                                 | 1,2,3 |
| Child school readiness            | A measure of the knowledge, skills and behaviours that enable children to participate and succeed in school. |                                                                 | 1,2,3 |
| Child wellbeing                   | Includes social-emotional wellbeing and emotional health of the child. |                                                                 | 1,2,3 |
| Child attention control           | Child's ability to stay focused.                  |                                                                 | 1,2,3 |
| Child cognitive development       | Includes child communication, problem solving and personal social skills. |                                                                 | 1,2,3 |
| Child executive function          | Includes tests for child's working memory, inhibition. |                                                                 | 1,2,3 |
| Child self-regulation             | Includes child's ability to stop doing a task, inhibitory control, self-regulation. |                                                                 | 1,2,3 |
| Motor skill development           | Child fundamental movement skills                 | Includes motor skills, locomotor skills (run, gallop, hop, leap, horizontal jump, slide and balance), object control skills (striking a stationary ball, stationary dribble, catch, kick, overhand throw and underhand roll, shuttle run (speed), standing long jump (speed strength), one leg stand (coordination, static balance), sit and reach (flexibility), and lateral jumping (coordination, strength endurance), motor agility, dynamic balance. | 1,2,3 |
| Perceptions of child/parent/caregiver/family and preferences | Child activity preference or perception | Includes change in liking, degree of liking activity by child. | 1,2,3 |
|                                   | Child food preference                             | Includes change in liking, degree of liking food by child.       | 1,2,3 |
| Blood and lymphatic system | Child blood pressure | Blood pressure of the child. | 1,2,3 |
|---------------------------|----------------------|-------------------------------|------|
| Child cholesterol         | Cholesterol of the child. |                              | 1,2,3 |
| Child glucose             | Glucose of the child. |                              | 1,2,3 |
| Child hemoglobin          | Hemoglobin of the child. |                              | 1,2,3 |
| Child lipids              | Lipids of the child. |                              | 1,2,3 |
| Child metabolic and inflammatory parameters | Metabolic and inflammatory parameters of the child. | 1,2,3 |
| Quality of life           | Child health-related quality of life | An individual's or a group's perceived physical and mental health over time. | 1,2,3 |
| Economic                  | Economic evaluation  | Includes any form of economic evaluation, including cost-effectiveness analysis, cost-utility analysis. | 1,2,3 |
|                           | Child healthcare utilisation | Includes cost and quantity of health care or services used by the child. | 1,2,3 |
|                           | Intervention cost     | Cost of intervention. | 1,2,3 |
| Oral health               | Child oral hygiene    | Includes tooth-brushing and oral and dental behaviours of the child. | 1,2,3 |
|                           | Child dental caries    | Includes presence, number, rate and severity of caries in the child. | 1,2,3 |
| Anthropometry             | Birth weight adjusted for gestational age | Child weight at birth adjusted for gestational age | 2,3 |
| Environmental             | Household Chaos       | Household chaos is characterized by high levels of confusion, disorganisation and hurriedness in the home | 2,3 |
| Outcomes in parents/caregivers | Parent/caregiver body image and satisfaction | Parent/caregiver thoughts and feelings about their body, including satisfaction or dissatisfaction about shape, weight and body parts. | 2,3 |
| Emotional or cognitive functioning | Child self esteem | Child liking themself, believing in themself, feeling worthwhile and knowing what they do well. | 2,3 |
|-----------------------------------|------------------|--------------------------------------------------------------------------------------------|----|
| Parent child mutually responsive orientation | Mutually responsive orientation encompasses shared cooperation and shared positive affect between parent and child. | 2,3 |
| **Dietary intake** | Child fruit intake | Includes quantity or frequency of child's consumption of fruits (separate from vegetable intake). | 2,3 |
| | Child vegetable intake | Includes quantity or frequency of child's consumption of vegetables (separate from fruit intake). | 2,3 |
Supplementary Table S4- Summary results by stakeholder group and eDelphi round

|                      | Health professionals | Community or organisational | Parent/caregiver | Policy-maker or funder | Researcher | Mean of stakeholder group mean scores |
|----------------------|----------------------|-----------------------------|------------------|------------------------|-----------|--------------------------------------|
| **01 - Child weight based anthropometry** |                      |                             |                  |                        |           |                                      |
| **Round 1**          |                      |                             |                  |                        |           |                                      |
| Mean score           | 7                    | 6.7                         | 6.5              | 8.0                    | 8.1       | 7.3                                  |
| Median score         | 8                    | 7                           | 7                | 9                      | 9         |                                      |
| MADM                 | 1.4                  | 0.9                         | 1.3              | 1.1                    | 0.9       |                                      |

