The IEEE TRANSACTIONS ON NEURAL NETWORKS AND LEARNING SYSTEMS publishes technical articles that deal with the theory, design, and applications of neural networks and related learning systems. Readers are encouraged to submit manuscripts that disclose significant technical achievements, explain exploratory developments, or present significant application for neural networks and related learning systems.

The articles in this journal are peer reviewed in accordance with the requirements set forth in the IEEE Author Center (sections 8.2.1.C & 8.2.2.A). Each published article was reviewed by a minimum of two independent reviewers using a single-blind peer review process, where the identities of the reviewers are not known to the authors, but the reviewers know the identities of the authors. Articles will be screened for plagiarism before acceptance. Corresponding authors from low-income countries are eligible for waived or reduced open access APCs.

A. Types of Contributions

**TNLNLS** publishes three types of articles:
- **Papers (Full Papers)**
- **Brief Papers**
- **Comments Papers and Communications**

Full Papers are characterized by novel contributions of archival nature in developing theories and/or innovative applications of neural networks and learning systems. They can be either full-length or short contributions. Typically, a full-length published article is no longer available, the Editor-in-Chief will assign the comments paper to another Associate Editor whose expertise closely matches the article's topic. Comments papers and communications should comprise a significant contribution of interest to the TNNLS readership. The authors of the original article may be invited to submit a rebuttal. A comments paper should be concise as possible and will not exceed 3 pages formatted in the IEEE two-column style.

During the review process, submitted manuscripts will NOT be transferred from one category to another after submission/review. It would be the responsibility of authors to decide the category of their manuscript at the time of submission.

B. Submission of Manuscripts

To avoid delay in processing your article, please follow closely the following guidelines. Submission and review of new manuscripts is now done through ScholarOne Manuscripts, the IEEE's online submission and review system. Please log on to mc.manuscriptcentral.com/tnlnls and follow the directions to create an account (if a first-time user) and to submit your manuscript. If the manuscript is print-ready (all font embedded), it will be entered into the review process. You will be able to check on the status of your manuscript during the review process. Authors are required to provide detailed contact information for every author of their article during submission. The article will be returned without review if any such information is missing or incorrect.

The IEEE TRANSACTIONS ON NEURAL NETWORKS AND LEARNING SYSTEMS is primarily devoted to archival reports of work that have not been published elsewhere. Specifically, conference records and book chapters that have been published are not acceptable unless and until they have been significantly enhanced. In special circumstances or on exceptional occasions, the Editor-in-Chief may deem a contribution noteworthy enough to be exempted from this policy. Authors will be asked to confirm that the work being submitted has not been published elsewhere nor is it currently under review by another publication. If either of these conditions is not met or is subsequently violated, the article will be disqualified from possible publication in TNNLS.

C. ORCID Required

All IEEE journals require an Open Researcher and Contributor ID (ORCID) for all authors. To create an ORCID, please visit: https://orcid.org/register. The author will need a registered ORCID in order to submit a manuscript or review a proof in this journal.

D. English Language Editing Services

English language editing services can help refine the language of your article and reduce the risk of rejection without review. IEEE authors are eligible for discounts at several language editing services; visit the IEEE Author Center to learn more. Please note these services are fee-based and do not guarantee acceptance.

E. Author Names in Native Languages

IEEE supports the publication of author names in their native language alongside the English versions of their names in the author list of an article. For more information, please visit the IEEE Author Center at the following URL: https://journals.ieeeauthorcenter.ieee.org/create-your-ieee-article/create-the-text-of-your-article/publishing-author-names-in-native-languages/.

F. Style for Manuscript

The IEEE TRANSACTIONS ON NEURAL NETWORKS AND LEARNING SYSTEMS follows the format standards of the IEEE. The IEEE Author Center can be accessed here: https://ieeeauthorcenter.ieee.org.

Here are some of the general guidelines. A list of 4-5 keywords (index terms) and an abstract (described below) are required for all manuscripts submitted to this journal. When submitting a new article through ScholarOne Manuscripts, you may choose your own keywords related to the submitted manuscript. The submitted manuscript must be in the following format:
- **Full format**
  - Single-spaced, double column, standard IEEE published format.
  - All pages should be numbered. Provide an abstract of reasonable length that is an informative summary of the article, including any important results found or conclusions drawn. Authors are encouraged to put detailed derivations in appendices.

G. Open Access

This publication is a hybrid journal, allowing either Traditional manuscript submission or Open Access (author-pays OA) manuscript submission. Upon submission, if you choose to have your manuscript be an Open Access article, you commit to pay the discounted $2,045 OA fee if your manuscript is accepted for publication in order to enable unrestricted public access. Any other application charges (such as over-length page charge and/or charge for the use of color in the print format) will be billed separately once the manuscript formatting is complete but prior to the publication. If you would like your manuscript to be a Traditional submission, your article will be available to qualified subscribers and purchasers via IEEE Xplore. No OA payment is required for Traditional submission.

H. Page Charges

After a manuscript has been accepted for publication, the author's company or institution will be requested to pay a charge of $110 per printed page to cover part of the cost of publication. Page charges for this transaction, like those for journals of other professional societies, are not obligatory nor is their payment a prerequisite for publication. Articles submitted to this transaction will be imposed a mandatory page charge fee for the length of the manuscript. The manuscript page charge for the length of 10 pages for a full paper, 15 pages for a survey paper, and 6 pages for a brief paper. Authors of articles accepted for publication will be assessed a mandatory page charge of $200 (per page) for every printed page over these limits. The manuscript length (excluding supplementary materials) with over-length page charge must be less than 15 pages for a full paper, 21 pages for a survey paper, and 9 pages for a brief paper. For “Comments Papers and Communications,” existing rules apply.

I. Copyright

It is the policy of the IEEE to own copyright to the technical contributions it publishes. To comply with the IEEE copyright policy, authors are required to sign the IEEE Copyright Transfer Form before publication in either the print or electronic medium. The form is provided upon approval of the manuscript. Authors must submit a signed copy of this form with their final manuscript (after a manuscript is accepted for publication).

J. Submission of Final Manuscript

Page Numbers: Number all pages, including illustrations, in a single series, with no omitted numbers. Figures should be identified with the figure number.

References and Captions: Put all references at the end of your article in IEEE style (see “IEEE Author Center” information above). Do not include figure captions on the illustrations themselves. Figure captions should be sufficiently clear so that the figures can be understood without detailed reference to the accompanying text. Axes of graphs should have self-explanatory labels, not just symbols.

Illustrations and Photos: All figures will be printed in black and white, unless specifically requested. The color figures involve some cost to be born by the authors. The exact amount depends on the number of color figures (the total cost includes a flat fee plus a fee per figure). However, authors can use color figures keeping in mind that in IEEE Xplore these will appear in color but on the print copy it will be in black and white. Therefore, while referring to the figures in the text, authors should not refer to color, but some other attributes of the figures. Letters should be large enough to be read when the figures are reduced to two or one-column width—as much as 4:1 reduction from the original.

Manuscript and Electronic File: For the final printed production of the manuscript, the author will need to provide a single zip file that contains all the source files of the paper in one version. Please ensure that changes made to your article version are incorporated into your electronic version. Check that your files are complete including abstract, text, references, footnotes, biographies (for Papers), and figures captions.

IEEE can process most commercial software programs, but not page layout programs. Do not submit postscript files. The preferred programs are TeX, LaTeX, and Word (use standard macros). An IEEE LaTeX style file can be obtained by visiting the IEEE Author Center at https://ieeeauthorcenter.ieee.org.
