Supplemental data 1. Expressions of some autophagy related proteins in bone marrow derived, fetal liver derived megakaryocytes and platelets.

Quantification of the relative expressions of Atg7 (A), Atg5 (B), LC3-I (C), and LC3-II (D) in bone marrow derived megakaryocytes, fetal liver derived megakaryocytes and platelets, respectively. BM-MK, bone marrow derived megakaryocytes. FL-MK, fetal liver derived megakaryocytes. PLT, platelets. *P < 0.05, ** P < 0.01.