### 04- Child screen time

#### Round 1

| Mean score | 7.7 | 7.7 | 7.3 | 7.9 | 7.5 | 7.6 |
| Median score | 8 | 8 | 7 | 9 | 8.0 |
| MADM | 1.2 | 0.9 | 1.4 | 1.1 | 1.1 |
| Agreement | Moderate | High | High | High | Moderate |
| Consensus | Consensus | No consensus | Consensus | Consensus | Consensus |

#### Round 2

| Mean score | 8.0 | 7.7 | 7.4 | 8.1 | 7.7 | 7.8 |
| Median score | 8 | 8 | 7 | 9 | 8 |
| MADM | 1.0 | 1.0 | 1.3 | 0.9 | 0.9 |
| Agreement | High | High | Moderate | High | High |
| Consensus | Consensus | No consensus | Consensus | Consensus | Consensus |

#### Round 3

| Mean score | 7.5 | 8.0 | 7.7 | 8.3 | 7.8 | 7.9 |
| Median score | 8 | 8 | 7.5 | 9 | 8 |
| MADM | 0.8 | 0.7 | 1.0 | 0.7 | 0.9 |
| Agreement | High | High | High | High | High |
| Consensus | Consensus | Consensus | Consensus | Consensus | Consensus |

### 05- Sedentary behaviour or physical activity home environment

#### Round 1

| Mean score | 7.6 | 7.4 | 7.8 | 7.8 | 7.1 | 7.6 |
| Median score | 8 | 8 | 8 | 9 | 7 |
| MADM | 1.2 | 1.1 | 0.8 | 1.2 | 1.2 |
| Agreement | Moderate | High | High | Moderate | Moderate |

|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

### Notes

- Median score is the middle value.
- MADM (Mean Absolute Deviation from the Mean) is a measure of variability.
- Agreement is categorized as High, Moderate, or No consensus.
- Consensus indicates whether a consensus was reached.

---

**04- Child screen time**

**Round 1**

- **Mean score**: 7.7, 7.7, 7.3, 7.9, 7.5, 7.6
- **Median score**: 8, 8, 7, 9, 8.0
- **MADM**: 1.2, 0.9, 1.4, 1.1, 1.1
- **Agreement**: Moderate, High, High, High, Moderate
- **Consensus**: Consensus, Consensus, No consensus, Consensus, Consensus

**Round 2**

|       | 5.6          | 1.2  | Moderate  | No consensus |

### 33- Child protein intake

| Round | Mean score | MADM | Agreement | Consensus |
|-------|------------|------|-----------|-----------|
| 1     | 6.5        | 1.0  | High      | Consensus |
|       | 6.6        | 1.3  | Moderate  | No consensus |
|       | 6.8        | 1.2  | Moderate  | No consensus |
|       | 6.6        | 1.1  | Moderate  | No consensus |
|       | 5.7        | 1.4  | Low       | No consensus |
| 2     | 6.6        | 0.8  | High      | Consensus |
|       | 7.3        | 1.3  | Moderate  | No consensus |
|       | 6.8        | 1.0  | Moderate  | No consensus |
|       | 6.5        | 1.4  | Moderate  | No consensus |
|       | 5.7        | 1.3  | Low       | No consensus |
| 3     | 6.9        | 0.9  | High      | Consensus |
|       | 7.8        | 1.0  | High      | No consensus |
|       | 7.2        | 0.8  | High      | No consensus |
|       | 6.2        | 1.3  | Moderate  | No consensus |
|       | 5.6        | 1.2  | Moderate  | No consensus |

