Supplementary Table 1. Serum creatinine values according to time point

| Creatinine (mg/dL) | Total (n = 229) | Survivor (n = 77) | Non-survivor (n = 152) | p-value |
|-------------------|-----------------|-------------------|------------------------|---------|
| Baseline*         | 0.9 (0.8–1.1)   | 0.9 (0.8–1.1)     | 0.9 (0.8–1.1)          | 0.12    |
| At admission      | 3.3 ± 2.3       | 3.6 ± 2.5         | 3.1 ± 2.1              | 0.11    |
| Peak              | 4.1 ± 2.1       | 4.5 ± 2.3         | 3.9 ± 2.0              | 0.06    |

*Baseline creatinine was evaluated in 172 subjects with an available baseline eGFR value within 3 months before admission.