### 34- Child sodium intake

| Round | Mean score | MADM | Agreement | Consensus |
|-------|------------|------|-----------|-----------|
| 1     | 6.4        | 1.4  | Low       | No consensus |
|       | 6.7        | 1.1  | Moderate  | No consensus |
|       | 6.4        | 1.6  | Low       | No consensus |
|       | 6.5        | 1.3  | Moderate  | No consensus |
|       | 5.6        | 1.4  | Low       | No consensus |
| 2     | 6.4        | 1.0  | High      | Consensus |
|       | 6.7        | 1.0  | High      | No consensus |
|       | 6.4        | 0.8  | High      | No consensus |
|       | 6.5        | 1.3  | Moderate  | No consensus |
|       | 5.6        | 1.2  | Moderate  | No consensus |
| 3     | 6.4        | 0.9  | High      | Consensus |
|       | 6.7        | 1.0  | High      | No consensus |
|       | 6.4        | 0.8  | High      | No consensus |
|       | 6.5        | 1.3  | Moderate  | No consensus |
|       | 5.6        | 1.2  | Moderate  | No consensus |

**Notes:**
- Median score values are listed for rounds 1, 2, and 3.
- MADM values are listed for rounds 1, 2, and 3.
- Agreement levels are rated as High, Moderate, or Low.
- Consensus status is noted as Consensus, No consensus, or No consensus.
| Round 2 | No consensus | No consensus | No consensus | No consensus | No consensus |
|---------|--------------|--------------|--------------|--------------|--------------|
| Mean score | 6.5 | 7.2 | 5.6 | 6.3 | 5.5 | 6.2 |
| Median score | 7 | 7 | 6 | 6 | 6 | 6 |
| MADM | 1.2 | 0.4 | 1.2 | 1.4 | 1.3 | 1.3 |
| Agreement | Moderate | High | Moderate | Low | Moderate | Consensus |
| | No consensus | Consensus | No consensus | No consensus | No consensus |

| Round 3 | No consensus | No consensus | No consensus | No consensus | No consensus |
|---------|--------------|--------------|--------------|--------------|--------------|
| Mean score | 6.7 | 7.6 | 6.3 | 6.9 | 5.4 | 6.6 |
| Median score | 7 | 8 | 6 | 7 | 6 | 6 |
| MADM | 1.1 | 0.4 | 0.7 | 1.4 | 1.3 | 1.3 |
| Agreement | High | High | High | Low | Moderate | Consensus |
| | No consensus | Consensus | No consensus | No consensus | No consensus |

### 35- Child total and added sugars intake

#### Round 1

| Mean score | 7.6 | 7.0 | 7.8 | 7.8 | 7.2 | 7.5 |
| Median score | 8 | 7 | 8 | 8 | 7 | 7 |
| MADM | 1.1 | 1.2 | 1.2 | 0.9 | 1.2 | 1.2 |
| Agreement | Moderate | Moderate | Moderate | High | Moderate | Consensus |
| | Consensus | No consensus | Consensus | Consensus | No consensus |

#### Round 2

| Mean score | 8.2 | 7.8 | 7.3 | 8.0 | 7.3 | 7.7 |
| Median score | 8 | 8 | 8 | 8 | 8 | 8 |
| MADM | 0.7 | 0.9 | 1.1 | 0.9 | 1.0 | 1.0 |
| Agreement | High | High | Moderate | High | High | Consensus |
| | Consensus | Consensus | No consensus | Consensus | No consensus |

#### Round 3

| Mean score | 8.2 | 8.0 | 7.5 | 8.0 | 7.3 | 7.8 |
| Median score | 9 | 8 | 8 | 8 | 8 | 8 |
| MADM | 0.8 | 0.8 | 0.5 | 0.9 | 1.1 |
|------|-----|-----|-----|-----|-----|
| Agreement | High | High | High | High | Moderate |
| Consensus | No consensus | Consensus | Consensus | No consensus |

### 36- Child desire for drinks

| Round 1 | Mean score | 6.7 | 6.8 | 6.5 | 5.7 | 5.6 | 6.3 |
|---------|-------------|-----|-----|-----|-----|-----|-----|
| Median score | 7 | 7 | 7 | 6 | 6 |
| MADM | 1.6 | 1.3 | 1.6 | 1.5 | 1.6 |
| Agreement | Low | Moderate | Low | Low | No consensus |

| Round 2 | Mean score | 6.8 | 7.6 | 5.8 | 6.1 | 5.5 | 6.4 |
|---------|-------------|-----|-----|-----|-----|-----|-----|
| Median score | 7 | 8 | 6 | 6 | 6 |
| MADM | 1.2 | 0.9 | 2.0 | 1.2 | 1.6 |
| Agreement | Moderate | High | Low | Moderate | Low |

| Round 3 | Mean score | 6.9 | 7.8 | 6.2 | 6.3 | 5.4 | 6.5 |
|---------|-------------|-----|-----|-----|-----|-----|-----|
| Median score | 7 | 8 | 6 | 6 | 6 |
| MADM | 1.2 | 0.6 | 1.5 | 1.4 | 1.6 |
| Agreement | Moderate | High | Low | Low | No consensus |

### 37- Child eating in response to emotion

| Round 1 | Mean score | 7.3 | 7.1 | 7.1 | 6.4 | 6.2 | 6.8 |
|---------|-------------|-----|-----|-----|-----|-----|-----|
| Median score | 7 | 7 | 7 | 6 | 6 |
| MADM | 1.4 | 1.2 | 1.5 | 1.6 | 1.3 |
| Agreement | Moderate | Moderate | Low | Low | Moderate |

| No consensus | No consensus | No consensus | No consensus | No consensus | No consensus | No consensus |
| Round 2 | Mean score | 7.6 | 7.7 | 7.0 | 6.8 | 6.2 | 7.0 |
|---------|------------|-----|-----|-----|-----|-----|-----|
| Median score | 8 | 8 | 7 | 7 | 6 |
| MADM | 1.1 | 0.8 | 1.0 | 1.5 | 1.0 |
| Agreement | Moderate | High | High | Low | High |
| Round 3 | Mean score | 8.0 | 7.7 | 7.2 | 7.3 | 6.2 | 7.3 |
| Median score | 9 | 8 | 7 | 8 | 6 |
| MADM | 1.0 | 0.7 | 0.8 | 1.3 | 1.0 |
| Agreement | High | High | High | Moderate | High |
| Consensus | Consensus | No consensus | No consensus | No consensus |

### 38- Child enjoyment of food

#### Round 1
| Mean score | 6.7 | 6.8 | 7.2 | 6.5 | 6.0 | 6.6 |
| Median score | 7 | 7 | 7 | 7 | 6 |
| MADM | 1.4 | 1.3 | 0.9 | 1.9 | 1.4 |
| Agreement | Low | Moderate | High | Low | Low |
| Consensus | No consensus | No consensus | Consensus | No consensus | No consensus |

#### Round 2
| Mean score | 6.9 | 7.6 | 6.7 | 6.9 | 6.0 | 6.8 |
| Median score | 7 | 8 | 7 | 7 | 6 |
| MADM | 1.4 | 1.0 | 0.9 | 1.4 | 1.2 |
| Agreement | Moderate | High | High | Low | Moderate |
| Consensus | No consensus | Consensus | No consensus | No consensus | No consensus |

#### Round 3
| Mean score | 6.9 | 8.3 | 7.3 | 7.0 | 6.0 | 7.1 |
| Median score | 6 | 8 | 8 | 8 | 6 |
| MADM | 1.3 | 0.3 | 1.0 | 1.7 | 1.1 |
## 39- Child meal patterns

| Round 1 | Mean score | Median score | MADM | Agreement | Consensus |
|---------|------------|--------------|------|-----------|-----------|
| Round 1 | 7.3        | 7            | 1.1  | Moderate  | No consensus |
| Round 2 | 7.0        | 8            | 1.3  | Moderate  | Consensus  |
| Round 3 | 7.2        | 8            | 1.4  | Moderate  | No consensus |

## 40- Child food neophobia

| Round 1 | Mean score | Median score | MADM | Agreement |
|---------|------------|--------------|------|-----------|
| Round 1 | 6.8        | 7            | 1.7  | Low       |
| Round 2 | 6.4        | 7            | 1.5  | Low       |
| Round 3 | 6.6        | 7            | 1.2  | Moderate  |

## 39- Child meal patterns

| Round 2 | Mean score | Median score | MADM | Agreement |
|---------|------------|--------------|------|-----------|
| Round 2 | 7.6        | 7            | 0.9  | High      |
| Round 3 | 7.6        | 8            | 0.4  | High      |

## 40- Child food neophobia

| Round 2 | Mean score | Median score | MADM | Agreement |
|---------|------------|--------------|------|-----------|
| Round 2 | 7.3        | 8            | 0.7  | High      |
| Round 3 | 8.0        | 8            | 0.9  | High      |

| Round 3 | Mean score | Median score | MADM | Agreement |
|---------|------------|--------------|------|-----------|
| Round 3 | 7.3        | 8            | 0.7  | High      |

| Round 3 | Mean score | Median score | MADM | Agreement |
|---------|------------|--------------|------|-----------|
| Round 3 | 7.6        | 8            | 0.9  | High      |

## 40- Child food neophobia

| Round 3 | Mean score | Median score | MADM | Agreement |
|---------|------------|--------------|------|-----------|
| Round 3 | 6.9        | 7            | 0.9  | High      |

| Round 3 | Mean score | Median score | MADM | Agreement |
|---------|------------|--------------|------|-----------|
| Round 3 | 7.4        | 7            | 0.9  | High      |

| Round 3 | Mean score | Median score | MADM | Agreement |
|---------|------------|--------------|------|-----------|
| Round 3 | 6.2        | 6            | 1.3  | Moderate  |

| Round 3 | Mean score | Median score | MADM | Agreement |
|---------|------------|--------------|------|-----------|
| Round 3 | 6.2        | 6            | 1.3  | Moderate  |
### Mean Scores

| Round | Mean Score | Median Score | MADM | Agreement |
|-------|------------|--------------|------|-----------|
| 1     | 7.3        | 7.2          | 7.2  | High      |
|       | 5.7        | 5.8          | 6.6  | Moderate  |
| 2     | 7.2        | 7.2          | 0.9  | High      |
|       | 1.0        | 1.0          | 1.2  | Moderate  |
| 3     | 5.7        | 5.8          | 6.6  | Moderate  |

### Round 3

| Mean Score | Median Score | MADM | Agreement |
|------------|--------------|------|-----------|
| 7.4        | 7.5          | 7.4  | High      |
| 6.3        | 6.3          | 6.3  | Moderate  |
| 5.6        | 5.6          | 6.8  | Moderate  |

### Mean Score

| Round | Mean Score | Median Score | MADM | Agreement |
|-------|------------|--------------|------|-----------|
| 1     | 6.7        | 7.2          | 7.2  | Moderate  |
|       | 6.3        | 6.3          | 6.3  | Moderate  |
|       | 6.8        | 6.6          | 6.6  | Moderate  |

### Round 2

| Mean Score | Median Score | MADM | Agreement |
|------------|--------------|------|-----------|
| 7.5        | 7.9          | 7.1  | High      |
| 6.8        | 6.6          | 7.2  | Moderate  |
| 7.2        | 7.2          | 7.1  | Moderate  |

### Round 3

| Mean Score | Median Score | MADM | Agreement |
|------------|--------------|------|-----------|
| 7.8        | 8.4          | 7.5  | High      |
| 7.0        | 7.0          | 7.4  | Moderate  |

### Child satiety responsiveness

| Round | Mean Score | Median Score | MADM | Agreement |
|-------|------------|--------------|------|-----------|
| 1     | 6.7        | 7.2          | 7.2  | Moderate  |
|       | 6.3        | 6.3          | 6.3  | Moderate  |
|       | 6.8        | 6.6          | 6.6  | Moderate  |

### Round 2

| Mean Score | Median Score | MADM | Agreement |
|------------|--------------|------|-----------|
| 7.5        | 7.9          | 7.1  | High      |
| 6.8        | 6.6          | 7.2  | Moderate  |
| 7.2        | 7.2          | 7.1  | Moderate  |

### Round 3

| Mean Score | Median Score | MADM | Agreement |
|------------|--------------|------|-----------|
| 7.8        | 8.4          | 7.5  | High      |
| 7.0        | 7.0          | 7.4  | Moderate  |
| 6.5        | 6.5          | 7.4  | Moderate  |

| Agreement | Moderate  | High  | Low  | Moderate | Low |
|         | No consensus | No consensus | No consensus | No consensus | No consensus |
| Round 3 | Mean score | 6.0 | 7.2 | 5.5 | 4.9 | 5.1 | 5.7 |
| Median score | 6.0         | 7.0 | 5.0 | 4.5 | 5.0 |
| MADM    | 1.2          | 1.0 | 1.5 | 1.4 | 1.4 |
| Agreement | Moderate  | High  | Low  | Moderate | Moderate |
|         | No consensus | No consensus | No consensus | No consensus | No consensus |
### 103- Child glucose

#### Round 1

|            | Mean score | Median score | MADM | Agreement |
|------------|------------|--------------|------|-----------|
|            | 5.9        | 6.0          | 1.6  | Low       |
|            | 6.4        | 7.0          | 0.9  | High      |
|            | 6.8        | 7.0          | 1.7  | Low       |
|            | 5.3        | 5.0          | 1.4  | Moderate  |
|            | 5.7        | 6.0          | 1.7  | Low       |

#### Round 2

|            | Mean score | Median score | MADM | Agreement |
|------------|------------|--------------|------|-----------|
|            | 6.7        | 7.0          | 1.1  | Moderate  |
|            | 7.0        | 7.0          | 0.5  | High      |
|            | 6.5        | 7.0          | 1.7  | Low       |
|            | 5.4        | 5.0          | 1.2  | Moderate  |
|            | 6.0        | 5.5          | 1.6  | No consensus |

#### Round 3

|            | Mean score | Median score | MADM | Agreement |
|------------|------------|--------------|------|-----------|
|            | 6.5        | 7.0          | 1.2  | Moderate  |
|            | 6.8        | 7.0          | 0.2  | High      |
|            | 6.4        | 7.0          | 2.2  | Low       |
|            | 5.1        | 5.0          | 1.1  | Moderate  |
|            | 5.4        | 5.4          | 1.4  | Moderate  |
|            | 6.1        | 6.1          | 1.7  | Moderate  |

### 104- Child hemoglobin

#### Round 1

|            | Mean score | Median score | MADM | Agreement |
|------------|------------|--------------|------|-----------|
|            | 5.5        | 6.0          | 1.7  | Low       |
|            | 5.9        | 7.0          | 1.3  | Moderate  |
|            | 5.6        | 6.0          | 1.8  | Low       |
|            | 4.8        | 5.0          | 1.4  | Moderate  |
|            | 5.4        | 5.4          | 1.7  | Low       |

#### Round 2

|            | Mean score | Median score | MADM | Agreement |
|------------|------------|--------------|------|-----------|
|            | 5.5        | 6.0          | 1.7  | Low       |
|            | 7.0        | 7.0          | 1.3  | Moderate  |
|            | 5.4        | 6.0          | 1.8  | Low       |
|            | 4.8        | 5.0          | 1.4  | Moderate  |
|            | 5.1        | 5.1          | 1.7  | Low       |
|            | 5.6        | 5.6          | 1.7  | Low       |
### 105- Child lipids

| Round 1 | Mean score | 5.4 | 5.9 | 5.9 | 5.1 | 5.8 | 5.6 |
|---------|------------|-----|-----|-----|-----|-----|-----|
|         | Median score | 6.0 | 7.0 | 6.0 | 5.0 | 6.0 | 5.0 |
